in the packing industry.

Swift & Company, although the largest packer, handles not to exceed one-eighth of the total meat production of the United States.

The five large packers do not handle to exceed one-third of the total meat production of the United States.

Swift & Company is not in combination with any other packeror packers to control prices.

There is very active competition in the buying of live-stock and equally keen competition in the sale of dressed meats and by-products.
