Trespass Notice.

Notice is hereby given to any and all persons not to hunt, trap, or cross with dog or gun over the land owned by George Good of Portland, Oregon and Frederick Pfisterer of Tomales California, and lying between Hubbard creek and Brush creek, and bordering on the ocean in Curry county, Oregon, and now leased by the undersigned. Prosecution will follow any violation of this notice.

W. T. WHITE, Secy.
JAMES C. WHITE.

NOTICE OF SALE

Notice is hereby given that in pursuance of an order of the County Court of the state of Oregon for Curry County, made on the 7th day of June, 1920, the undersigned administratrix, will sell at private sale to the highest bidder, subject to confirmation by the court, on and after the 19th day of July, 1920, at 10 o'clock A. M. of said day, all the right, title and interest of the said Geo. M. Horner, deceased, at the time of his death, in and to the real property hereinafter described, and all the right, title and interest that the said estate has by operation of law, or otherwise, since acquired in and to those certain lots or parcels of land described as follows:

The North half of the Southeast quarter, the Southeast quarter of the southeast quarter of Section 28, and the East half of the Northeast quarter of Section 33, in Township 30 South of Range 14 West of the Willamette Meridian, Curry County, Oregon.

Terms of sale, cash in hand, or one half cash, balance secured by mortgage on property with interest at seven per cent per annum.

JANET HORNER,
Administratrix of the Estate of
George M. Horner, deceased

Local Happenings

N. H. Larson was a business visitor in Bandon during the past week.

Mrs. Fred Jamieson has been visiting in Bandon during the past week.

Ralph Pomeroy and family, from their home near Langlois, were visitors in Port Orford, Sunday.

Dame Rumer says the wedding of two of Port Orford's well-known young people will take place in Marshfield today.

Mr. and Mrs. G. E. Tribbey have moved into the Julius Koch residence, on Jackson street, which was recently purchased by W. R. Johnson.

Announcement has been made of the marriage at the home of Rev. Howfall in Bandon on July 9th of Edwin H. Staples and Miss Dorothy Hope.

Crawford Smith and Thad Green, of Sixes, started for Morrow county, in Eastern Oregon, last week where they expect to spend the summer working in the harvest fields.

Colds and sore throats have been prevalent at Port Orford for the past week or two. A similar ailment elsewhere has been called the "summer flu" by the medical fraternity.

Carl Grove and Dellos Crane, of Langlois, were in Port Orford Monday night. The former relinquished his Floras creek homestead before the U. S. Commissioner and Mr. Crane fled upon the same land.

The dance in Port Orford last Wednesday was a largely attended and enjoyable affair. Music by the Garten orchestra, of Bandon, is an attraction that always brings together a large number of those who like to trip the light fantastic.

Mr. and Mrs. W. R. Smith and two sons, of Myrtle Point, passed down the coast last week enroute on an auto camping trip to southern California. Mr. Smith, who is editor of the Myrtle Point American, was forced to take a vacation for his health.

Mr. and Mrs. Jack Clark were shopping in town Monday from their Sixes home. Mr. Clark contemplates moving back to his old home at Chehalis, Wash., and for that reason is offering an excellent buy in his homestead and also in his lease on the old Divilbiss place.

O. Leneve, well-known Port Orford druggist, was called to Coquille Monday by the illness of his mother, Mrs. Elizabeth Leneve. Grandmother Leneve is one of oldest pioneer residents of the Coquille country, being about 90 years of age, and when Mr. Leneve was called she was not expected to long survive.

The Commissioners of this Port of Port Orford held a regular semi-monthly meeting last Thursday afternoon. Work on the wharf is progressing satisfactorily, and the structure will be ready to ship over some time during the coming month. The second bond issue of \$10,000 has been sold by the commission to the Curry county banks at par.

Robt. M. Smith, "Buck-kid Bob" was a visitor in town one day last week from his home on upper Sixes. Mr. Smith says his son, Francis, who reenlisted in the navy at the close of the late war, will be discharged at San Diego in about a month and will then return home. The young man is a petty officer, and receives \$90 a month pay.

Fred Jamieson and T. J. Hooper were Bandon visitors in the former's truck last Saturday. When the truck stopped at Langlois enroute home, the latter is said to have taken a rather undignified tumble into the street from a gasoline drum on which he was sitting. Were it not for the fact that Mr. Hooper always rides on the water wagon, said that the contents of barrels are innocent nowadays, the incident might be viewed with more or less suspicion.

