The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietor has so much faith in its curative powers that he offers One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Paid the Fine
A policeman in a country village where "cases" were rare one day came across his invidious in an incapable state. The chance was too good to be missed, so the landlord was summoned and fined to the amount of 4s 6d. The fine was paid, but the policeman's feelings can be better imagined than described when, on reaching home, he found his rent had been continued six pence per week, and so it continued for twenty-nine weeks, when the landlord coolly informed him that he had paid the fine and could have his house at the former rent.—London Answers

THE COUNTY FAIR

By Peter Radford
Lecturer National Farmers' Union

The farmer gets more out of the fair than anyone else. The fair to a city man is an entertainment; to a farmer it is education. Let us take a stroll through the fair grounds and linger a moment at a few of the points of greatest interest. We will first visit the mechanical department and hold communion with the world's greatest thinkers.

You are now attending a congress of the mental giants in mechanical science of all ages. They are addressing you in tongues of iron and steel and in language mute and powerful tell an eloquent story of the world's progress. The inventive geniuses are the most valuable farm hands we have and they perform an enduring service to mankind. We can all help others for a brief period while we live, but it takes a master mind to tower into the realm of science and light a torch of progress that will illuminate the pathway of civilization for future generations. The men who gave us the sickle, the binder, the cotton gin and hundreds of other valuable inventions work in every field on earth and will continue their labors as long as time. Their bright intellects have conquered death and they will live and serve mankind on and on forever, without money and without price. They have shown us how grand and noble it is to work for others; they have also taught us lessons in economy and efficiency, how to make one hour do the work of two or more; have lengthened our lives, multiplied our opportunities and taken toll off the back of humanity.

They are the most practical men the world ever produced. Their inventions have stood the acid test of utility and efficiency. Like all useful men, they do not seek publicity, yet millions of machines sing their praises from every harvest field on earth and as many plows turn the soil in mute applause of their marvelous achievements.

BRAZIL NUT TREES.

They Do Not Bear Fruit Until They Are Fifty Years Old

In this country Brazil nuts are at most as well known as walnuts, yet few know the manner of their growth and the steps taken in their collection and marketing. The tree itself is the most majestic in the valley of the Amazon, where it attains a height ranging from fifty to a hundred feet. Generally several hundred trees are found in a group. The control of the best producing districts long ago passed to private individuals; hence the natives are not free to pick and sell the nuts as will.

The Brazil nut tree does not begin to bear fruit until it attains the age of fifty years or thereabouts and continues to produce crops intermittently at most forever. At least trees known to be hundreds of years old have produced crops. The pods in which the nuts are contained drop in November and December.

These pods are very hard and weigh several pounds, consequently the trees are studiously avoided during the period in which the pods are dropping since it would be extremely hazardous for the gatherers to expose themselves to the danger of having the pods fall on them from such a great height. Each pod is at least seven inches in diameter and is full of nuts. The pod is usually opened with a machete.—Argonaut

Big International Exposition's Amusements Novel and Wonderful

President Wilson Will Visit Panama-Pacific Display of Nations via Panama Canal—Vanderbilt Cup Race and Grand Prix Will Be Held In San Francisco.

By HAMILTON WRIGHT.
WONDERFUL and novel amusements, parades and pageants of the oriental countries, auto and yacht races and athletic contests will be observed upon a scale of unexampled magnitude and grandeur at the Panama-Pacific International Exposition. The extensive participation of China, Japan, Siam and Indo and Cochinchina, when taken in connection with the plans already made and with the interesting oriental population of San Francisco, assures such spectacles as have never before been seen in the occident. Pageants of miles in length set off by wonderful floats and marvelous pyrotechnics will wind through the streets of San Francisco. There will be held throughout the

this event. The famous Salt Lake Mormon choir, the deep toned plaintive singers of Hawaii and even a chorus of fifty Maorian singers will take part in the choral events. At an expenditure of \$1,250,000 the Exposition has constructed a great Auditorium in the civic center of San Francisco, which will be used by the great conventions and song festivals. Mr. and Mrs. Douglas Crane will present their latest terpsichorean novelty, the "Exposition Tango." Mr. Harry Lauder will sing the Exposition ballad.

The amusement section of the Exposition, the "Zone," corresponding to the famous "Midway" at the World's Columbian Exposition at Chicago, will carry out the purpose of the Exposition to give every feature a high educational value.

WONDERFUL GLASS DOME OF THE PALACE OF HORTICULTURE, PANAMA-PACIFIC INTERNATIONAL EXPOSITION, SAN FRANCISCO, 1915.

