Volume XVI.

PORT ORFORD, OREGON, WEDNESDAY, MARCH 18, 1908.

Number 50

CITATION.

In the County Court of the State of Oregon, for the County of Curry.

In the matter of the Estate of Joseph Hare, deceased.

To sisters L. England, names and ages unknown, and to all heirs known and unknown of Joseph Hare, deceased, Greeting:

In the name of the State of Oregon, You are hereby cited and required to appear in the County Court of the State of Oregon, for the County of Curry in the Courtroom thereof, at Gold Beach, Curry County, Ore., on Monday, the 6th day of January, 1908, at 10 o'clock in the forenoon of that day then and there to show cause, if any you have, or if any exist, why said Court should not make an order directing the Administrator of the above named Estate, to sell the real property belonging to said Estate, to-wit:

The W¹/₄ of SW¹/₄ of Sec. 28 & N¹/₄ of NW¹/₄ of Sec. 33, Tp. 30 S., R. 14 West, containing 160 acres and situated in Curry County, State of Oregon, to pay the claims and charges now outstanding against said Estate.

This citation is served by publication thereof, by virtue of an order of Hon. E. A. Bailey, County Judge of Curry County, Oregon.

The date of the first publication of this Citation is December 11th, 1908.

H. B. SMITH, Administrator of the Estate of Joseph Hare, deceased.

Thousands Have Kidney Trouble and Don't Know It.

How To Find Out.

Fill a bottle of common glass with water and let it stand twenty-four hours; a sediment or settling indicates an unhealthy condition of the kidneys; if it stains your linen it is evidence of kidney trouble; too frequent desire to pass it or pain in the back is also convincing proof that the kidneys and bladder are out of order.

What to Do.

There is comfort in the knowledge so often expressed, that Dr. Kilmer's Swamp-Root, the great kidney remedy fulfills every wish in curing rheumatism, pain in the back, kidneys, liver, bladder and every part of the urinary passage. It corrects inability to hold water and scalding pain in passing it, or bad effects following use of liquor, wine or beer, and overcomes that unpleasant necessity of being compelled to go often during the day, and to get up many times during the night. The mild and the extraordinary effect of Swamp-Root is soon realized. It stands the highest for its wonderful cures of the most distressing cases. If you need a medicine you should have the best. Sold by druggists in 50c. and \$1. sizes. You may have a sample bottle of this wonderful discovery and a book that tells you more about it, both sent absolutely free by mail.

Address Dr. Kilmer & Co., Binghamton, N. Y. When writing mention reading this generous offer in this paper.

On all the islands of the sea, and at all the shore spots to which sea birds resort, the work of slaughter is being carried on quite relentlessly. Largely for humane reasons, and incidentally in the interest of science, the National Association of Audubon Societies is engaged in the work of trying to save the sea birds from extermination. Several species are being systematically destroyed for their feathers. Fashion, of course, does not care whether these beautiful creatures are exterminated or not. The scarcer they become, up to the point of their actual disappearance, the greater are the prices realized for their feathers, and the deeper the joy taken by the wearer of the ornament. And when at last they are all gone—why, there will be another of God's creatures to put through the same process.

This association has 40 wardens guarding some of the key colonies of these sea birds. This may guarantee them from total destruction at present, but does not insure the maintenance of the birds of the species in question in such numbers as to render their preservation sure. Instead of 40 wardens the society ought to have

ROYAL Baking Powder

ABSOLUTELY PURE

Healthful cream of tartar, derived solely from grapes, refined to absolute purity, is the active principle of every pound of Royal Baking Powder.

Hence it is that Royal Baking Powder renders the food remarkable both for its fine flavor and healthfulness.

No alum, no phosphate—which are the principal elements of the so-called cheap baking powders, and which are derived from bones, rock and sulphuric acid.

FIVE HUNDRED WHALES DIE

They Go Ashore in an Inlet in the Straits of Magellan and Perish.

"I saw 500 whales ashore at one time in the Straits of Magellan," said Capt. James Heylet, of the British navy, at the Union depot, reports the Milwaukee Free Press.

"Some years ago my ship lay off Pearl inlet, a small creek a mile and a half long, opening into Port Salvador which in turn opens into the South Atlantic by a very narrow opening. One morning a whirlwind appeared to be approaching over the water in the Bay of San Salvador, and soon this was made out to be an enormous school of whales, so thick that they seemed to be jostling each other. Nothing was seen but fins and tails and the water in foam all around.

"This was in a flowing tide, and they came into the inlet itself describing sort of cyclical curves until the inshore part of the squadron took on a kelp reef. Then a sudden pause seemed to seize them all, and the unfortunate animals went up the inlet full speed, with the sea boiling in upon them, and they piled up in hundreds on the beach. Then, as there was a rising tide, they got off again, but only to charge the opposite beach, and this was continued till the following tide and loss of strength left them high and dry all round the dreary bay.

"Very few, old or young, lived more than a quarter of an hour after their final stranding. Some died quietly, others beat the sand and water with their tails, dyeing the water with their blood. By evening, after that tide had ebbed, there were only five whales about out of the more than 500 that had come into the inlet so majestically that morning.

"Next day only three were to be seen. They swam around for a while and then, as if disdaining to live when all their companions were dead, they made straight for the beach, and in a few minutes had passed out of existence. The whales were from four to thirty feet long, the four-foot whales being just born.

"Next day only three were to be seen. They swam around for a while and then, as if disdaining to live when all their companions were dead, they made straight for the beach, and in a few minutes had passed out of existence. The whales were from four to thirty feet long, the four-foot whales being just born.

SAVING THE SEA BIRDS.

Relentless Slaughter Has Exterminated Many Species in the Pacific Islands.

No one knows better than the sailor or the shore hunter how the sea birds may be exterminated, and no one better than the Indian or the trapper of the deep woods, how sometimes the wildest and most abundant species may disappear. The wonderful great auk, or garfowl, has, within the memory of men now living, been hunted from the face of the earth, so that its skin and its eggs are now worth their weight in gold, says the New York Mail. Practically the beautiful wild pigeon, which once darkened the skies with its vast, cloud-like flight, has met the same fate, though small colonies of it in remote spots undoubtedly still exist. The eastern pinnated grouse is almost practically extinct. In the Chatham islands, alone, in the Pacific, 17 species of birds have become extinct.

On all the islands of the sea, and at all the shore spots to which sea birds resort, the work of slaughter is being carried on quite relentlessly. Largely for humane reasons, and incidentally in the interest of science, the National Association of Audubon Societies is engaged in the work of trying to save the sea birds from extermination. Several species are being systematically destroyed for their feathers. Fashion, of course, does not care whether these beautiful creatures are exterminated or not. The scarcer they become, up to the point of their actual disappearance, the greater are the prices realized for their feathers, and the deeper the joy taken by the wearer of the ornament. And when at last they are all gone—why, there will be another of God's creatures to put through the same process.

This association has 40 wardens guarding some of the key colonies of these sea birds. This may guarantee them from total destruction at present, but does not insure the maintenance of the birds of the species in question in such numbers as to render their preservation sure.
