Will Grow More Crops.

A greatly increased acreage in grain will be the order of the day in Harney this coming season, especially among the dry farmers, if the signs do not fail. Many are planning on large plots of potatoes. Of course, at the present price of seed, such will be difficult to secure, but many have made provision already and a large acreage will be planted to spuds.
The grain acreage will be greatly increased, encouraged by the high price of meat stuff, especially pork, there will be big incentive to growing all the grain possible. This, too, is encouraged by the never ceasing efforts of the superintendent of the Experiment Station in advocating the for this section, and by his earnest endeavor to get as much of this seed into the hands of the successful growers as possible.
That there will be an abundance of water for irrigation the coming season is now assured. The snow is very deep on the level and foothills than a year ago. It promises a most propitious season for the dry-farmer who thoroughly understands the science of this method.—Burns News.
