The newly-weds, Mr. and Mrs. Tenewick returned from their wedding trip on the mountain trails to Jefferson park Saturday. They camped at Jefferson Park for a week. This park is delightfully located at the foot of the mountain and is a plateau nearly a mile long and about a half mile wide. It is covered with an abundance of grass and abounds with innumerable wild flowers, mostly Indian paint bushes and blue lupine at this time of the year. They report an immense crop of huckleberries all over the mountains and fully a month earlier. They ascended Ollala Butte, which has an elevation of over 6000 feet and from its top counted 37 mountain lakes which abound in trout of which the largest is Eastern brook. A sheep herder said several of his fish lines had been broken by trout in Ollala lake.

## Conserve Your Eyesight

MANY people who take alarm at the first symptoms of other physical ailments, and hurry off to the doctor or dentist, fail to give second thought to the warning of distress occasioned by defective eyesight. This seems inexcusable in view of the easy access to the services of an eye specialist.

You may have the mistaken idea that your eyes are as strong and clear-sighted as they used to be, but you will perhaps be surprised as to the extent to which properly fitted glasses will improve your vision and help your appearance.

vineyard use, for use on the big grain ranches.

Behind the tractors will be pulled moldboard and disc plows, peg-tooth, spring-tooth and disc harrows, scrapers, land levelers and sub-soilers, virtually every kind of tractor drawn implement.

By the use of tractors as motive power, one person can now till from five to 20 times more land, can do very much more work where power is required on the farm and do it all much easier than could be done by the old methods.

Because of farm tractors and tractor implements men who thought they had passed the age of active labor and women are beginning to replace the men who have been called from the farm into war service.
