## Let us give you the REALISM TEST

You'll find yourself wondering who's singing—a real, living artist, or the New Edison. The sensation is quite extraordinary.

Not "just listening"

Come in and try the Realism Test—any time.

Don't come with the idea you will "just listen" to a phonograph.

The Realism Test is "hearing", —in a new and better way. It is "hearing" so keen, so sensitive, that you get the full effect of the New Edison's marvelous realism.

Endorsed by Psychologists

Distinguished psychologists from American universities tried the Realism Test for themselves. They declared it a really scientific way of listening to a phonograph.

Step in and try this test. See if

### The NEW EDISON

"The Phonograph with a Soul"

has realism for you. You can find out about the Budget Plan, too. It's the better business way of buying your New Edison.
