To Head Off the Dead Beats

The Spokesman is informed that steps are being taken here to form a business men's protective association. The object of the association is to protect the business men of the city from the dead beat class of citizens

who get credit for goods and material and then refuse to pay for same. It proposed to give the above class of people a certain time to pay up in and if they show no disposition to come through their names will be posted with all members of the association, and they will be refused credit.

FINEST WELL IN CENTRAL ORE.

Madras Pioneer: The Central Oregon Well Drilling Company has just completed a splendid well for the Deschutes Railway company at Gateway, which comes near answering all requirements of an artesian well. With a hole down 210 feet, water stands in the well to within 10 feet of the surface and the quality of the water is said to be second to none for any purpose for which it is desired to use it.

Water was struck at a depth of between 20 and 30 feet and the supply was sufficient for the operation of the drill. The drill was sent on down to a depth of 155 feet before another flow was struck and the drilling was continued to 210 feet when the water raised in the well 180 feet. This of course gives an inexhaustible supply and the easy depth for bringing the water to the surface makes it the finest well in Central Oregon.
