LENTS NEEDS BETTER FIRE PROTECTION

As a part of the city of Portland, the Mt. Scott district needs and should have, without delay, better protection from fire. A paid station should be installed, and will be installed if the men and women of the district demand it.

Do not let the fire chiefs frighten you by the suggestion that the adoption of the two-platoon system will prevent the establishment of a paid station. It will not. On the other hand, if the people express themselves clearly in favor of efficiency, the city authorities will see to it that needed improvements be made.

The readers of The Herald should aid us in the work of improving the fire service, now. Then go after the station, and get it.
