

"Cappy Ricks" Real Broadway Hit at Chautauqua

A Real American Play Told in Real American Style—"Cappy" One of the Most Delightful Characters of the Modern Stage—
A Story of the "Frisco Water Front"

The mere announcement of the play—and the players—should in itself be sufficient to insure a capacity audience when Chautauqua brings "Cappy Ricks" to town. This greatest of all American comedies will be presented on the fifth night by the Percival Vivian Players of New York. "Cappy Ricks" was dramatized by Edward E. Rose from Peter B. Kyne's famous Saturday Evening Post series of the same name. It was first presented by Oliver Morosco at the Morosco Theatre in New York, where it ran a solid year. A five months' run followed at the Cort Theatre, Chicago. The play was stamped as a Broadway success from its very first appearance, for it is distinctively American, with a laugh or two every moment. The story is woven about a rough, old sea-dog, "Cappy Ricks," who has a weather-beaten exterior, but beneath a heart of gold. It is good, wholesome, clean comedy all the way through. Cupid plays his customary pranks throughout the story, and Cappy—himself immune—finally smiles down upon a romance or two and the play ends happily all around. It's a real American story, told in a real American way. Don't miss it.

Oceanic Quintet to Appear Soon

Company of Clever Musicians and Entertainers to Appear at Chautauqua on Fourth Day

The Oceanic Quintet is coming to Chautauqua—five gifted instrumentalists and vocalists, who play, sing and read, and do all exceptionally well. It is today one of the best known Chautauqua attractions in America, having toured the United States, Canada, England, France and New Zealand. The European trip was made during the war, the company then being known as "The Western Four." Three of the original personnel are still with the company, Miss Anella Carstensen, brilliant young Danish violinist; Miss Helen Ferguson, one of the most talented lady cornetists in the country; Miss Beulah Truitt, reader and drummer; Lois Brown Dorsett, soprano and pianist, and Miss Esther Sauford, 'cellist. It is a fine organization, musically, and from the entertainment standpoint is second to none—with its enviable record of service under five flags. Miss Truitt's readings are always tremendously popular with her audiences, particularly her character numbers. She is an extremely gifted artist in this line.

ENGLISH GIRL FINDS AMERICA LIVELY PLACE
A letter written by an English girl, who went to America to marry, is published by a London newspaper in part as follows: "Speeding is carried to the limit here, cars teaming through busy thoroughfares at 40 to 50 miles an hour, often chased by cars carrying police patrols armed with revolvers. In one day 10 people were killed by motor accidents."

SPOTS!

Spots, Stains, Harmlessly Removed.

It is never safe to attempt to remove stains and spots from fabrics through the use of chemicals which may have been purchased from the house-to-house vender.

Different fabrics require different treatments. It is really a problem for the expert.

Do not take chances. Send your dresses, coats, suits, jackets, and so forth to us for expert cleaning.

GIVE PUREBREDS MORE CARE

Dairyman Often Takes More Interest in High Class Stock Because of Possibilities.

(Prepared by the United States Department of Agriculture.)
There is no good reason why it should cost more to care for a good herd of purebred dairy cows than it costs to care for the same number of good grades, although farmers sometimes believe that the purebreds are more expensive to keep. However, says the United States Department of Agriculture, the dairyman often does spend more on purebreds because he sees greater possibilities in them, and consequently takes more interest in them, feeding them better and building better barns to house them. He does not need to do this, but usually he finds that it pays him in gross returns and in net returns.

The results would have been the same, though possibly not in the same degree, if better care and feed had been given to a good grade herd. But it sometimes takes the stimulation supplied by the ownership of a few purebreds to induce a man to improve his practices.

Purebred and Tuberculin-Tested Dairy Cows.

CHICAGO PASTOR WINS EIGHT YEAR CRUSADE

"Fighting Parson" Cleaned Up Notorious North Side Dives.

Dr. Elmer Lynn Williams is called the "fighting parson" back in Chicago. When he came to that city as pastor of Grace Methodist Episcopal church, he found an abominably corrupt condition in the moral life of his community. He proceeded to clean up conditions, and he did the job to a nicety.

He won the support and admiration of the good people of Chicago, the respect and co-operation of the police department and sheriff's office—and at the same time the everlasting hatred of the underworld. He led an eight-year campaign and won his battle with a knockout. Hear his lecture, "The Big Game," at Chautauqua, on the sixth night.

TREATING STERILITY IN COW

Most Cases Become Chronic or Permanent Unless Properly Handled by Veterinarian.

In many herds where abortion disease is present, from five to ten per cent of the cows become sterile or barren, and most cases become chronic or permanent unless they are treated by a qualified veterinarian. Dr. W. L. Williams of the New York State Veterinary college is to be given credit for the plan of procedure in handling these cows. The treatment should not be neglected too long after the cows manifest this symptom.

A thorough examination of the patient is necessary to locate the trouble either in the uterus, ovaries or fallopian tubes, and treated accordingly. It is not uncommon for a skilled operator to restore five out of six cases to a reproductive state under favorable conditions.

Cases of long standing should be sold to the butcher, as the treatment falls to help them. A case of more than eight months' to one year's standing is very discouraging to the operator, for he realizes that functional changes have taken place in the reproductive organs that will be difficult to correct by treatment. Therefore do not delay having an animal examined and treated in the beginning of the trouble instead of waiting until it is too late. The annual loss caused by sterility would be surprisingly high if survey could be made and accurate data obtained from the cattle breeders.
