Let our object be our country, our whole country, and nothing but our ecuntry. And, by the blessing of God, may that country itself become a a double crew of men within about 10 as though moles had raised it. The vast and splendid monument, not of oppression and terror, but of wisdom, days. of peace, and of liberty, upon which the world may gaze with admiration ferever .--- Daniel Webster.

Ma Ma Ma Ma ma

"As a reward for our neutrality what have WHY WE ARE FIGHTING. we received at the hands of William II?"

This question was answered at the time America declared war in an Indictment of German policy by G. E. Foss, of

Illiois, a distinguished member of Congress, debating in House of Rrepresentatives, April 6, 1917.

"He has set the torch of incendiary to our factories, our workshops, our ships and our wharves.

"He has laid the bomb of the assassin in our munition plants and the holds of our ships.

"He has sought to corrupt our manhood with a selfish dream of peace when there is no peace.

"He has wilfully butchered our citizens on the high seas.

"He has destroyed our commerce.

"He seeks to terrorize us with his devilish policy of frightfulness. "He has violated every canon of international decency and set at

naught every solemn treaty and every precept of international law. "He has plunged the world into the maddest orgy of blood, rapine and

murder which history records.

"He has intrigued against our peace at home and abroad.

"He seeks to destroy our civilization. Patience is no longer a virtue. further endurance is cowardice, submission to Prussian demands is slavery.'

Ros * Ros His Ros Ros

If peace can be determined on an honorable and satisfactory PEACE. basis every effort should be made by America to obtain that re-

sult before she sacrifices the young manhood of the nation and imposes financial burdens of taxation upon future committions. War means destruction-that is why it is termed-hell. It is hall to see the work of ages, the civilization of centuries disregarded and wiped out. Peace means development and conservation. That is why utopia and heaven are one and the same.

We are in this war in order to remove forever the menace of future wars. Whenever any peace can be secured which will guarantee that, it is mittently brown and blue shale with our duty to declare peace as fearlessly and we declared war. Let us considcr every reasonable peace proposal. But in the mean time every loyal citizen will do his full share toward defeating the common enemy of democracy. We must fight for peace. And there can be no peace until autocracy is abolished from the face of the earth.

For Economy's Sake **Buy Advertised Goods!**

In these days of increasing prices we sometimes hear this argument advanced: "If 'So-and-So' didn't spend so much money for advertising they could sell cheaper." No argument could be farther from the truth. Advertising means more sales at a lower cost, which in turn makes possible a lower selling price.

You can easily see why this is true. Anything which enables a manufacturer or a merchant to sell larger quantities of a certain article makes it possible for him to buy materials in larger quantities and at a less cost-it also enables him to cut costs in every process of his business and he can SELL FOR LESS.

Take a pair of shoes for example. The little manufacturer with an output of 50 pairs a day, who buys leather two or three rolls at a time, and his findings in proportion, could not possibly sell as cheap, for the same quality, as if he were making 5000 pairs a day. The cost of the advertising to create demand is more than absorbed by the saving in quantity buying and big production.

Apply the same thing to the local merchant. It costs him the same amount for heat, for light, for rent and for clerk hire whether his clerks are "standing around" twothirds of the day or if they are busy every minute of the time.

His expenses are the same in either case, But if he advertises and brings more people to the store, so his clerks are busy all the time, it is very obvious that they will sell more goods, be able to buy in larger quantities and his profits will be many times greater. HE CAN THEREFORE AFFORD TO SELL FOR LESS.

Advertising lowers selling cost for both the manufacturer and the merchant. In these war times when economy is a patriotic duty, it is safe to assume that your money will go further by buying advertised and branded merchandise from the merchant who also advertises

The Malheur Enterprise Phone 42 Vale, Oreg. of gas and oil. A Trip To The Oil Field.. A Capital News representative was aken to the place where the Western Pacific Oil & Gas company is drilling for oil and was shown portions of the vast teritory this company has under iron clad lease, by W. D. Meyer, the comparatively close at hand. efficient manager of the company.

It is eight and one-half miles southwest of Vale where the big 75-fool standard derrick is stationed. One is t once impressed with the size and tability of the big derrick and with he completeness of the oil well equipment the company owns. It would ost \$30,000 to replace the tools, casing, etc., the company now has at the well. With the present derrick and tools it is possible to drill a well 5000 feet deep. Among the equipment the company owns and has at the well arc:

tum that the drillers will encounter Three complete strings of tools, all at a depth of 307 feet. It is confiparts in duplicate, making in reality dently believed a good oil demonstrasix complete strings of tools; 3200 feet of special heavy California casing; 1500 feet of heavy manilla cable

and 2000 feet of steel cable. Complete blacksmith shops thus being prepared to make own tools at will and 110-foot stratum. The 38-foot sand to repair any breaks without loss of exposure, in addition to having miltime, A 50-horsepower stationary tions and millions of sea shells, also boiler and 25-horsepower engine for operating the great drills. A portable 11-horsepower boiler and 10-horsethe stratum.

power engine with which to pump oil when the well is brought in. Five complete strings of fishing tools for shing out tools or casing from the well.

The company has everything complete to bring in the oil field here In effect it states that a light amberwithout the need of buying any more
