Volume XVII.

PORT ORFORD, OREGON, WEDNESDAY, SEPTEMBER 23, 1908.

Number 24

WHEN a country becomes civilized it demands typewriters. When it becomes posted on comparative values it demands

### THE SMITH PREMIER TYPEWRITER

The fact that The Smith Premier Typewriter is used in every civilized country on the globe is not so important as the further fact that the demand increases year after year.

The reputation of The Smith Premier is world-wide. World-wide use has made it so.

THE SMITH PREMIER TYPEWRITER CO.,  
247 Stark St., Portland, Oregon.

## Dairyville Store.

ED. RACKLEFF, Prop'r  
(Successor to F. M. Langlois.)

KEEPS IN STOCK,  
GROCERIES, (the best only)  
DRY GOODS,

### CONTEST NOTICE.

DEPARTMENT OF THE INTERIOR,  
United States Land Office,  
Roseburg, Oregon, May 23, 1908.

A sufficient contest affidavit having been filed in this office by George A. Wells, contestant, against Homestead entry No. 9527, made August 18, 1906, for the NE 1/4, SE 1/4 NW 1/4, and NE 1/4 SW 1/4, Section 1, Township 32 S., Range 15 West, by Henry W. Towne Contestee, in which it is alleged that said Towne has been absent from the State of Oregon, and this land for at least six years; that he never made any improvements of any kind on said land; that said alleged absence was not due to his employment in the Army, Navy, or Marine Corps of the United States during any war; said parties are hereby notified to appear, respond, and offer evidence touching said allegation at 10 o'clock a. m. on July 28, 1908, before J. H. Upton, U. S. Commissioner, at his office in Langlois, Curry County, Oregon, at which final hearing will be held at 10 o'clock a. m. on August 7, 1908, before the Register and Receiver at the United States Land Office in Roseburg, Oregon.

The said contestant having, in a proper affidavit, filed May 22, 1908, set forth facts which show that after due diligence personal service of this notice can be made, it is hereby ordered and directed that such notice be given by due and proper publication.

### Business in Odd Shapes.

Under the law a silver dollar may be a grain and a half over weight or a "limit of variance" applies to all of our silver coins. In other words, they are not allowed to vary more than that much from standard. In the case of goldpieces, the limit is half a grain either way up to the mark, a variation of as much as one grain being permissible in the \$10 and \$20 pieces.

Whenever a fresh batch of dollars is turned out at the mint, samples are forwarded to the treasury at Washington, where they are put through a very curious process. Each dollar is first weighed on exquisitely delicate scales to make sure that it is heavy enough and yet not too heavy. Then it is passed between two steel rollers again and again until it is fattened out and transformed into a thin strip of silver—a sort of ribbon—a foot and a half long. Then it is put beneath a little machine provided with several small punches, by which hundreds of tiny disks are punched out of the metal strip.

New, the object of this performance is to obtain samples of metal from all parts of the dollar, inasmuch as it is conceivable that one portion might be richer in silver than another. The little disks are shuffled together, and a few of them, taken at random from the lot, are subjected to an assay. Thus the fineness of the material of the dollar is ascertained with absolute accuracy and, the weight having been already determined, the value and correctness of that coin are perfectly known.

The sample pieces having been found correct, it is inferred that the entire batch of dollars is all right—Saturday Evening Post.

### Natural Waters.

All natural waters contain a greater or less amount of mineral matter in solution. Rain water has the smallest percentage of solid impurities of any, and therefore it is taken as the standard variety of soft water.

The terms soft and hard, however, as applied to water are scientifically considered purely relative.

Water is usually reckoned to be "soft" when it contains less than one five-thousandth part of its weight of mineral ingredients and "hard" when it contains more than one four-thousandth.

Soft water has the property of easily forming a lather with soap and is therefore suitable for washing purposes, while hard water will only form a lather, and that imperfectly with considerable difficulty.

A mineral water has more than one two-thousandth of its weight of natural dissolved solids, and a medicinal water is a variety of mineral water containing a varying percentage of dissolved natural solid or gaseous drugs.

### Battered Side Up.

One of the stories which Levi Hatchins, the old time clockmaker of Concord, N. H., delighted to tell related to the youth of Daniel Webster.

"One day," said the old man, "while I was taking breakfast at the tavern kept by Daniel's father, Daniel and his brother Ezekiel, who were little boys with dirty faces and snarly hair, came to the table and asked me for bread and butter.

"I complied with their request, little thinking that they would become very distinguished men. Daniel dropped his piece of bread on the sandy floor, and the buttered side of course was down. He looked at it a moment, then picked it up and showed it to me, saying:

"What a pity! Please give me a piece of bread buttered on both sides; then if I let it fall one of the buttered sides will be up."

### THE TRAMP'S PARLOR CAR.

A Pre-empted Home From Which He Is Often Dislodged.

A casual observer might wonder why the rods bolted through the timbers at either end are placed under freight cars. They are not put there for boboos to ride on, but to stiffen the floor of the car. Sometimes there are four, two close together on each side, but more often there are six, separated by equal distances.

At the center, where the rods are ridden, there is often a room between them and the bottom of the car for a man to sit almost upright, though with his head bowed forward, but where there are six rods the hobos usually lie across them like a steak on a gridiron. While the train is moving slowly it is easy as a rule to drive him off by throwing coal or rocks at him. If it is going very fast, there is danger of killing him; and that is likely to get the brakeman in trouble (from ten years to life is customary).

There is one other way of removing a hobo from the rods under a freight, but the brakeman must be a man of steady nerve, quickness and physical strength; also he must know exactly where the hobo is before he comes off the top to get him. Drapping from the train a car or two ahead of the one under which the man is riding, the brakeman has time to brace himself before that car reaches him (the train should be moving only slowly); then he seizes the hobo by the coat collar or by his arms. The motion of the train does the rest, and the hobo is dropped on the ground.—Ladies Weekly.

### OFFICIAL DIRECTORY.

STATE AND DISTRICT OFFICERS:

U. S. Sen'ts—Jonathan Bourne Jr., of Portland and Chas. Fulton of Astoria.

Congressman, First District—Willis C. Hawley, of Salem.

Bernard Wilson, of " "  
Eugene White, of " "

BENJAMIN L. EDDY, Register.

### Thousands Have Kidney Trouble and Don't Know It.

How to Find Out.  
Fill a bottle or common glass with your water and let it stand twenty-four hours; a sediment or settling indicates an unhealthy condition of the kidneys; if it stains your glass it is evidence of kidney trouble; too frequent desire to pass it or pain in the back is also convincing proof that the kidneys and bladder are out of order.

What to Do.  
There is comfort in the knowledge as often expressed, that Dr. Kilmer's Swamp-Root, the great kidney remedy, fulfills every wish in curing rheumatism, pain in the back, kidney, liver, bladder and every part of the urinary passage. It cures every part of the urinary passage, it cures every part of the urinary passage, it cures every part of the urinary passage.
