## Farm and Grange Notes

### Report of County Agent, S. B. Hall.

County Agricultural Agent, S. B. Hall, has submitted his report for the month of January which shows an almost unbelievable amount of work accomplished in the short space of four weeks. The value of this department to the county can hardly be estimated. Mr. Hall is evidently the right man for the place, being thoroughly alive and alert, improving every opportunity to increase his efficiency as well as to further the interests of the county in every way.

During the month he attended Farmers' Week at the O. A. C., also, a conference with the county agents of other counties and with specialists in the employ of the College Extension Service. During these conferences the work for the coming year was outlined and the dates scheduled for the various Extension specialists in this county. The remainder of the month has been spent in mapping out the work for this county in conformity with the outline as stated above, and starting the projects adopted at the Agricultural Council.

During the month two drainage demonstrations have been held, both well attended and successful. Numerous requests for assistance in drainage have been received and will be given attention. As a result of lime and fertilizer demonstrations held last year the increased interest aroused will be further stimulated and worked out in improved agricultural conditions.

Among the projects which will be undertaken this year are the following: Better seeds. The county agent is making use of every avenue to urge the use of seeds of known purity and germination. Farm record project. A definite campaign has been launched which is aimed to assist farmers who desire to keep an accurate account of their yearly business. Farm Loan Associations. No active work has been done along this line, but the county office is prepared as interest increases to effect branch organizations. Industrial Club work. With the co-operation of W. A. Barr, of the O. A. C., two Boys' Dairy Record Keeping Clubs were formed this month, one in the Gresham school with a membership of 10, and one in the Orient school with a membership of 14. Seven schools were visited which already have industrial clubs in operation and greater interest aroused. Dissemination of information, marketing and rodent control are other projects which are being actively worked.

In addition to the above two pruning demonstrations were held which were well attended, one of them being an all-day affair with W. S. Brown, Horticultural Specialist of the O. A. C. present and 45 farmers in attendance. One balanced ration for dairy cows has been prepared; one pure bred dairy bull was

### Land Open to Homestead Entry.

The Secretary of the Interior announces the opening to entry on March 6, at 9 o'clock a. m., of approximately 1,300 acres in the second unit of the west extension of the Umatilla, Oregon, reclamation project.

Persons desiring to acquire any of said public land must execute a homestead application subject to the provisions of the reclamation law which, with the required fees and commissions, accompanied by a certificate of the Project Manager at Hermiston as to the filing of water right applications and payment of water right charges, may be presented to the proper local land office, either La Grande or Dalles, Oregon, in person, by mail, or otherwise, within the period of five days prior to the opening, to-wit: on and from March 1, 1917, to and including 9 o'clock a. m., March 6, 1917.

Where there is more than one application for the same land a drawing will be held to determine the successful applicant. Unsuccessful entrymen will be permitted to amend their filings and apply same to other farm units which have not been entered.

The building charge is \$92 per acre, 5 per cent of which must be deposited with the Project Manager at Hermiston, Oregon, before application for entry will be received. The balance is payable in fifteen additional annual installments, the first of which will be payable December 1 of the fifth calendar year after the entry. The first five of such installments will each be five per cent of the construction charge, and the last ten installments each seven per cent.

The Umatilla Project includes approximately 36,000 acres in Umatilla and Monroe counties, and is traversed by the O. W. R. & N., and N. P. Railways. A portion of the project lies on the south bank of the Columbia River, which affords water transportation.

The lands of the project are rolling in character and the soils are sandy loams. Climatically the region is adapted to the growing of alfalfa, fruits, berries and vegetables. The average value of all irrigated crops on the project in 1915 was \$29 per acre. Farm units average about 40 acres each, the irrigation of which is provided for by the irrigation system recently completed.

A DEPARTMENT CONDUCTED BY OUR SPECIAL CORRESPONDENTS.

### Cherryville.

(Received too late for last issue.)

Can you beat this weather?  
St. Valentine's day was all that loving hearts could wish.

Frank Stone returned from the hospital last week, where he had been taken for a surgical operation. It was decided however, that his condition would not admit of an operation. Little hope is held out for his recovery.

Fay Shank left the first of the week for Astoria, where he has secured a position with the bridge gang of the O. W. R. & N.

Mrs. Shank went to Vancouver last Saturday to attend a reunion of the Patey family.

The people of this vicinity, under the direction of Prof. Cooper, got busy last week and put in a plank crossing over the road at the Postoffice and repaired the sidewalk across the swamp to the Postoffice. This is a great improvement, making it possible for people to go dry shod without difficulty.

The deputy game warden from Dover made an unsuccessful raid on this place last week. Some of the incidents in connection with his visit were more or less amusing. He visited and searched the hotel for evidences of venison. Mrs. Freil informed him that she had some "dear" meat the night before, in fact it was the "dearest" she had ever purchased and wished he would get after the fellow who was responsible for its being "dear." Mr. Freil Sr., refused him admittance, claiming his papers were not made out correctly, but afterward showed him a very fine otter skin which his son had caught, but explained that he had a license for hunting, fishing and trapping. The game warden then searched the premises of Geo. Odell, but found nothing as George has neither gun or dog and had not hunted or trapped for the past four years. However, Mr. Kitzmiller was within his rights and was trying to do his duty and deserves no censure.

Prof. Zimlro, employed by the State of Washington, to experiment with logged-off land, has discovered a process which, by means of a retort he is able to extract creosote, turpentine,

purchased as a result of the influence of this office; one day was spent investigating the contents of a seed potato warehouse seeking for traces of disease; tentative arrangements have been made for tree-grafting demonstration.

As a whole the work has started out exceptionally well and people are taking an active interest in the office which is gratifying. Hearty and active support is being received from several sections of the county.

### Bellrose-Gilbert.

Mrs. N. Maybee intends moving into the city on the 24th as she has rented her place on Park Drive and Gates road for one year to Mr. E. Peterson. The best wishes of the people of Bellrose go with her.

The pulpit at Bennett Chapel was ably filled by Rev. Jasper of Lents last Sunday. All were pleased and appreciated his visit very much indeed.

The Ladies Needlecraft was to meet at the home of Mrs. Swabel on the 20th inst., but was prevented on account of the snow storm.

Mrs. C. H. Bateman leaves this vicinity on the 27th inst., for a long visit with her sister at Duluth, Minn.

Mrs. M. V. Bristow, who is visiting with relatives in Kentucky is reported splendidly improving in health. Her many friends here will rejoice with her.

Mrs. Dick made a short trip to Estacada last week.

A number of friends surprised Mrs. R. Henderson on Saturday evening the 17th inst. Mrs. Henderson has been a "shut in" over a year. Mrs. C. H. Bateman read the following original poem at Mrs. Henderson's surprise:

The plot had been hatched in the gloaming,  
And steadily all the week  
The road had been hot and steaming  
From the tramp of many feet.

For the "bunch" was bent on pleasure,  
And pleasure there must be—  
Brought into the life of our shut-in friend,  
The sage of the company.

### Don't Blame the Horse

It's more than likely he can't help stumbling or calking himself. You'd stumble, too, if you wore misfit shoes

**We Fit the Shoe to the Foot**

Some smiths fit the foot to the shoe—which may be all right for the shoe, but **ROUGH ON THE FOOT**

Try us on that stumbling horse.
