VULCANIZING

We Fix Your Tires to Last

How many times have you had tires fixed only to have them "give out" on the very first trip?

Our vulcanizing outfit enables us to fix blow-outs and weak spots in a way that usually makes them even stronger than the rest of the tire.

Poor repair work on tires is ultimately the most expensive. Unless the weak part is properly strengthened, there is likely to be another blow-out soon that may ruin the tire completely.

Just give us a trial and we will show you that our prices are low and that we can turn your work out quickly.
