Librarian Recommends Reading of These Books

Miss Wil Hutchinson, librarian of the Arleta branch library, recommends these books as of especial interest at the present: "The Four Horsemen of the Apocalypse," by Vicente Ibanez; "The Magnificent Ambersons," by Booth Tarkington; "A Schoolnfaster of the Great City," by Angelo Patri; and "The New Revelation," by Sir Arthur, Conan Doyle. The Four Horsemen are Pestilence. War, Famine, and Death. "The Magnificent Ambersons" is a novel of American life during the big growing time of an American city. "A Schoolmaster of the Great City" is a story of a teacher with a vision. "The New Revelation" is a personal and compelling evidence of continuation of life hereafter.

IMPROVEMENT CLUB AT ARLETA WORKING FOR PAVED STREETS

County Asked to Pave 18-Foot Strip on Foster Road From Fiftysecond to Seventy-second.

Every Thursday evening at the auditorium of the Arleta Library, from now on, there will be a meeting of the local improvement club. This club has in mind the improving of Sixty-seventh street and the surrounding neighborhood, desiring a substantial surfacing of Sixty-seventh and a noticeable absence of tin cans and other rubbish. This club is actively furthered by Mesdames Fred Love and Fred Taylor. Last Friday evening, April 4, the committee on the improvement of Foster road met and read plans, specifications and estimates as follows: Sidewalk, 6 feet; parking, 10½ feet; paving, 60 feet; car tracks to be moved to the middle of the street; extent of paving, from Fifty-second street to Seventysecond street; cost, \$113,300. The money is proposed to be raised partly by district assessment and partly, it is hoped, by county appropriation.

The county is asked to pay for a strip 18 feet wide, which will cost about \$45,000. At a session this Friday evening,

April 11, the committee will meet again to receive the county's report on how much it will do.

The Portland Railway, Light & Power company is opposed to the" moving of the car track, but it is estimated that the assessment on the company as owner of property adjacent to the street would amount to a sum nearly three times as much as it would cost the company to move the tracks.
