The last-named decorated for August twentieth with a profusion of colors, varying from white, pink, yellow, blue-shades, to deep velvet-red. The bouquets were gracefully joined by sprays of mock Wandering Jew, a feature furnished by Mr. Miller. The boys of the class who came loyally on the preceding afternoon to arrange the flowers are Oliver Clarke and Francis McGeorge.

When Cats Were Sacred. Scientists consider that the cat was introduced originally into Egypt from the south and that the credit of domesticating it belongs entirely to the inhabitants of that country. It is fortunate that the cat found its way into Europe at the time of the Roman supremacy, which, like other polytheistic systems, was in religious matters at least tolerant. Had it been confined to Egypt till the iconoclastic intrusion of the Moslems it might have been extirpated as a pagan object of worship. The Egyptians seem to have kept their cats in vast inclosures, and it is perhaps a trait of heredity which causes them to remain so faithful to a house in which they are domesticated. Whenever a house caught fire the chief care of the neighbors was to save the cats. The men and women might be burned in the ruins, but the cats were to be saved at all risks. When a cat died a natural death every inmate of the house shaved his eyebrows, and when a dog died they shaved all over.—Chambers' Journal.

Tennis as an American Game. Tennis is as old as the hills, basically, though it has undergone many changes for the better. It was played by the Greeks and Romans under the names of "sphairistikos" and "pila." As "paume" it is mentioned in the Arthurian romances and in the earlier records of the dark ages. In the fifteenth century it enjoyed great favor in France, and in England from the sixteenth century to the present time. As it seems to be more or less mixed up with about every sort of race, it may be called truly American, especially as we have produced it into our melting pot to boll and simmer and have seasoned it to our liking. But as an adopted pastime we can hardly call it our national game, as national seems to imply home grown or native. Yet we have developed tennis, speeded it up, perfected it. Americanized it so successfully that the game as we play it today typifies the restlessness, energy and competition of our national spirit.—Norman Harsell in Countrywide Magazine.

Korea's Diamond Mountain. Kongosan, known among foreigners by the name of Diamond mountain, is an extraordinary cluster of innumerable peaks in the east-central part of Korea. It is part of a great mountain range forming the backbone of the Korean peninsula and stands in the northeastern part of Kangwon province. The system is about fifty miles in circumference, occupying an area of more than twenty-five square miles. The peaks, reputed to number 12,000, are entirely formed of granite and tower high in the air, with dense forests on their sides and at their base. All the peaks are extremely rugged and grotesque in form, and it is impossible to scale many of them, as they rise nearly straight into the sky, while their slippery sides furnish no foothold.

Different Views. "What do you think of marriage?" asked the henpecked man, addressing the youthful bridegroom. "Bliss is no name for it!" said the young husband enthusiastically. "You are right," said the henpecked one gloomily. "Bliss is no name for it!"—London Mail.

THE WORLD'S CRISIS PERILOUS TIMES

Thoughtful People wonder What the Rapidly Transpiring Events Mean

The Bible is the key that unlocks the door of the future that we may see into the future and know what will follow Europe's war, and the perils that confronts the United States should interest American Citizens. Bible Lectures will be given each night except Saturday in the Lents S. D. A. Church, one block east of Oddfellows' Hall, beginning next Tuesday night. All are welcome to attend these lectures and should hear what men who have studied the situation have to say of the condition of our times from the Bible standpoint. Bring your family Bibles, pencil and paper and take notes. C. J. Cummings Virgil P. Hulse

KENDALL

The people living on the Oregon City road south of Kendall station, expressed satisfaction in the manner in which the road is to be paved. In the past the dust has been very bothersome. The road is to have a sixteen foot pavement for a distance of about two miles, beginning with the Clackamas county line (which is about two blocks south of Kendall Station) and ending two miles south.

The Battin school house has been given a new coat of paint, which greatly improves its appearance and also shows the right spirit on the part of the school board.

George Ham is spending the week visiting friends in the vicinity of Seilo and Jefferson.

Harvesting and base ball do not mix. At least that is the apparent reason for the discontinuation of the Sunday games on the local grounds. Several of the leading players, however, say the games will be resumed after the harvesting is completed.

The road work south of Kendall will be delayed a few days on account of a breakdown to some of the machinery. They had to send to San Francisco for repairs.

