There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only Constitutional cure on the market. It is taken internally. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

DEAD OX FLAT, Oreg., May 16,-The stables and hog house of Mr. Vincent burned during the fierce wind Wednesday. How the house escaped is more than we can understand as the wind carried the flames almost directly toward it. We did not learn the origin of the fire.

The freeze of late has killed all the fruit. Seems as though the elements are at war as well as the peoples of the world. High winds and frosts have been the source of much anxiety.

Mrs. Guy Morgan made a visit to their dry land home last Thursday and to and ransacked. Nothing seemed to have been carried away, but a thorough rummage of everything had and February lambs on his way to been made and every thing left scattered about the premises

Jewey Rice finished disking for Ro Winnie Gould has been busy huntland Hall last week and he and his ing horses for the last few days, but brother, Chas., A. T. McDonald and Levi Crull spent Sunday measuring up the land. It was some job as a had a close shave from being horned high ragged bluff skirts across three forties of it biting deep gorges into that line of the clearing.

> It is reported the herd law propo sition is to be voted on in Fair Precinct the coming election. It is a great injustice for the irrigated portion of a precinct by its superior voting capacity to vote such a calamity upon the dry land farmers back in the hills. Without the free grass which abounds on the public domain on the high lands a dry farmer CAN NOT MAKE IT. We have already heard several of the oldest dry land farmers of the North and South Jacobson Gulches say they will have to give up in despair if the herd law is voted onto them. Why not wait then with the proposition and give the legislature a chance to pass a law enabling herd law districts to be formed irrespective of precincts or any other municipal district?

When thickly populated irrigated districts could vote their territory herd law without depriving their struggling fellow creature lying back in the hills of the easiest income he has in his hard struggle for existance on a dry ranch. The dry rancher is the pioneer-the demonstrator to the outside world of the practicability of living or starving on Malheur county homesteads. Is it right and honest to lure him into the county and then rob him of the one sure thing he is entitled to? Sheepmen, I suppose, would be glad if there were not a homesteader outside of the Snake riv-

"Farmers and Dairymen are getting wise. They are learning how
to buy machines. They consider
light, easy running the best possible evidence of quality. This is
especially true of high speed machines like cream separators. The
next thing they consider is, how
long the machine has been on the
