Good Printing Is a Persistent INFLUENCE Exerted in Your Behalf

Every bit of printing that goes out to serve you makes a KIND OF AN IMPRESSION. Poor printing will leave a bad impression of its user as much as would poor clothes, a poorly store or shop, or office. Good printing will leave upon your mind an impression wholly favorable of its user.

Even if but one in a thousand of these "impressions" tips the scales for business orders, for you—good printing will have thus paid for itself.

You can get it at this office whether you want a little or a great deal.

A For Sale ad, written with some selling-sense in it, will be used things for something like their actual value in cash.

Stringing New Wires on Road

Linemen were busy last night and this stringing wires on the Oregon Trunk and O.R. & N. railroad here. When finished there will be six working through this office. It will be metallic circuits, 100 pounds of wire to the mile, two galvanized iron wires, 1/2 gauge. The metallic circuit will be operated as phone wires and the same wires will also phonoflexed as a Morse circuit. The galvanized wires will be used for the Morse circuit. Redmond now has excellent telegraph service, and the operators at depot are all obliging and accommodating to patrons of the service.

The person who is dissatisfied with his present furnished might be interested in what we have to offer—if you find him through an ad.
