#### ONE BIG FISH THAT DIDN'T GET AWAY

Those who passed by the Phoenix Pharmacy on Foster Road at Kern Park Monday, were likely to believe, as the Herald man at first did, that John R. Leach had entered the fish business. Reposing in the show win-dow was one of the nicest looking salmon the Herald man has seen in a long while. Upon inquiry it proved to have been the catch of C. H. Buckley of the 67th street fire station. Mr. Buckley captured the big Chi-nook in the Willamette Sunday while angling near Jennings Lodge. It was his fourth of the season and

## GUN PLAY IN CARD GAME

**RESULTS IN THREE ARRESTS** 

Police officials are inclined to frown on the wild and wooly west method of settling disputes over card games with a "gat" and as a result T. X. Johnson, H. J. Murphy and John Thornton were sent to the city jail late last week on a charge of be-

ig drunk and disorderly. The three men were playing cards in a house on Foster Road near Kern Park when Johnson decided he was getting the worst of it. He left and shortly after reappeared with a shot-gun, which it is said he discharged in the air to intimidate his opponents. The plan failed. Instead they all rushed him and a free-for-all fight started, in which Johnson got the worst of it. The police inspectors gave the trio a free ride to the jail.

### "The Phonograph with a Soul"

THOMAS A. EDISON invented the New Edison. And in the shadow of beautiful Llewelyn Park, Orange, N. J., he built and equipped the finest, most modern phonograph laboratories in the world. There he makes the New Edison and guards. its quality with zealous attention.

Think a moment! What other phonograph or talking machine is made, protected and sponsored by its inventor by an Edison?

Mr. Edison spent three millions of dollars in research work to perfect the New Edison. Then, to prove its perfect realism, he stood the New Edison side by side with the living

artist and matched its voice with the actual performance of the living artist. No one was able to detect any difference between the two. The New Edison has stood this amazing test over five thousand times before more than five million people.

Again we ask you to think a moment. What other phonograph or talking machine can sustain this test of direct comparison with living artists?