Next Friday, August 25, an entertainment will be given in the Battin school house under the auspices of the Ladies Aid. Weirs orchestra, vocal solos and literary readings are on the list of entertainments. No admission will be charged. Everybody cordially invited.

The open air dance at Tremont attracts a number of the younger people from this section each Saturday night.

J. P. Nelson's two eldest sons and daughter have come to Kendall for a brief stay. The latter have been running Mr. Nelson's farm in eastern Oregon.

O. B. Olsson, reported last week as having sold his residence informs us that that is not true, and that he is still living at the same place and will continue to do so as far as he knows.

Mr. and Mrs. E. Barrick are spending their vacation at Newport.

Mrs. W. Stone of Silverton visited at the home of Mr. and Mrs. S. E. Johnson last week.

The Ladies Aid will hold a tea, Thursday at the home of Mrs. B. T. Davis. Fred Dozier returned last week from South Beach, Newport.

Relatives from McMinnville spent Sunday afternoon with Mr. and Mrs. Farnsworth.

A number of friends and relatives gave a surprise party in honor of Johnie Brandt last Monday. The evening was enjoyed by all present.

CHERRYVILLE

What is the matter with this weather? Can you beat it? The little showers of the past two weeks did no harm but did a great deal of good.

Our local weather man says this kind of weather will extend into the fall and that we will have an unusually fine fall season.

Nobody need go hungry this year in the country as the crop of vegetables are very fine and of great abundance, and most all kinds of fruit are plentiful.

Dr. Botkin and wife have moved back on their ranch one-half mile east of the postoffice. The renter, J. J. Steenks, having drawn a valuable tract of land in the Colville Reservation is anxious to move on to it and will move off from the Botkin ranch soon.

Roy Shurum, who lives in a suburb of Portland, was visiting with his people last week. His wife is a daughter of Mrs. C. W. Miller. Mr. Shurum owns a fine wheat ranch near Pendleton, for which he gets \$7.00 an acre cash rent. He says his lease expires this year and he is offered \$12.00 for another term of five years. By a system of summer fallowing this land seems to be yielding better crops of wheat each returning year. Good wheat land is hard to buy at any price.

Senator Lane—our own Harry—made a great speech in the U. S. Senate recently, on the Child Labor Bill, in which the idea of working an immature child long hours in a smoky, dirty factory was monstrous. He said the great wealth of the country was in the rising generation, the potential fathers and mothers, and to kill them off or impair their usefulness in their early years was worse than folly, it was a crime so grievous that it cried to Heaven for revenge. The Senator took a fall also out of the manner of handling the Indians under the antiquated system. His description of the condition of the Black-foot Indians was frightful.

Prof. Dearborn of Bozeman, Montana, of the state Agricultural College is visiting with his family at the home of his former associate, Prof. Couper, one-half mile north of the postoffice. The Professor travelled with his high power auto across the country, stopping at Spokane, Seattle, Tacoma, Portland, etc. He says intelligent people almost everywhere concede the re-election of Wilson and say that after him Ford will be the next President if he is alive.

The President's course in the threatened railroad strike was not only right and just but it was eminently wise as any other course would have been suicidal to his political future. The railroad Presidents raise a great howl, as they have done in every instance when they were obliged to make any improvement in their management of their railroad systems. They say that the President's ruling spells ruin for them, as they can not run their roads on a paying basis if his plan is adopted. Rate! Let them cut out the water on their stocks and they can easily pay dividends on their actual physical value. Senator Norris of Nebraska said in the U. S. Senate last week that from 50 to 60 per cent of all railroads was water and mighty dirty water at that. Thos. Fortune Ryan of New York City said that fully 75 per cent of all railroad stock was water. In order to pay dividends in all this fictitious value railroad employees must work long hours far beyond their endurance, to the great danger of the travelling public. Government ownership of all railroads is in sight and the sooner the better for all concerned. There is scarcely a country in Europe but what owns and operates their railroad systems, and believe me, the Great United States, easily the foremost nation in the world, will be doing the same. Reactionaries and stand-patters might as well go away back and sit down because they are headed for the scrap heap, and are on their way by leaps and bounds. Justice travels with a leaden heel but it strikes with an iron hand.
