## OFFICIAL DIRECTORY.

**STATE AND DISTRICT OFFICERS:**  
 U. S. Senator—Jonathan Porter Jr., of Portland and Geo. R. Chamberlain, of Salem.  
 Congressman, First District—Willis C. Hawley, of Salem.  
 Governor—Oswald West, Salem.  
 Secretary of State—Ben. W. Olcott, Salem.  
 State Treasurer—Thos. B. Kay, of Salem.  
 Supt. Public Instruction—L. A. Alderman, Salem.  
 State Printer—Willis Dentway, Salem.  
 Attorney General—A. M. Crawford, Salem.  
 Clerk State Land Board—O. G. Brown, Salem.  
 Joint Senator for Coos and Curry—E. A. Smith.  
 Joint Representative for Coos and Curry—S. F. Pease.  
 Judge, 2d Judicial District—J. W. Hamilton, Roseburg.  
 Prosecuting Attorney, 2d Judicial District—George M. Brown, Roseburg.  
 U. S. Commissioner—H. T. Stewart, Port Orford.

**COUNTY OFFICERS:**  
 County Judge—W. A. Wood, Gold Beach.  
 County Commissioners—D. Olegrove, Gold Beach; Geo. Linnowich, Langlois, Sheriff—C. H. Bailey, Gold Beach.  
 County Clerk—John E. Stannard, Gold Beach.  
 County Treasurer—Frank Gaultell, Wedderburn.  
 Assessor—Wm. Tolman, Harter.  
 School Supt.—Geo. W. Smith, Gold Beach.

**JURYS:**  
 Foreman—J. Coughlin, Gold Beach.  
 Jurors—Court meets fourth Monday in August of each year.  
 County Representative Court meets first Wednesday in January, April, July and September of each year.  
 Justice Court meets first Monday in each month.

**CLERKS:**  
 Sheriff—J. W. Bailey, Gold Beach.  
 County Clerk—John E. Stannard, Gold Beach.  
 County Treasurer—Frank Gaultell, Wedderburn.  
 Assessor—Wm. Tolman, Harter.  
 School Supt.—Geo. W. Smith, Gold Beach.

**INDUSTRIES OF PORT OXFORD:**  
 The members of the Bargainers' Society often find high prices in their search.

## A CARELESS CONSUL.

Who Way West Harts Come to Live in Position at Glasgow.

When Dr. Harts was named at Glasgow, he was seldom to be found in the London drawing rooms, where he was a general favorite, and substituted the consular business to assist him. One day while making one of his rare visits to Glasgow he crossed acquaintance with a stranger on the train. Each seemed fascinated by the other's personality, and time passed quickly. At last they reached the outskirts of a large city.

"What place is this?" inquired the stranger.

"I haven't the slightest idea," replied Harts, after looking out of the window.

A few minutes later the railway guard opened the door of the compartment and announced that they had arrived at Glasgow.

When Harts showed up at the consulate the next morning, the first person who advanced to greet him was the agreeable stranger, who introduced himself as a special agent of the home government sent to investigate charges of neglect of duty on the part of the consul.

The agent may have been affable, but he was lacking in a sense of humor, for he evidently called his government an account of the train incident, as Harts' statement was soon after repeated.

**Food and Character.**

One might almost say that the recipe for a happy home was what has been called a "harmful" diet. While it is not literally true that eating less makes a man of a man, yet it is true there is a large connection between it and character. Bloodthirsty, insatiable appetites are those that eat most largely meat, especially, whereas the gentle, unobtrusive, persistent ones are mostly vegetarians and fruit eaters.

While the controversy over vegetarianism is one for scientists to settle, even the student of us can afford to try for himself the advantages of a "harmful" diet. It is a most interesting experiment to see how acute and sensitive the sense of taste can become by avoiding food that has a strong taste.

It soon leaves the delicate sweet and salty taste and takes its own course through the body, who eats little amounts of fat, fish and few light meats, and is happy with biting bread. Simplicity of life can be as much a part of diet as of furniture or clothes—William Hayes in Good Housekeeping.

**Go to the cigar stand down stairs, and a fifteen cent cigar, keep a dollar and bring me the change."**

In a few minutes the visitor responded, puffing contentedly at a cigar, and handed the alderman 95 cents. Noticing a peculiar expression on the alderman's face, he withdrew the cigar from his lips long enough to inquire:

"Did you mean that the cigar was for you or me?"

"Get out of here!" was all the disgusted politician could say.

**The Little Garden.**

There is much comfort to be found in a garden. I have watched a poor woman at a little box of flowers at a window, growing radiant with happiness as each bud blossomed and smiled upon her gentle hand. Water your little garden and tend it well. A little love for sunlight, a little sympathy for rain, and the garden of the heart may bloom with beautiful deeds and fragrant thoughts. Though the beauty of the rose is brief, yet the perfume may be preserved, like the memory of a life, forever.—Schoolmaster.

**Food and Colds.**

A writer in The Lancet says: "Since I began to study diet I have been astonished at the number of cases of which I have heard, even of medical men, who by eating less and not so often have found that their susceptibility to colds has quite gone. Such facts as I have met with point to the conclusion that it is the system overcharged with the products of food which was not required and can act only as a poison to every organ in the body which is most susceptible to colds."

