## TONGUE TWISTERS

A current report is to the effect that one of the hospital tests to determine if a patient is intoxicated is to require him to pronounce the words "Methodist Episcopal." If the suspect can sound these words without much embarrassment he is presumed to be sober. That may be an effective test in certain hospitals, but a policeman who has handled men in various stages of inebriety for years tells us of another test word that he has used and regards as infallible. He says when a man has a stony stare and insists that his arrest is an outrage and wants to know if respectable citizens are to be subjected to such indignities in a free country and so on, if you will quietly ask him to pronounce the word "bitulthic" and he does so without making a mess of it you can safely turn him loose. The policeman says the best

they can usually do is to say "bitulth" and finish with a hiccup.—Salt Lake Herald.