A petition to the county court asking that an election be called in Port Orford, Elk river and the two Sixes districts for the purpose of voting on the consolidation of these districts into a high school district has been circulated in the territory affected and very liberally signed. A similar petition has been circulated in Langlois, Floras Creek, Hare and Denmark districts, where the movement is also meeting with much encouragement.

J. B. Carl returned last evening from circulating the high school petition in the Elk and upper Sixes districts, and found but one person who refused to sign it.

Calm weather has prevailed during the past week, and the ocean has been very smooth. Taking advantage of these conditions, Marion Zumwalt took a party of our town people for a ride in his fishing launch Monday afternoon, and a delightful time was had cruising up and down the coast, all on board proving good sailors. Those who made the trip were: Mr. and Mrs. A. F. Woodyard, Mr. and Mrs. E. H. Staples, Mrs. J. W. McPhillamey, Mrs. Wm. Gillings and Mr. Higgins.

Deputy fire warden, E. L. White has been instructed by the State Forestry department to install an airplane signal station on Rocky Peak. The signal consists of a triangular white canvas with its three dimensions 15 feet long. On this canvas three figures, 5 feet high, 3 feet wide and one foot thick, will be painted in black.

Rocky Peak is an excellent lookout as it has an elevation of over 2,300 feet. The signal on it is one of a number of similar ones on various prominent peaks throughout the state so that the airplanes can report the proximity of fires to such stations.

Marriage

John R. Marsh and Dorothy Blusson were united in marriage in Port Orford last Wednesday evening by Justice M. T. Wright.

Mr. Marsh is the eldest son of Mrs. R. A. Marsh, of Elk river, and the bride, who is a half sister to Mrs. Geo. Dunn, of Euchre creek, comes from the state of Washington. The young couple, who have the congratulations of many friends, will make their home on the big Elk river July farm in which the groom is interested.

Dairy War L. On.

The dairy men of the Coquille valley and the Nestle's condensary at Bandon reached the parting of the ways this morning and the condensary's milk supply today is a long way short of what it was yesterday.

The trouble has been brewing for some time, the dairymen feeling that they ought to check on the condensary's figures. July first the Dairy men's League requested to be allowed to have a check weigher and a check tester at the condensary. July 7 the condensary answered, declined to deal with the league or any organization, but expressing an entire willingness to deal with the dairymen as individuals. With the principle of collective bargaining so well established as it is in this country this seemed like a "bark from the tongue a do-l-f sound."

This morning the league members ceased to ship to the condensary and the creamery at this city is flooded with milk and is running three cheese vats; while the league factory at Denmark and the one at Langlois are each in receipt of about 15,000 pounds of milk.

The only milk the Bandon condensary is receiving this morning is supplied by a small percentage of dairymen who have not yet joined the League.

To take care of the milk on the lower river the League proposed to put the old Parkersburg creamery in commission and equip it in first class shape.

The result of this outbreak of hostilities between the Nestle's Food Co. and the embattled dairymen of Oregon will be awaited with a good deal of interest. The Nestle's people are of course on record as declaring that they would close the Bandon plant, rather than deal with any organization of dairymen. It looks as if they might have to unless they come down off their high horse.—Coquille Sentinel.

Much Interest On Goat Topic.

Considerable interest in the possibilities of this section of Oregon for raising goats has been created by the recent article by H. B. Steiner, Sixes, Oregon telling of the industry. Many requests for copies of the article have been received by Western World from people in Oregon, Washington and California, among them being Swift & Co., the big meat packing concern.

In yesterday's mail a letter was received from F. A. Pierce of Trinidad, California, who is known as one of the most successful goat breeders of the Pacific coast country. Mr. Pierce gives further interesting information concerning the industry. He says:

"I just received your paper in which there was a piece written by our able secretary of the Oregon Goat Mohair association. And if the climate conditions are the same there as they are here along on the coast it sure must be an ideal goat country. I left Oregon last year and have wished several times that I had gone down into your country and looked it over but I had no idea of the abundance of feed for goats there is along the coast counties, until I reached Crescent City. From there to Eureka saw plenty of green feed of all kinds that the goats like and I am of the opinion that up the coast is about the same from what I can learn and that country has room for one of the greatest paying industries in the world—the Angora goat—as he puts waste brush into mohair. And the long mohair."

