

BABY DILLEY DIES FROM ACCIDENT

Little Kenneth George Dilley, the three-year-old son of Mr. and Mrs. George Dilley of 9301 Fifty-third avenue, died Wednesday morning at 11 o'clock as a result of severe burns caused when he accidentally fell into a tub of scalding water. The accident occurred Tuesday afternoon when the little fellow had been left alone for a few minutes on the back porch where the washing was being done. The tub of hot water was on the porch near the hydrant, and after getting a drink the baby evidently stepped backward and fell into the tub, causing deep burns on the lower part of the body and back. The baby was rushed to Good Samaritan hospital and everything known to medical science done to save his life, but the burns were too severe and he passed away Wednesday morning.

Mr. and Mrs. Dilley are well-known and highly esteemed in Lents and the sympathy of the community goes out to them in their great sorrow. Little Kenneth leaves his father and mother and two sisters to mourn his tragic death.

Funeral services will be held today (Friday) at 2 p. m. at Kenworthy's chapel, and interment will take place at Mt. Scott Park cemetery.

HANDSOME PARK AT FRANKLIN HIGH IS BELIEVED CERTAIN

One of the first official acts pertaining to establishing parks and playgrounds in the city by City Commissioner Pier will be a survey of sites. The measure for the establishing of additional parks and playgrounds was passed by the voters at the recent election by a large majority. These sites will be established, where possible, in close proximity to the public schools so as to afford plenty of playground for the school children. Seven acres in front of the Franklin high school will in all probability be converted into a handsome park, and the Albina, Peninsula and Irvington districts will also be assured of additional recreation beauty spots. The Irvington club has made a proposition to Commissioner Pier that if the city would take over the club's indebtedness of \$15,000 the city could have the property, and it is very likely Mr. Pier will accept the offer.

As soon as the city planning commission has made its final recommendation and report Mr. Pier will immediately proceed to notify the park bureau, which is now in his department, to make all necessary arrangements to clear off the grounds and put them in condition before the rainy season sets in.

By so doing Mr. Funk hopes to rectify any errors that may arise in the future.

Several items of interest were discussed and a good degree of interest shown. One special action taken was to pledge their support to the Endeavor paper published by the Y. M. committee and to give the money usually spent in the union for the paper. They also voted to raise money to buy new song books for the church. Martha Isler and Bertha Barker were appointed as leaders to divide the society into equal numbers and enter into a friendly contest to raise the money. After the business meeting a pleasant hour was spent in games and singing. GRESHAM CANNERY HAS BIG PAYROLL—BERRY CROP LARGE

The Gresham cannery is a busy place these days. There is a big rush on hand to put the fruit through its processes as fast as it is received. The warehouse is filling up with cans waiting shipment, while crates upon crates are being unloaded at the receiving room.

Ideal weather is making the fruit ripen fast. There is a shortage of hands, but so far, with every employe exerting every energy, all the fruit has been cared for in good time. Although unable to run full capacity, nevertheless 16,000 cans of fruit are produced daily, almost a hundred thousand cans a week. That means a payroll for labor alone amounting to \$2900 per week. The cannery pays out approximately \$25,000 a week for fruit — \$25,000 for the local fruit growers.

Mr. Fisher, the manager, said that this year the cannery is running at a disadvantage, but even so results are decidedly gratifying. For another year, provisions for ample help will be made early in the season and all other necessary arrangements will have been made before opening time.

He also predicts a great berry future for this locality, which of course means a big canning business. Transportation difficulties will eventually be overcome.

Raspberries are selling at \$300 per ton. The yield this year is much heavier than last year's, in some patches almost double. Blackcaps at 11 cents—over \$200 per ton—yielding in places four tons to the acre—over \$800 from one acre. Ten acres sounds like a fortune. That the prices are up to stay is assured. Land values will rise. A period of great prosperity has been opened.—Gresham Outlook.
