A young Irishman who had been residing in this country for some time, desiring to show his father, who was on his tunnel. This tunnel represents one burning lakes and fiery chasms of the greatest feats of engineering in the world. While the father and son were standing at the entrance of the tunnel a limited express train, traveling at the rate of 70 miles an hour, shot into the tunnel like a streak of lightning. The old man contemplated the sight in blank amazement, at which his son inquired, "Father, what do you think of that plied "Begorra, I was just wondering what in h-l would have become of that train if it had missed the hole!" * I was just thinking what in h-l would have become of Mert and foot or two.

am going to tell a story, And I'll tell it in my song; hope that it will please you, And will not detain you long. It's all about a fellow,

So gallant and so fine, And he used to drive a stage On the Owyhee line. He was the people's favorite, He dressed so very nice,

He was known in Boise City By the name of Billy Hise. He swung a whip so gracefully, For he was bound to shine As the high-toned driver Of the Owyhee line. One night as Billy was driving along,

As lively as a coon, He saw four men step into the road By the pale light of the moon. One sprang for the leaders,

While the others their guns held cocked. Saying, "I hate to trouble you, Billy, But just pass out that box." Now, when Billy heard those words

He opened wide his eyes, He did not know what in the devil

It took him by surprise. So, down into the boot, saying, "I pass it out with pleasure," And out into the middle of the road Went Wells & Fargo's treasure.

Now, when the men got this box They seemed quite sitisfied, For the man that held the leaders He politely stepped aside, Saying, "Billy, we've got just what So, drive along your team,"

PEOPLE'S FORUM

Editor Enterprise: Let us create man and give him dominion. Therefore dominion is man's inheritance. When Adam sinned he thereby brought all creation into sin, and once in sin there was no escape. Now Jesus Christ gave himself to the work, to undo what Adam had done by Satan's advice. Man, under sin, naturally condemns Satan as the serpent condemned God. Jesus said "Condemn not, and you shall not be condemned" or evil disappears. This is the truth that sets one free.

Public opinion, in ignorance of its dominion; binds men to sickness and deformity. As false witnesses arose to put Jesus to death, so they bear false witness against the sick and infirm to hold them in prison and poverty. He who allies himself with Jesus Christ, the Truth, can break the chords of public opinion and be free. Now every declaration of disease or imperfection of body is condemnation. Jesus rebuked every disease and cast it out, but unless we accept the fact it does not appear to us.

Belief opens the eyes or senses to that which we beieve. Belief, faith, is the substance or material, out of which the thing we name is made. Faith, belief, the word which makes, moves or creates, is not seen by the eye but is heard by the ear and is power in him who believes; either good or bad.
