**"The Phonograph with a Soul"**

**WON'T you, too, join Mr. Edison's great research, and make the Mood-Change Experiment? Mr. Edison is studying the effects of music on the minds and moods of men.**

Look at the Mood-Change Chart which Wm. J. Burns, the famous detective, filled out. It shows how music affects a mind that is trained to cold analysis.

Mr. Burns came with his mind absorbed by puzzling problems. He asked for soothing music. The New Edison RE-CREATED several selections. "Traumerel" changed his mood to carefree. "Alice Blue-Gown" changed his mood from carefree to gay.

What kind of music changes your mood from serious to carefree? from worried to composed? from one mental state to another?

Mr. Edison has devised the Mood-Change Chart so that you can answer these questions for him. It has been endorsed by leading psychologists. It makes a fascinating pastime,—more enjoyable than the Ouija Board.

The Mood-Change Chart which you fill out will go to Mr. Edison's Laboratory; where it will be studied along with others, —and the great problem, what music can do for you, will finally be solved.

Help Mr. Edison get a full quota of charts from this town. Get your friends to fill out Mood-Change Charts. Give a "Mood-Change Party." Remember, we gladly supply everything you need to conduct the tests.
