What He Thought.

A woman-came into the store of G. Sides on Tuesday and said: "Harry, what would you think of a man who would eat two slices of ham, eight eggs, five large potatoes with the skins on them, six slices of bread and two cups of coffee?"

I said at once that he was a - hog. She then informed me that it was her husband and got mad.

Just then her husband came in and called me aside and asked me what his wife said to me. I told him and he got sore, too. This instrument in its perfected form is described and illustrated by the Electrical Experimenter. It is a metal tube of small caliber containing an arrangement of mirrors and lenses and having a small electric light at the end. This is pushed down the throat of the patient. The light is turned on and the instrument is moved about until every part of the inner surface has been examined.

The mirrors and lighting arrange ment leave enough space in the tube for fine scalpels and forceps and scissors to be passed down through it. Thus the surgeon is able sometimes to perform delicate operations through the tube and without cutting into the patient's abdomen. To the outer end of the instrument rubber bulbs are attached, and these are used for various purposes according to the needs

Secrets and Unravelers.

During the last few months the submarine cables have been particularly busy carrying secret messages between the various governments. Every government has its own particular torms of cipher specially composed for it by experts. The cipher is, however, only a defective method of securing secrecy, none having yet been concocted to baffle the cipher unraveller. During the Spanish-American war the Americans appeared to the Spanish to be peculiarly lax in allowing a certain cable used by them to remain unchecked. They poured cipher messages through, and they were duly received and acknowledged by their agents. The senders and recipients little dreamt that every message sent to the cable passed first through American hands and was read by them. The supposed secret messages led to operations that, to the surprise of the Spanish, were foiled in a disastrous manner.

To Translate Old Book on Texas. The only existing copy of "Texas in the Year of 1848," written in German, by Victor Bracht, one of the early German settlers, who came to Texas in 1845, was loaned to R. P. Bracht, son of the author of the book, by the state library. Mr. Bracht, says the San Antonio Light, wishes to have a translation made.

Victor Bracht came to Texas in 1845 with the Prince Solms-Braunfels colony to New Braunfels, and it is of this early period that the book is written. It tells of the life among the colonists and the opinion of the new land. Mr. Bracht was living in Mexico when Maximilian was emperor and knew that unfortunate ruler and his unhappy

A Safe Used Truck to Buy.

A REBUILT FEDERAL is as good value for the money as a new truck. By rebuilt we mean that the truck is entirely taken apart, each part examined and if necessary replaced by a new part made at the Federal factory, the entire truck repainted and refinished, and everything necessary done to make the truck practically as good as new in every detail.

When you buy a rebuilt Federal you are protected by it is same policy and interest that we give to all Federal owners. We operate a repair department, in which the workmen are specialists on Federals, our supply of Federal parts is complete, and the stock reom organization high class, which insures the prompt filling of all parts orders. We also operate a service department, which is open day and night, "always at your call." The Federal being a good truck in the first place and protected by a company which is equipped and has the disposition to give you service—is consequently.

A SAFE USED TRUCK TO BUY.

If you are in the market for a truck from \$1000 to \$1400, we urge you to compare used Federals with new trucks at similar prices. We think we can convince you of their superior value.

Pinkham's Vegetable Compound, without possessing great virtue and actual worth. Such medicines must be looked upon and termed both standard and dependable by every thinking person.

Captured Soldiers Allowed to Sketch, Says Embassy Report-Canadians in Modern Barracks.

London,-The official press bureau issues a report of the visits of Doctor Ohnesborg and H. Rivington Pyne of the American embassy at Berlin to the German prison camps for officers at Heidelberg, Villingen and Igolstadt and to the camps for other prisoners at Stuttgart, Ulm, Nuernberg and Wuerzburg.

The report states that Lieut, Ernest McLurg and the Second Canadians at Heldelberg are confined to modern barracks not previously occupied by Germans. The rooms are large and the food good. The German commandant at Villingen has inaugurated daily excursions of the imprisoned officers. Bodies of fifteen or twenty at a time walk through the surrounding country in charge of a noncommissioned officer and three or four guards. Those who are able to do sketching or painting are permitted to go alone or in smaller groups with a single guard.

The report emphasizes the fact that the men are all badly in need of uni-

New York.-How Patrolman Thomas Weber, while off duty at night, came to pull five young men from under a bed on the top floor of the four-story white stone residence of Charles Muller, a stockbroker, at 474 West One Hundred and Forty-first street, is a simply told tale.

Wilkes answered the "ad," and nine days after their first meeting the couple were married in Cleveland, where he was a wire worker.

Mrs. Wilkes claimed her husband liked the city and wouldn't stay with her on their Middlefield farm. Wilkes said he had \$4,100 when he married, that his wife took charge of his finances, and he hasn't anything but the interest in the farm.
