Miss Muriel Smith left Thursday evening for Manhattan, Kansas, where she will live with her grandparents, Mr. Smith's parents, and probably attend the Kansas Agricultural College.

T. Y. Cadwell and E. P. Tobin completed a new six room residence, with basement, porch and all up to date features at 85th street and Woodstock avenue, for Mrs. Peter Peter.

G. A. Steffe and wife of Grays Crossing have received definite word of the loss of two son-in-laws and one son, in the German armies, and a second son has been disabled, furloughed for recovery, again entered the service and was permanently disabled by the loss of an eye. The German government then gave him a life job as a civilian officer.

Friends and neighbors of Mr. and Mrs. E. P. Smith of 45th avenue and 92d street gave them a surprise on Monday evening, the occasion being in appreciation of their return to Lents, and their moving into their new home. Quite a little party gathered and made the evening merry with sociable good cheer.

## IDENTIFYING CRIMINALS.

The System Devised by Bertillon and the Way It is Worked.

Any malefactor who gets into the clutches of the law nowadays is a marked man for life if he runs up against the Bertillon system, which is a scientific method devised by M. Alphonse Bertillon for the identification of criminals. Bertillon was born in Paris in 1833. Certain measurements are taken from every convicted person, and these physical records of prisoners are kept on cards, any one of which can readily be found by an elaborate system of classification.

The measurements are taken on the left side of the subject, as they are less liable to alterations than are those on the right side. The determination of the convict's height is taken always at the same hours, because the stature may be as much as half an inch greater after a night's sleep than it is in the evening. The color of the iris of the eye and the characteristic lines made by the print of the finger are also recorded.

The following measurements are made: The length and width of head, the length of the left foot and of the middle and little fingers of the left hand; the stature of the whole body, as well as the length of its upper and lower portions; the span of the outstretched arms; the length and breadth of the left ear and the length of the left arm.

The system has been used in Paris since 1880 and is now employed by all important police departments in this country.—Exchange.

### Too Tired.

Frank lives in Eastern avenue. A few days ago his companion George caught his clothing on a picket fence. He was held fast, his feet a foot or two from the ground. He pleaded with Frank to release him or run for help, but Frank refused.

"Why don't you go and help George?" his mother inquired from the front porch.

"I'm just too tired," said Frank. "Yesterday I wanted him to 'shoo' my dog out of his yard, and he wouldn't do it 'cause he said he was tired. I'm just as tired as he was."—Indianapolis News.

### Proof Against Wasp Stings.

A Scottish naturalist in a paper on the habits of wasps tells how a black-bird will stand at the side of a hanging wasp's nest and deliberately tear it in pieces in order to get at the larvae, apparently undisturbed by the swarm of angry insects, whose vicious stings instantly put to flight the human curiosity seeker who ventures near to watch the demolition.

### Only a Beginning.

"She can't be as progressive as you say if she's taken up embroidering handkerchiefs."

"Why not?"

"Because that very seldom gets beyond the initial stage."—Baltimore American.

### Chinese Thieves.

In China thieves who are caught stealing are compelled to make a tour of the neighboring villages with a board bearing an account of their offense clamped around their necks.

Doing well depends upon doing completely.—Persian Proverb.

### Prevention of the Flight of Birds.

To prevent birds from flying without the barbarous and injurious system sometimes of cutting their wings it will be found sufficient to tie together with a thread three or four of the largest feathers of one wing. This destroys the balance, the wings do not act symmetrically, in the air, and flight is rendered impossible. Fowls, pigeons, etc., may be kept within bounds in this simple fashion.

### MOTHERS—

#### WATCH IRRITABLE CHILDREN!

That fever, paleness, grinding of teeth while asleep, and coated tongue are indications that your child has worms in its system. Kickapoo Worm Killer quickly gets rid of these parasites. It is perfectly safe for even the most delicate children. It is pleasant to take, has three effective medicinal qualities:—acts as a laxative, expels the worms, and tones up the system. Begin treatment today and eliminate the cause of irritability. 25c.

### A Medicine Chest For 25c.

In this chest you have an excellent remedy for Toothache, Bruises, Sprains, Stiff Neck, Backache, Neuralgia, Rheumatism and for most emergencies. One 25c. bottle of Sloan's Liniment does it all—this because these ailments are symptoms, not diseases, and are caused by congestion and inflammation. If you doubt, ask those who use Sloan's Liniment, or better still, buy a 25c. bottle and prove it. All Druggists.

DAINTY DANCE FROCK.

Dance frock of pale pink chiffon with full skirt consisting of yards and yards of this filmy material. The simple bodice with V neck and surplice drape is soft and pretty, favoring the Greek tendencies. A dainty sleeve cap is developed from three rows of plaited chiffon. Garlands of flowers and a satin girdle afford dainty trimming.

AN AUTUMN TAILLEUR.

Rather boyish in line, this suit of navy wool mohair, with full skirt and hip length coat, showing a semibelted effect. The collar buttons high in military fashion and a turnover velvet collar serves as smart trimming. The trim sailor of fawn silk and the white topped button boots afford a smart effect.

### SNAPSHOTS OF FASHION.

When the weather permits coat dresses of imitation fur fabrics will be seen in the shops.

Smartly designed costumes will also be made of this material, which when trimmed with real fur are as rich and handsome in effect as any fabric could possibly be.

Designs of material proffered by dressmakers are produced in lengths to suit their demands. The old cry of lack of co-operation by manufacturers is a dead issue for this season at least.

It is whispered that boots will lace up the front only for the coming season; also that pale colored leathers are decidedly de trop and that russet and tan shoes are to register the high water mark of smart style exclusiveness; also that these shoes, or boots, will be worn with every sort of frock and of every color, and, again, another firm reflects black cloth as the ashiest material one can select for wear this autumn, also the smartest.
