

MT. SCOTT CELEBRATION
(Continued from Page One.)
week to the one turning in the largest number of coupons Wednesday night and \$5 to the one turning in the largest number of subscriptions as above. Remember also, that for every subscription turned in you also secure an additional 50 cents commission. So get busy and earn that vacation money in this last opportunity.
The date for the payment of prize money has been set for Saturday, July 15, after 1 o'clock.

Come out and dance every Saturday night with the crowds at Cedarville Park, at Linneman Junction. Four-piece music; dancing 8:30 p. m. to 12:30 a. m. 14-1f

A wave of sickness is expected to engulf the country when the brewers get down to manufacturing authorized beer with a kick for purely medicinal purposes.

A new continent is said to have been discovered in the antarctic regions in which no booze has ever been made or sold. It is uninhabited.

Gossip creates a multitude of sins that do not exist.

Never boast of the fact that you are without an enemy in the world. It requires either brains or imbecility to inspire wrath.

Not all men squander their hard-earned money. They don't earn it.

Dear old congress is just itching to perpetrate another national joke. It wants to investigate war contracts.

Some people wipe out their old debts by converting them into newer and larger ones.

Don't "duck" at a flash of lightning. The bolt you see has spent its force.

WOMAN'S LOVE DEMANDS ALL
Can Never Be Satisfied With Anything Less Than Absolute Dominion Over One Man.

What every woman wants more than anything else in the world is absolute dominion over one man. There is a peculiarly vampish trend in feminine love which takes the form of demanding entire possession of the creature upon whom the affections have been fastened.

Every woman wants to feel that, no matter what his occupation—be it the most engrossing business or merely a game of golf—she is ever the compelling note at the back of her man's head. He must not forget her for a single instant, and he must be regretfully conscious that nothing is quite satisfactory, lacking the saving grace of her presence. And she requires continually to be assured of this. She believes that in hoarding her perpetual recollection he holds a talisman rendering him immune from the attractions or blandishments of all other women.

It is difficult for the feminine mentality to grasp the curious power of detachment of the masculine. A woman cannot comprehend, much less sympathize with, that trait by which a man can divest himself completely of any thought of her while absorbed in something else.

A man's mind—and this particularly refers to the man of many serious interests—is like a number of compartments, each sealed from the other and docketed as to contents. While he is in one, he shuts out everything pertaining to any other.

A woman has not this capability of detachment. Whether she is playing bridge or apparently obsessed with

some knotty domestic detail, she is always subconsciously aware of the one.

The retentive quality is the prevailing characteristic of woman. It is at once her greatest strength and her greatest weakness—she cannot bear to let go. If she sees the flame of a love on the wane she tries frantically to restore it to its full force. A man faced with the same contingency is apt to be more resigned—or brutal—and makes haste to finish completely the cooling affection.

A man likes to do a thing, have done with it, and consign all memory to oblivion—to wipe the slate clean and be ready for something new.—May Isabel Fick in the Continental Edition of the London Daily Mail.

Succeeds in Molding Basalt.

The common volcanic rock known as basalt cannot be easily shaped with chisel and hammer, but Dr. Ribbe, a French experimenter, claims much success for his method of shaping by molding after it has been melted at about 1,500 degrees Centigrade. His first product was a glassy substance, which he has since been able to change to the crystalline structure of the original rock by a devitrifying process. The rock which has been melted and molded is found to be superior to the natural basalt in resistance to scratching and wear, and it proves to be especially desirable for such purposes as paving, curbstones and stairs. It can be shaped with great smoothness and exactness. As the material is not attacked by acids, it is suitable for vats for chemical use; and it is also an excellent electrical insulator, and a useful substance for firmly fixing metallic posts or other fittings in place by using as a hot paste.

As He Looked to James.
When three-year-old James' mother asked him what he did with the penny she gave him he replied: "I gave it to the monkey." His mother asked him what the monkey said; "Why he gave it to his father that played the organ."

When a fellow is cock sure he is right it is often easy to convince him he is wrong.

All Work Guaranteed. Repairing a Specialty.

During the closing days of the 1921 school year, the pupils of Lents school presented the operetta, "Clarinda, or the Rose and the Pearl". It was greatly enjoyed by the large audience who attended and the teachers who directed the production received many compliments upon the work of the children. The Portland Telegram published the pictures below and the Herald printed copies on plate paper for distribution. We were requested to use the photos in our issues but at the time our columns were crowded. Fourth of July week being a dull advertising period, we this week find room to comply with the requests. Additional copies of this paper may be had for mailing purposes by those desiring them by applying at the Herald office.

Mr. Car Owner
Inspecting and Repairing
Step in as you drive by our garage.
Let us listen to your engine for a minute or two. If there is anything wrong we can detect it.
Prompt correction is less expensive than later repairs.
You will actually save money on the upkeep of your car by keeping in touch with this garage.

Vulcanizing and Reinforcing
When we vulcanize a tube it does not give away again in the same place. The vulcanizing portion is stronger than the rest of the tube.
If your casing is weak we can reinforce it and give it much longer life.
