Potatoes are sometimes planted in February to provide a very early crop for table use. Earliest of all is a good variety to use in this way. The seed should be planted whole to avoid rotting in the soil. Some early potatoes may be had in this way where soils are late in getting dry enough to work later in the season.

O. A. C. Experiment station.

Moss on fruit trees is most quickly got rid of by the use of one lb. of common lye dissolved in six gallons of water used as a spray. Bordeaux mixture has proved the most permanent control.

Walter Starr was a visitor during the week for grain he recently purchased from Tex Martin. Mr. Starr is busy making fence posts at Juniper Mountain.
