The little daughter of Thomas Lane, came down recently with her grandmother, Mrs. Lindberg, where she is the light of the household and the boss of all, as she should be.

John Fromm was in town yesterday on business, and says that four of his family have had the Scarlet fever, Johnny being the last case. Two of his children were very ill, and he does not consider it a mild form.

John H. Tyler, optician, accompanied by his wife, was in Port Orford Monday night greeting his many friends. He went up to his father's Tuesday, and will remain in Curry for some months practicing his profession.

Thos. Cornwall was in town Monday for the first time in a couple of years. He has never recovered from the effects of a fall he received several years ago while prospecting on Sixes, but is able to do the chores and light garden work.

The report that the steamer President was on fire off Coos Bay last week was untrue, and no doubt Capt. Magee, of the tug Columbia, who made a vigilant all night search would like to put his sleep producing hand upon the liar who started it.

The body of W. J. Archibald, who disappeared while on a hunt about a month ago in the mountains near Gold Beach, was found last week not far from where he parted from his two companions. He had evidently died suddenly from heart trouble.

James Lane, F. Cook and Mr. Crow left here Thursday, well equipped for camping and prospecting on the head waters of Elk river. There is gold in that section, and there are a few good land locations. Thorough and systematic prospecting on the head of Elk river, especially on the North fork is almost sure to result in rich discoveries.

The worst Tornado that ever struck any part of our country, swept through portions of the lower states on the Mississippi last week, destroying millions of dollars worth of property and killing over 500 people and wounding over a thousand. Thousands of homes were destroyed, people by the tens of thousands are destitute, and our government and people are called upon for relief, which is being promptly sent. Who would not live on this coast, the favored spot of earth?

The first of May was ushered in by a furious storm from the South. There will be no Queens of May crowned in the Arcadian groves of the coast, unless the water nymphs will rise from the embrace of the McGuintys.

The changeable weather of the past ten days has ushered in an epidemic of severe colds and considerable sickness, though nothing serious. Sunday night the weather moderated, and the soft ozone-laden air of spring is making man and nature glad.

John R. Miller and wife and Miss Silecia Clarno arrived in Port Orford Saturday, and are visiting their relatives here. They will return to Coos bay in a week or so, but will not locate permanently until they have visited southern California and other places.

Hume, has purchased the bankrupt stock of groceries, etc., of the Russell Bros., lately closed out at North Bend. Bob Evans, it is said, has recovered sufficiently so that he will be able to lead the fleet in its entrance to San Francisco and during its maneuvers in the harbor. It will be the closing scene of splendor to his splendid services, and he will be retired on the 9th of May to rest laurel crowned.

The "hot day" of last week was 92 degrees at Coquille and at Chetco, but at Port Orford it was not hot enough to cause us to look at the thermometer. It was just comfortable here. If you want to escape both heat and cold, come to Port Orford and locate in the only "Coast Thermal Belt."

M. Doyle of Wedderburn, is circulating his petitions to enable him to get on the June ticket as Democratic candidate for Joint Representative for Coos and Curry. Mr. Doyle is an old "wheeler" in his party and will no doubt give his opponent a good race for the position.

Hon. H. M. Calk, Republican nominee for U. S. Senator, writes us that he expects to visit Curry during his canvass of the state. He won his nomination by a clean manly fight for Statement No. 1, and he will receive the glad hand from all the Republicans of this section, and from none a more cordial greeting than Fulton's stalwart friends.

A cold wave struck Grants Pass lately, freezing up their water pipes and no doubt doing much damage to fruit and gardens. Phenomenal weather has been the rule all over the United States during the past two weeks, and we should be thankful that we live in the most equable climate on earth, where tornadoes are unknown and ice has to be made artificially.

Church services will be held at Port Orford next Sunday May 10th both morning and evening. This will be my last regular appointment here, as the field has been divided and I will go to Langlois only. It is hoped that a man will soon be stationed at Port Orford and the territory south.
GEORGE H. ROACH.

High Pressure Days.

Men and women alike have to work incessantly with brain and hand to hold their own nowadays. Never were the demands of business, the wants of the family, the requirements of society, more numerous. The first effect of the pressure is to keep up with all these things is commonly seen in a weakened or debilitated condition of the nervous system, which results in dyspepsia, defective nutrition of both body and brain, and in extreme cases in complete nervous prostration. It is clearly seen that what is needed is what will sustain the system, give vigor and tone to the nerves, and keep the digestive and assimilative functions healthy and active. From personal knowledge, we can recommend Hood's Sarsaparilla for this purpose. It acts on all the vital organs, builds up the whole system, and fits men and women for these high-pressure days.

Some of the bona fide homesteaders on Hubbard's creek have combined and will prosecute those who filed timber applications on the land by perjury themselves in swearing that it was not fit for cultivation, uninhabited and without improvements. It did not matter what expense some of the homesteaders had been to, nor the fact that they were living and working on their claims, their rights were utterly disregarded. In one or two cases the timber locator has become scared and canceled his filings, and there are others who are getting nervous at their swearing at the Land Office, for which they see impending indictments.

Blanch, the five year old daughter of Mr. and Mrs. R. E. Cope, fell into the creek near their home last week and would have drowned but for the prompt action of her brother, Philip, who immediately summoned his father. The writer observed a boat recently completed on the dry dock at Harbor, with a ten horse power capacity. There were no questions asked concerning this craft. It might be such a thing that it will be utilized for the transportation of defeated candidates on their voyage up Salt river. Who knows?

Mr. and Mrs. Iver Hanseth, who recently sold their home near Harbor for \$5000, took their departure for their old home in Norway last Monday. Mr. Hanseth and his estimable wife were fine people and hospitable neighbors, and will be missed from our community. We wish them success on their long journey.

L. A. Taggart, the Seer of Jack's creek, unexcelled as a prophet even by Julius Caesar, predicts that the world is coming to an end in 1917. When asked what his grounds were for such a prediction, Mr. Taggart said: "I have been observing the sun lately with a moderately powerful telescope and find there is a crack or flaw in the solar orb. I reduced it to a mathematical calculation and found, according to my figures, that the world will come to an end May 7th, 1917."

Does Your Heart Beat

Yes. 100,000 times each day. Does it send out good blood or bad blood? You know, for good blood is good health; bad blood, bad health. And you know precisely what to take for bad blood—Ayer's Sarsaparilla. Doctors have endorsed it for 60 years.

The effect of malaria lasts a long time. You catch cold easily or become run-down because of the after effects of malaria. Strengthen yourself with Scott's Emulsion. It builds new blood and tones up your nervous system.