**Ground For Suspicion.**

"Mary," said the young man's mother, "it seemed to me you were very cold to John this morning."

"Yes," she replied, "I'm beginning to suspect him."

"The dear! You have no reason to, I'm sure."

"Haven't I? I dreamed last night that I saw him kissing another woman."—Philadelphia Press.

**The Bride.**

"Haven't I married you, Loretta?" asked the clergyman pleasantly of the young lady from Chicago who was about to be joined to the young man from Oklahoma.

"Only twice," she murmured coyly, and the ceremony went on.—Boston Post.

**Love at First Sight.**

His Dog—Are you certain that your mistress loves my master?

Her Dog—Why, it was love at first sight. She pushed me off the sofa to let him sit down.—Detroit Free Press.

In order to be in perfect health one must be temperate in eating. The meals should be regular. Regularity is one of the golden rules of a well ordered life.—Lancet Home Journal.

## MALARIA AND MOSQUITOES.

Disorder Reported to Appear in Human Where Those Banned Insects Cannot Be Found.

Since the now generally accepted theory that the germs of malaria are conveyed to human subjects by mosquitoes of a particular genus was first advanced there have been occasional reports of the appearance of the disorder where no representative of that group of insects could be found. In some instances, perhaps, the victims may have caught the disease while away from home. Still other explanations may be suggested without upsetting the theory just mentioned. It appears, however, that once in awhile the mystery is accounted for by imperfect observations. The miasma-maker is there, but is undetected. An interesting and significant confession is made in the Journal of Hygiene by Dr. John Cropper.

He says that in a previous article he stated that, though he had resided in Acre, Palestine, he had never been able to find a single Anopheles. Recently, however, his successor, Dr. Gould, having under his care two native boys with malaria, found Anopheles in their room. It is uncertain where they were bred, but the previous winter was exceptionally wet, the water coming to within half a mile of the town, where malaria is comparatively rare, though common enough a mile away. At Shefa Amer, three hours from Acre, situated on low chalk hills which rise well above the plain and are remote from running water, two English women had malaria, and though an adult Anopheles was found, the larvae were discovered in an open cistern.

At Nabulus, also, Dr. Gould found Anopheles larvae in a shallow cistern which supplied water to the paragon, and last year, without special apparatus, Cropper found nine Anopheles larvae among a great many Culex and Stegomyia fasciata larvae, and more recently the Anopheles larvae have been found with many Culex larvae at the new hospital. Though, considering the great number of the patients, malaria is very infrequent it is, nevertheless, quite well known in the town, and among the English women at the mission, a few yards away, a few cases have occurred.

Within four hours of Nabulus is the Jordan valley, notorious for its unhealthfulness, and within nine hours is Helwan, than which few places are more unhealthy. From both of these localities patients and visitors come to Nabulus, and thus the stock of malarial parasites, which otherwise would become exhausted, is renewed. So it is probably with most, if not all the places in the tropics which are not essentially malarious; that is, where the Anopheles does not occur abundantly.

**MILE-A-MINUTE WATER RIDE.**

Motor Boat Invented by Frenchman Goes at Express Train Speed.

Among the many interesting experiments with motor boats, says the London Mail, perhaps the most picturesque were those on the Seine at France, when Comte de Launay, in conjunction with Messrs. de Dion and Bouzon, built their latest motor, or floating car. It is a real hydroplane, and that name is really indicative of its construction.

With a 70-horse power motor, the boat attained a speed of 25 kilometers an hour in his first experiments, and now he has added to that speed and has made 32 kilometers, or 20 miles, in the hour.

The inventor of this hydroplane is not, however, content with this, and will try in a day or two to raise the speed to 35 or even 40 kilometers, or 20 miles an hour, or a speed that is not exceeded by the use of a 40-horse power motor.

The boat itself is 26 feet long and nine feet wide. To the bottom of the boat are affixed five planes or fins. When the boat is stationary these fins hang vertically in the water. They are hinged, however, and are all under control of the driver. When the motor is set in motion and the boat begins to move these planes, beginning at the low end, are gradually given a backward angle. The boat rises in the water and then gradually rests upon it, with the stern of the boat only immersed. The speed increases, and the boat, following the inclination of the planes, glides along the surface of the water just as an aeroplane glides on the air, and with not much more resistance.

It is confidently expected that with an increased horse-power motor the hydroplane will reach a speed of 50 miles an hour.

### HEADACHE

Thousands Have Kidney Trouble and Don't Know It.

**Candy Cathartic Cascarets**

Fill a bottle or two with water and let it stand...

### BLACK-DRAUGHT STOCK and POULTRY MEDICINE

Stock and poultry have few friends which are not bought and liver irregularities. Black Draught Stock and Poultry Medicine is a perfect condition. Prominent American breeders and farmers keep their herds and flocks healthy by giving Black Draught Stock and Poultry Medicine in their food. Any stock raiser may have a perfect condition of his stock by giving Black Draught Stock and Poultry Medicine. It is evidence of kidney trouble. The Obsolete Medicine Co., Chattanooga, Tenn.
