

## THE AMERICAN LEGION BACKS RED CROSS SALE

**Proceeds of Christmas Seals to be Used in Fighting the White Plague Throughout the State and Country.**

The American Legion, the newly formed organization composed of men who saw service overseas, has espoused the cause of the little Red Cross Christmas seal, which is to be sold by the hundreds of thousands from Dec. 1 to 20, the proceeds to be used in fighting the white plague throughout this country.

Throughout the United States the Legion Posts are placing themselves behind the campaign and already in Oregon at least two counties will handle the sale of the seals through the Legion, namely; Deschutes and Jefferson counties. Both of these counties as well as Harney county have been organized by Miss Mary Cronen. Miss Cronen is now devoting her time to work among the tuberculous soldiers of Oregon and is combining with her duties some organization work. Her overseas experience has placed her on common ground with the service men, who immediately rallied to her assistance in securing workers for the seal sale.

Counties organized for the seal sale during the past week by Floyd E. Dorris, field secretary of the association, include Klamath, Jackson, Josephine, Douglas, Lane and Coos. This week Mr. Dorris is organizing Linn, Marion, Polk and Yamhill counties.

As in years past the seal sale is to be handled in many places by the women's clubs and in several instances clubs have taken the chairmanship for entire counties. The booth sale in Portland from Dec. 6. to 20 will be a prominent feature of the sale, booths decorated with attractive posters and penants being placed in conspicuous places in public buildings and presided over by leaders in the various clubs.

## O. A. C. INVESTIGATORS TO WORK OUT PROBLEMS

**Will Co-operate With National Research Council in Aiding Farmers and Humanity in General.**

To make the conditions better for humanity is the object of the National research council which has asked the assistance of the scientists of the O. A. C. college in working out problems of practical value to farmers and others. Dr. W. F. Durand, Professor of mechanical engineering at Stanford university who represents the council, conferred with investigators at the college. He represented the council in Paris during the war as scientific attache to the American embassy.

The national council expects to be a clearing house for information, Doctor Durand told his hearers. General information will be available in regard to research work in progress. It will be ascertained not only just what work is now being done but what is being accomplished.

The council will also act as a service bureau for the government departments. It will be known what research workers are best qualified to handle definite problems. The council desires to be of aid to research workers by furnishing them all possible information relative to their individual problems.

Discoveries kept secret during war times are now being applied to practical purposes, according to Doctor Durand, who addressed a meeting of engineering students in the mechanical hall. The same principle that a year ago was used for detecting submarines is now being used for detecting icebergs and hidden rocks in ocean navigation.

During the war his duty was to investigate the secret scientific principles available for war purposes. In his address he explained several important discoveries, among them being methods of signaling.