"The long mohair is where the big money is, and as you can see by these figures. Twelve inches long mohair is worth \$3.50 a pound and the price raises on every inch \$1.00 a pound, till it gets up to 34 inches which sells for \$20.00 a pound. It takes the non-shedding goat to

produce this long mohair, as the animal can only grow one inch of it in a month. You can see that a goat carrying a two year old fleece has mohair worth from \$35.00 to \$75.00, while the three year old fleece sells at from \$150.00 to \$200.00. But the three year old fleece must be braided up when the goat has grown it 18 months or it will become matted and gets so much out in it at the shedding period and the water gets into the heavy oil spot that it will weaken the mohair at that point. By combing it at 18 months growth and pulling out the kinks spreads the oil all thru the fleece and eliminates the tendency of the mohair to mat. But in growing a long fleece one should have a heavy canvas over the animal to keep the rain out and the brush from pulling out the mohair.

"Anyone can breed up their Angora goats by using purebred non-shedding bucks, but cannot expect to get more than one out of the three kids from the average Angora nannies that will carry a commercial staple. Of course, from a better grade than the average run of animals you will get a bigger percentage of non-shedding goats. Again, one does not have to clip the fleece too early in the year to save the mohair from falling off by raising the non-shedding animals as they will carry the mohair a month or more longer, some of them will not shed at all and give you a salable staple of long mohair.

Mr. Steiner has hit on one of the most important subjects—dipping the goat—only he did not go far enough with it. He should have said that lice are the mother of 90 per cent of the losses sustained in raising goats, as a lousy goat would take all kind of diseases that no medicine will cure but one can save a large percentage by dipping as soon as he finds that lice are on them. I have tried every kind of dip and find that the Coopers powdered dip gives the best results, as it stays in the fleece for six months after dipping and also seems to preserve the mohair. By using a 100 gallon tank it takes two packages for three hundred head. Put in one package, then mix the other package in about two gallons of water and put into the tank about a half cup after every 15 or 20 head have gone thru the dip tank.

Evidently Mr. Steiner has never run goats in a country where the feed was very short or he would lay lots of stress on feed. Here where I am now there is no short feed but back farther from the coast there are many places which would not raise a jackrabbit to the acre of ground let alone a goat, and they can live where other stock would starve to death. In the 22 years I have been in the goat business my goats never have been fatter or put out as heavy crop of mohair as they are doing here but they never had the abundance or variety of feed they are getting here. My goats are putting on a good inch per month of mohair and I don't believe that I will have a goat in my bunch that won't clip 5 pounds next spring, while most of them will clip from 8 to 12 pounds of mohair each. And it is the feed that is doing it.

"I think it would be well for any one going into the goat industry to give Coos and Curry counties a survey. I may come up into that country myself next summer and look it over as I am on rented land down here, and if it is like this country along the California coast it sure must be an ideal goat country."

Mr. Pierce owns Leo grand champion at the Oregon State Fair at Salem, in 1916. The animal's fleece sold for \$200, and the animal for \$200, at the California State Fair at Sacramento, 1917. He also owns Leo and Caesar, two other prize winners.

The fleece of Dodo the world's grand champion mohair goat, was 41 inches long and sold for \$372.00—just \$172.00 more than the fleece of Leo brought Mr. Pierce.

FOR SALE.

I will sell for \$1000, or trade for car in good condition, 160 acres of grazing land on Sixes; with outside range will run 50 head of cattle during summer. Also sell lease on Divilbiss place together with a good work team and harness, 22 hogs, 8 cows, three calves and 12 yearlings. For particulars call or address

Jack Clark,
Sixes, Oregon.

We will pay 10c cash or 10c in trade for good, clean, dry Casaca bark in any quantity you want to bring.—SID WELLS & SARGENT.

Making the Nation's Credit Liquid

RESERVOIR systems insure a steady water supply in every city and large town. The faucet is of very little value without the reservoir behind it.

The Federal Reserve Banking System is a simple and practical means of making the nation's credit liquid at all times.

As a member of that system, this bank is as independent of local conditions as it is humanly possible to make it.