Palace of Horticulture, looking through the Court of Palms. This beautiful structure has a glass dome 185 feet high and 152 feet in diameter. Crowning the dome is a huge basket. The general style of the architecture is the French renaissance, with Saracenic modification. The extreme length of the palace is 672 feet and breadth 320 feet.

entire period of the Exposition, which opens Feb. 20, 1915, a series of great events, including sports and athletic contests of many kinds conducted upon a scale of great magnitude.

The Vanderbilt Automobile Cup Race and the Grand Prix, the two supreme events of the automobile year, will be held upon a four mile course, embracing a circuit of the Exposition palaces, a spectacular background far exceeding in beauty and grandeur any which ancient Rome beheld during its historic chariot races. The Vanderbilt Cup Race will take place on Feb. 22 and the Grand Prix on Feb. 27, 1915. Great motorboats of the deep sea cruiser type will race for a \$10,000 prize from New York through the Panama canal to the Golden Gate. A series of international yacht races in the twenty-one meter class will be held in San Francisco bay. President Woodrow Wilson, Emperor William of Germany and King George of England have each offered trophies in these events. Swimming, water polo, fly casting, canoeing, football, baseball and long distance foot racing are included in a series of more than 200 different kinds of contests. President Wilson himself will attend the Exposition, and it is probable the members of congress will attend in an especially chartered steamer.

Of international interest will be the greatest live stock show in the world's history. More than \$500,000 will be awarded in prizes in a continuous live stock exhibit. Rare and valuable breeds of all kinds of live stock from distant countries of the globe will be shown. Specimens of the famous Chillingham wild white cattle will be exhibited for the first time. With the exception of two specimens at the London zoo, this breed has never been shown outside of Chillingham park, England. These cattle are pure white, with black noses, black tips to the ears and black horns. An international sheep shearing contest will be one of the unique exhibitions.

For the musical events there has been built by the Exposition the magnificent Festival Palace upon the grounds. This is equipped with a wonderful pipe organ, upon which Mr. Edwin Lemare, world famous organist, among other celebrities, will give a series of recitals. The International Elsteddoff will at San Francisco compete for \$25,000 in cash prizes. More than 20,000 singers will participate in

Imagine, for the purposes of illustration, the interest, action and novelty of ten great circuses like Barnum & Bailey's combined into a single "greatest show on earth" and presented at ten times the cost of the single production and an idea is gained of the originality of this section. A total of more than eleven millions of dollars has been expended in its establishment. The concessions, as these less serious features of the Exposition are known, include a great open air panoramic reproduction of the Yellowstone National park and a similar representation of the Grand Canyon of Arizona, presented by two of the transcon-

er arm, will raise sightseers more than 325 feet above San Francisco bay, affording an unsurpassed view of the Exposition City and the Golden Gate.

Apart from the amusements, conventions and congresses, the vast pageants, the superb pavilions of the nations and the magnificent state buildings, the Exposition itself is a sight well worth seeing. The giant exhibit palaces, the loftiest and most imposing exposition buildings ever constructed, are in their architecture representative of the finest work of a commission of famous American architects, who freely collaborated with distinguished members of this profession abroad.

VAST TRIUMPHAL ARCH AT THE WORLD'S GREATEST EXPOSITION, THE PANAMA-PACIFIC INTERNATIONAL EXPOSITION, SAN FRANCISCO, 1915.

Arch of the Setting Sun in the west entrance to the Court of the Universe at the Panama-Pacific International Exposition. Surmounting the arch is a group of statuary representing "The Nations of the West." In the middle of the group is an emigrant wagon drawn by oxen. Riding in this is the figure of a woman, "The Mother of Tomorrow," and by her side are two children, "The Hopes of Tomorrow." Other figures represent an American Indian, a Mexican, an Alaskan and other American types.

for money, was decided in favor of the negative at the Lyceum last Friday night.

Lillian B. Averill, having graduated from the Oregon State School at Monmouth, has returned to her home here for a short time.

Wallace Davis of Portland is on his ranch one mile south of town, where he is superintending a job of stump pulling. He will clear up a tract of 8 or 10 acres and put it in cultivation.

Geo. L. Howard, a real estate agent of Portland, was here the first of the week with a prospective land buyer. He says the engineer of the steam show-

on the Bull Run extension bought 40 acres of him lately and he surely must know that there will be something doing here this season, either a logging road or the railroad will be extended from Bull Run. It looks like somebody has obtained some advanced information.

The sixty-ninth anniversary of the birthday of W. O. Rugh was celebrated at the home ranch near here last Sunday. Quite a number of the neighbors and friends were present. This occasion was also the nineteenth anniversary of the wedding of Mr. and Mrs. Rugh, it being the second marriage of both.

Mrs. Henry Berdenstein received the
