# JUST HALF ARE

THIRTY THREE OUT OF SIXTY SIX BUSINESSES IN THE CITY LET THE PEOPLE KNOW THEY ARE IN BUSINESS-DO River, Or. NOT REPRESENT CITY

A newspaper is an index of the town in which it is published. It conveys to the outside world whether the town is peopled with live, go ahead business men, or whether the grass is growing in the business streets.

If the town papers are filled with advertisements of different classes of business the readers of that paper on the outside will at once come to the conclusion that that is a live, up to date town a place Portland. where they do things, and a good place to live in.

In Redmond there are 66 different businesses that should be advertised to properly represent the town. Just one half of them advertise in either of the papers published here.

This is not a good showing for the town. It does not give a true index to outsiders, of the business of the town.

Every business in the city should be advertised in the home newspapers, even if not more than an inch

Redmond ought to make a better showing than she is making Only half of the businesses advertising, and the outside world judging the city on that basis.

Only the other day The Spokesman received a letter from a Portland subscriber asking about a certain class of business he would like to locate here. There has been no ad in either of the Redmond papers of the business the gentleman had in view, although such a business house is in operation here and has been for several months.

There is only one way to do business-and that is to advertise Oakland, Cal. and let people know that you are IN business. Do not keep your business secret by keeping your name out of the papers. The only way to success for a business man, or a town, or a city, is to advertise persistently and judiciously.

Think this matter over, Mr. Business Man, and make up your mind to have your business represented each week in the newspaper. even if you expend but four bits a month for the advertising.

Keep your name and business bein business.

### **GOLD STRIKE PANNED** OUT VERY MUCH N. G.

M. A. Robinson returned from Portland Sunday and gave out the information that the samples of gold taken from the black sand at Lower Bridge, to be assayed, proved to be of too low grade to be worked by any known process, says the Terrebonne Oregonian

While there is gold in the sand, it only assays from \$1.40 to \$1.80 per ton, and in order to get this value it must be treated by electricity, and while there is plenty of water power in the Deschutes river adjoining the body of sand that could be harnessed for the generating of electricity, the values in the sand do not run high enough to warrant the expenditure.

The Minnesota - capitalists who had figured on developing the gold find, have returned to their homes much disappointed.

#### THE NEW PAPER AT TERREBONNE

The first issue of the Terrebonne Oregonian, published at Terrebonne, formerly Hillman, has reached this office. The paper is well he is insulted. filled with ads of the business men of the town, every business firm there being represented in the columns of the paper. The news matter is well gotten up and shows Terrebonne up to advantage. It is this unanimous support by the business men of a new town that makes that town prosper, and the people of Terrebonne have surely got off on the right foot when they so liberally patronize their new paper. Editor Johnson is to be congratulated that he has located among such a bunch of live wires and hustlers.
