TINY HAMMERS IN STEAM.

There is an old Scotch proverb that Mony a mickle maks a muckle. Mrs. Clyde Sager was called to the which means that many tittle things of steam is a case of this, for it can drive great boats through the water and it can tent up the greatest rocks. Yet all its power is due to the coming together of little units of power

When we speak of steam we meat water vapor- water in the form of gas than 1997 if everybody in Lents had I'bts gas is formed under pressure and has power to expand it is this expan sive power that does the work After ward the gas becomes con and con densed, so that we can see it, and that

is what we call steam The power of the gas is due to the tiny molecules of water of which it is striking against the sides of whatever bems them in The torce in one of these molecules is very tiny for the Officer Dolon is "some officer." If amount of stuff in the molecules is so than you could see you could not drive tions of these little nammers flying about in the gas they are able to do all the work that steam does .- From "The Child's Book of Knowledge."

> Peleg Lightfoot thinks the writer from Cherryville is "screamingly funny." The writer would be eminently all right if he sung the same little ding-dong as the members of the Lightweight family, all of whom-without a doubt-voted for Hurlburt for the legislature and Hanley for congress.

An astonishing car-load of gold ore was shipped from Cripple Creek, Col., lately that was valued at \$1,000,000. Many pounds of this ore was worth \$1.00 to the pound. This is said to be a record breaker. No such a valuable lot of ore was ever known. With such an abundance of wealth in our mountains and such an abundance of crops in every direction it seems strange that there should be a hungry person in the land. There is said to be nearly a 1,000,000 men out of employment right now. There is something rotten in Denmark."
