RIVERDALE

Cutting Second Crop Alfalfa—Heavy Corn Crop Expected—Aged Lady Drown

RIVERDALE, Oregon, July 17—Boyd Luke a former resident of the flat but now of the Yakima valley Washington, spent a few days here recently.

Glen Spicer of Eugene passed here a few days ago on his way to Blackfoot Idaho where he will spend two or three weeks with relatives.

Corn Crops are looking good and prospects good for a bounteous harvest.

Misses Fern and May Estby were down from Cambridge Idaho this week. Chichen thieves are again playing their trade.

Ranchers are busy cutting second crop of alfalfa which is fairly good and the price is still climbing. Some are predicting \$30.00 hay by spring.

Carl Brookshire and sister Miss Haasie left a few days ago for their old home at Richmond, Wheeler county on a pleasure trip. They expect to return soon.

Mr. and Mrs. Leonard Christensen motored to Ontario Sunday on a pleasure trip.

Dave Uly and Mr. and Mrs. J. W. Outcalt and children went to the Boise valley county Sunday on a pleasure and outing trip and had a very nice time.

Clifford Luke who was one of the early volunteers for war service has just returned from Germany and says the good old Snake river valley looks good to him and he is glad to see friends and loved ones again.

Mr. and Mrs. A. J. Chapman returned to Richmond, a few days ago where they will dispose of their personal property. They like this part of the country and figure on buying land here when they return.

Mrs. W. H. Wilkerson an aged lady was found drowned in Snake river below the bridge a few days ago by some boys who were fishing. Whether she jumped from the bridge or fell in the river is unknown.

Mr. and Mrs. J. H. Warren and three children of Blackfoot, Idaho visited friends here a few days ago. Mr. Warren disposed of his sheep for over \$50,000 and also ranch and other property and is now looking for a new location, however they expect to spend the summer in Western Oregon, and winter in California before locating permanently.

Old timers who were raised here—spent their entire life time in this part of the country—informed the writer that Snake river was never lower at this time of year and its still dropping but says mosquitoes many years ago were more plentiful than now—ten to one or more. He thinks this an unusual year in this country's history.

Federal Control is Urged by Stockmen. Boise, Idaho.—Government control of all the remaining public domain under the supervision of the forest service was declared for at a joint session of the Idaho Wool Growers association and Idaho Cattle and Horse Trainers association here.

Jamaica Ginger Barred in Maine. Augusta, Me.—Jamaica ginger was declared to be intoxicating and its sale or possession unlawful in an opinion handed down by the supreme court.

NOTICE TO SUBSCRIBERS

Increased cost of paper and all expenses in connection with publishing a newspaper, together with new postal regulations require us to enforce subscribers to pay in advance. Now in order to treat these fairly and to maintain the high standard of the Enterprise, EVERY subscriber, in order to continue receiving the Enterprise must pay his subscription of \$2.00 regularly each year, and in advance.

Watch Your Date
The date to which your subscription is paid is printed each week on your copy of the paper. Watch this date and try to send in the money for the next year's subscription before your time expires, thus avoiding missing any copies. The dates are indicated on your paper just to the right of your name as follows: 1Jan9, means the first day of January, 1919, etc. Hereafter we will not mail receipts for subscriptions unless requested, but will advance the date printed on your paper, thus giving you notice that you have received proper credit. As we correct the list but once a month your date may not be changed until a week or so after receipt of payment. We are always glad to correct any errors in your name, address, or the date paid to.

Change of Address
In requesting us to change the address of your paper from one post office to another it is necessary that you give the post office where you have been receiving the Enterprise as well as the new address to which you wish it sent. This will avoid your missing several issues and will save us a blind search thru the entire list to find your old address.

If your paper does not come regularly kindly notify us at once so we can locate the trouble promptly.

Resembles Old Log Cabin

Remarkably Pretty Bungalow Fashioned From Concrete, the Modern Building Material.

American pioneers have handed down an affectionate regard for log architecture, and many a city dweller would prefer a plain log cabin to a modern mansion for his country home. A builder in Yankton, S. D., has combined both in a pretty and homelike bungalow whose "logs" are made of concrete. The loglike units are precast separately, flat on top, bottom and inside, but with the outside surface molded round and with an imitation

In This Pretty Bungalow the "Logs" Are Precast Concrete Units, Laid Up With Mortar, Like Any Masonry, and Stained Wood-Brown on the Outside to Look Natural.

dark finish. Ends are cast with dovetails and interlock at the corners. Ordinary mortar joints are used, and the exterior is finished to a natural effect with a wood-brown stain, preserving in form all the esthetic value of the rustic model, but with the cleanliness and sanitary value of the modern material.—Popular Mechanics Magazine.

If So Join The Malheur County Development League and Organize Your Own Precinct Development League

Every precinct has the same representation and the League will be the means of promoting Irrigation Better Roads Colonization New Industry Better Markets Community Needs County Cooperation etc. etc. etc.

