There is an automobile goes through Redmond that has a whistle like a freight locomotive, and every time the driver comes to a crossing he toots the whistle the same as an engineer does. To a stranger hearing the whistle it would signify that a freight train was coming.

Work on the new M. E. Church is progressing rapidly, and the building is beginning to assume definite proportions. The building will be an imposing one when completed. The architectural design is attractive, and the size of the building will be sufficient for the needs of the church people for years to come.
