"Brown Gravy" for Sheep Men
W. W. Wheaton has just superintended the building of sheds and the installation of a water system in one of the biggest lambing camps in Oregon. The camp is about midway between Vale and Ontario and more than 170,000 feet of lumber was used in constructing the sheds. His company has 22,000 ewes in this camp and the February crop of lambs started last week. He expects about 25,000 lambs and they will be ready for the June market. From present indications these lambs alone will bring a quarter of a million dollars and the wool on the ewes backs will bring half that much more, so it is brown gravy for the sheep men now all right—Ontario Democrat.
