YOUR

Before preparing fruit make sirup (three pounds nine ounces sugar to one gallon of water or five pounds, eight ounces sugar to one gallon of water), allowing about one cupful of water for each quart jar. Put in one cracked peach pit for every quart of strup. Boll strup for five minutes. Strained honey or other sirups can be used in place of a part of the sirup isually required.

Sort the fruits, using firm, sound, uniform peaches for canning and putting aside the soft broken ones for jam. Peeling may be done by immersing in boiling water about one. minute or until skins slip easily. Remove, plunge for a minute into cold vater, and slip off the skins. Cut into halves and pack at once in previously bolled jars, placing the halves in overlapping layers, the concave surface of each half being downward and the blossom end facing the glass. Fill each jar with hot sirup and paddle carefully to remove air bubbles. Partially, seal jars. Boil (process) quart jars in a water bath for 20 minutes and half gallons 35 minutes. When thoroughly cold test jars for leaks. Store in s cool, dark, dry place.

Firm, perfect peaches may be floated in boiling water for about 20 seconds after being peeled. They are then cut in halves, seeds removed, and packed as indicated above. Peaches floated in this manner are made more flexible and pack to better advantage. They also become mellow, absorb more sirup and are finer in flavor .- United States Department of Agriculture.

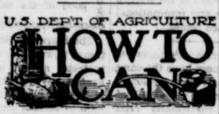

**PEPPERS** 

The best sweet peppers for canning are the Spanish varieties known as pimentos. The fruit of these peppers. has very thick fresh, tough skin, and is comparatively smooth and free from ridges. The bell peppers are not suitable varieties for canning. Peppers should be ripe, sound, and free from bruises. Sort, using the whole peppers for canning and small or broken peppers for products such as sauces, soups, chutneys, and Dixle relish. Prein a hot oven from six to eight minutes being careful not to allow them to scorch. Peel, cut out stem, remove seeds, and pack dry in flattened layers. No water or seasoning is used in the preparation of these peppers; the rocessing brings out a thick liquor introduced to the firing squad.

which almost covers them in the previ- | U.S. DEP'T OF AGRICULTURE ously boiled fars. Partially seal jars. sterflize (process by boiling) pint jars for 30 minutes. Cool and test for

When a steam-pressure canner is used, process pints ten minutes under an eight-pound steam pressure.--United States Department of Agriculture.

Figs for canning should be sound and firm. Sprinkle one cupful of soda over six quarts of figs and add one gallon of boiling water. Allow the figs to stand in the soda bath for five minutes. Drain and rinse thoroughly, Bring two quarts of sirup, made by using three pounds and nine ounces sugar to one gallon of water, to boiling and add the well-drained figs. If desired the amount of sugar may be reduced, but it is not advisable to attempt the canning of figs without any sugar at all.

Allow the fruit to boil in the sirup for one hour. Place the fruit carefully in the jars and then fill to overflowing with the sirup. Partially seal jars, Boll (process) quart jars for 30 minutes in water bath. Seal. When cold test jars for leaks. Store in a cool, dark, dry place.-United States Department of Agriculture.

BERRIES

For dewberries, blackberries, loganberries, buckleberries, raspberries and currants practically the same methods of canning may be used. The condition of the fruit will have much to do with the quality of the product. Ber- drink trade at home in the same time. ries should be gathered in shallow trays or baskets and not in deep vessels which allow them to be bruised and crushed. They should be uniformly ripe, sound, and as large as possi-

After the berries have been sorted ers and the Allies. carefully and washed lightly by placing in a colander and pouring water over them, instead of immersing them in water, pack as closely as possible without crushing. This can be done better by putting a few berries into the jar, pressing them gently into place, and proceeding layer by layer, than by nearly filling the jar loosely and then trying to press them down.

Fill jars full of fruit and cover with hot sirup. Boiling berry juice or other strups can be used instead of sugar sirup. Partially seal jars. Boll (process) pints ten minutes and quarts twelve minutes. Seal. When cold test for leaks and store in cool, dark, dry place.

The use of a sugar strup, made by boiling three pounds and nine ounces of sugar to one gallon of water and straining, adds to the flavor of the canned berries. The use of berry juice expressed from extra berries instead of water in making the sirup will give a richer color and flavor .-United States Department of Agricul-

## **NEWS ITEMS "DOWN THE LINE"**

Hollander residents of the Mt. Scott | Robbins, at Myrtle Park. Mr. Van

Notice-Please bring your news items, for the Mt. Scott Herald, to Mrs. Beldin, 4123 Sixty-fifth Street South East.

Born-July 18, to Mr. and Mrs. Mark Rennie, a son. Mrs. Rennie will be remembered as Miss Sybil Baker, queen of the 1915 Rose Carnival. Mr. and Mrs. Henry Baker of Sixtyfourth street are very proud of their grandson.

tained at cards, Saturday evening, the young people to t heir new home. Those present were: Mr. and Mrs. Whitney, Mr. and Mrs. Frank Doeleman, Mr. and Mrs. Clyde Grabell, and Miss Gertrude Taylor. Ice cream and cake were served.

C. H. Van Allen, is a new comer in he Mt. Scott district. He has entered the real estate office of W. day evening, July 30.