Send in your \$2.00 which includes the membership fee and dues for the first year to your Precinct Treasurer or to Cliff Boyer, County League Treasurer.

The KITCHEN CABINET

In this world it is not what we take up but what we give up that makes us rich.—H. W. Beecher.

HELPFUL REMINDERS.

Save any bits of left-over paraffin from jelly glasses, wash well, melt and strain and it will be ready for use another year.

Paraffin is fine to keep the irons smooth while ironing; it also keeps the kitchen range bright and good-looking, and should be used freely if a range stands unused any length of time.

When pouring anything very hot into a glass dish set the dish on a wet cloth. Kerosene is a great saver of scouring soap and labor. Use a cloth dampened with kerosene to wipe out the boiler after using. It will keep the sink free from grease with little rubbing.

It is reasonable just now to bear in mind that fruit picked after a heavy rain loses its flavor and is not good for making jelly.

Fruit for jelly making should not be too ripe, as the pectin is found in larger amount in unripe fruit; this is the thickening quality which gives to jelly its consistency.

Currants and raspberries in equal quantities make a delicious jelly. Jelly to be clear should drip through a jelly bag and never be squeezed.

The uncooked stems of mushrooms shredded and mixed with blanched and shredded almonds served on lettuce with French dressing, makes a most dainty salad. Little bits of left-over salmon mixed with coconut, fresh, or, if dried, the sugar washed out of it, with a chopped pickle or two, makes another not common salad.

Lettuce that has become too old for fresh use may be cooked and served as greens, making another vegetable dish and a palatable one, too.

Any of the cooked lettuce left over may be served with hard-cooked egg as a salad with a spoonful of bottled dressing.

Any green vegetable is of better color to serve if the kettle is left uncovered while cooking.

Save the meat and gather mushrooms now up to frost time. The large variety of edible ones will offer a change of flavor, yet if one is fond of them, they can be served in some way for each day. Do not risk picking mushrooms unless you are sure of the variety.

HOME TOWN HELPS

SIGNAL AT DANGEROUS CURVE

Automatic Apparatus Eliminates Hazard Where It is Imperative Cars Should Not Meet.

The danger signal herewith illustrated is now in operation in California, and has been so efficient in eliminating the hazard at a certain sharp, blind curve that a petition has been circulated, favoring the installation of the device at other dangerous turns and blind crossings.

At the particular turn where the signal has been tried, the road is so narrow that it is absolutely necessary that cars should not meet; if they do, there will either be a collision or a backing out by one of them to the neck of the bottle. Moreover, the curve is sharp and blind.

The apparatus which has been put in to meet this condition consists of a trigger trap in a box 12 inches wide and any desired length. This is buried level with the surface of the highway, with the trigger projecting about two inches above the trap. When this trigger is run over by an automobile the wheel presses it downward, and in this way pulls a wire

Highway Block Signal and the Trap at the End of the Dangerous Stretch Which Operates It.

which runs underground to a signal post. This wire is connected with a ratchet which revolves the arm on the signal post, warning any autoist who may be coming in the opposite direction to wait for the first car to pass him before he ventures on the dangerous stretch.

Of course it would be out of the question to employ here a signal that had to be reset. The car which set it might fall to run over a resetting trigger; and the car coming the other way could not be left to reset it, because there is not always such a car. So advantage is taken of the fact that while highly dangerous, the narrow place of road is fairly short. The danger indication consists merely in motion of the signal arm, not in any particular position thereof; and a car which is near enough to the signal post to enable its driver to see such motion will not reach the curve until the signaling car has passed off it.—Popular Science Monthly.

Laying Out Residence Districts. Employment of taste in the laying out of new residence districts need not be expensive. It is, in the highest sense, economical. It is possible to get far more attractive and beautiful homes at the prices we now pay for monotonous and ugliness and frequently for unsanitary dwellings. What is needed is to plan for these things as carefully as the manufacturer plans his factory or the railroad manager his system of tracks.

Spade Deep.

Loosen up the soil to catch and store the winter rains. Vegetables and fruits are mostly water. Get all the water you can for war service for your growing crops next spring. If you put your garden into conditions of a sponge and next spring prevent surface evaporation, you will be safeguarding against a drought. Spade deep unless you would bring to the surface poor garden soil.

End of the Dream.

"It looks as if Jones is better satisfied with his wife." "Yes, he is. You see, he went back home on a visit and saw the girl he has been deceiving for the past twenty years."—Life.

"French Grieved at Our Senators."—Head line. Well, they don't feel any worse about'em than we do. We have to live with them.—New York Call.

OLD NEWSPAPERS—Put them under the carpets, in the pantry shelves etc. Handy for building fires. 10c per bunch of 10 pounds at the Enterprise Office, Vale, Oregon.
