From present indications Oregon

 pamphlet has been reserved and reser-  
 vations close September 23.

The Oregon Bar association, in ses-

 modations may be improved to a de-

Owing to a clause in one of the  
 old game rulings numerous sportsmen  
 have been led to believe that open  
 season will be declared on quail some  
 time in 1920. State Game Warden  
 Burghdoff says that such is not the  
 case and he is explaining to all who  
 have inquired that the 1919 session  
 of the legislature passed a bill pro-  
 hibiting hunting for these birds and only  
 legislative action can reopen the sea-  
 son.

That the taxpayers of Oregon next  
 year will be confronted with a tax  
 levy far in excess of any in the history  
 of the state unless the legislature  
 curbs the demand for appropriations  
 was the opinion expressed by state of-  
 ficials who have received intimations  
 of what may be expected. Besides a  
 threatened increase of 15 per cent in  
 the cost of conducting the state insti-  
 tutions for the biennium starting Jan-  
 uary 1, 1921, which will add approxi-  
 mately \$248,000 to the appropriations  
 authorized at the beginning of the  
 present biennium, several of the state  
 departments now report funds about  
 exhausted and probably will look to  
 the state emergency board for finan-  
 cial relief.

"Like the Green Bay Tree."  
 Weeds, which have been called  
 "plants whose virtues have not yet  
 been discovered," are extraordinarily  
 prolific in producing seeds. From a  
 single large purslane plant, as many  
 as 1,250,000 seeds may be obtained. A  
 thistle will produce anything between  
 100,000 and 200,000, and the charlock  
 200,000; while the shepherd's purse  
 will content itself with a modest 50,-  
 000! Many seeds retain their power  
 of germination for from 15 to 30  
 years, included amongst these being  
 the dock, chickweed and shepherd's  
 purse. Have you ever thought of the  
 number of grains contained in one  
 pound of wild oats? We may put it  
 approximately at 25,000. But if you  
 want the same weight in plantain or  
 charlock seeds, you will require 1,900,-  
 000 and 220,000 respectively.

**X-Ray Defeats Criminals.**  
 A new development in X-ray pho-  
 tography has provided an improved  
 method of taking the finger prints of  
 criminals. At a demonstration at the  
 Royal Institution, London, a radio-  
 graph on the screen showed the net-  
 work of the skin, brought out with  
 extraordinary detail. Clever crim-  
 inals can sometimes smudge their  
 finger-prints under the existing meth-  
 ods, but they will be defeated by the  
 new X-ray photographs.

**Fir Trees.**  
 The balsam fir tree is easily distin-  
 guished from the spruce, as its leaves  
 are not only somewhat larger and  
 broader than those of the latter tree,  
 but they lie flat and do not grow  
 around the stem.
