\$1.50 PER YEAR

CEN. ORE. DEV. LEAGUE MEET AT KLAMATH

GOOD ROADS MATTER IN STATE WILL BE TAKEN UP AT THAT TIME AND OTHER IMPORTANT SUBJECTS GONE INTO—REDMOND MAY LAND THE 1914 MEETING

The date of the next meeting of the Central Oregon Development League has been fixed for August 19, 20 and 21 at Klamath Falls.

All of the previous meetings of the League have been well attended, all parts of the state being represented. The program for the meeting this year has not been published, but arrangements are being made for speakers of note.

Prominent in the subjects for discussion will be that of the road question, which is so distinctly before the people at this time.

Representatives of the Oregon Agricultural College Extension Work will be present and take an active part in the discussions.

It is being arranged to have successful and prominent farmers present who will state their experience in subduing the soil, and these reports will be published and used in an educational way for the benefit of the whole district.

The meeting for 1914 will come to Crook county, and Redmond will undoubtedly be given the preference should the citizens here so desire.

President J. W. Brewer of the Redmond Commercial Club, says that at Lakeview last year the 1914 meeting was practically pledged to Redmond, but in order to get it this district must be well represented, and it is hoped a good delegation will be sent from here to the meeting at Klamath Falls in August.

Every endeavor possible is being made to have L. W. Hill and W. P. Davidson present at the meeting. Both of these men are much interested in the development of Central Oregon, and will undoubtedly be present if business arrangements will permit.

"What is your attitude on the tariff?"

"Something," replied Senator Sorghum, "like that of a man who is walking a tight rope."

GOOD ROADS MEETING AT LA PINE AUG. 9

BIG TIME PROMISED TO ALL WHO ATTEND TO DISCUSS THE IMPORTANT QUESTION OF ADDITIONAL GOOD ROADS—A BARBECUE WILL BE ONE OF THE FEATURES OF THE MEET

The city of La Pine is making arrangements to entertain the Good Roads enthusiasts of Crook county on the 9th of August. They are preparing a good program and have among their speakers a number of road experts of the state, among whom will be Judge Worden of Klamath county, who has done much for his county in the way of road improvement. Col. Thatcher, with whom many of the Redmond people are acquainted, will also be in attendance.

M. A. Lynch of Redmond, president of the Crook County Good Roads Association, has been invited to speak on that occasion, and will undoubtedly be present.

This meeting is a matter of much interest to every tax payer, and it is hoped Redmond will be well represented.

The entertainment committee is preparing a big barbecue, and promise many good things to eat.

The La Pine Inter Mountain of last week in talking of this meeting says:

"From as far north as The Dalles and south to Klamath Falls are coming cordial assurances from commercial club organizations that they will co-operate with La Pine to make the Good Roads Barbecue and Pow Wow held here on Saturday, August 9, the greatest event of the kind that ever took place in Oregon. The press of Central Oregon, too, is lending hearty support, the Klamath Falls Northwestern, which is ranked as the best and most important daily published in the state east of the Cascades, for example, devoting a column of its first page on Sunday, July 6, to the La Pine event."

"Judd Fish, secretary of The Dalles Business Men's League, writes he will be one of a big delegation from that city who will be present. Mr. Fish is said to be an authority on the question of good roads. Coupled with those of Col. Thatcher and Judge Worden's, the speaking

OF INTEREST TO DAIRYMEN

PRACTICAL CATTLE BREEDER GIVES ADVICE ON CURE OF CONTAGIOUS ABORTION BY THE USE OF CARBOLIC ACID

The following article is taken from the last issue of the Rural Spirit, published at Portland, and should be of interest to all dairymen and cattle owners:

The opinion of most government veterinarians, and we believe of veterinarians generally, is that the surest, if not the only way, to free a herd of contagious abortion, once it gets started, is to segregate all the affected animals and all that have been exposed to contamination or are suspicious, until the disease has run its course, removing every cow from the suspected herd as soon as she drops a living, fully matured calf. The experience of a great many dairymen confirm the theory. But J. H. McCroskey of Sprague, Wn., has had entirely different experience and in the hope that it may be of some benefit, in least in suggesting precautionary measures, his experience and opinion is published.

Mr. McCroskey is a breeder of Short Horn cattle in large numbers and has both pure bred and grade animals. He does not fear contagious abortion, but considers it necessary to fight it all the time. In his first experience, 10 years ago, he bought the disease with a herd of cows and lost 42 out of 45 calves. He sold off the entire lot for beef and began at once to clean up. He has bought aborting cows a number of times since then, but they have never communicated the disease to his herd and he has never lost any calves except from cows in the purchased aborting herds.

His method is simple but systematic. His only remedy is carbolic acid. He dilutes carbolic acid and puts it in the salt. He uses ordinary ground salt, not rock salt, so that it is easy to incorporate the carbolic acid. He uses carbolic acid in the drinking water—about a quarter of a pint in a 500 gallon tank, and puts in more whenever the tank is emptied, or often enough to have a trace of carbolic acid in the water at all times.

He constantly disinfects the barns with carbolic acid or any other good disinfectant. Mr. McCroskey's cattle are in the barn but very little, either in summer or in winter. He has much natural shelter on his place, and believes in giving cattle all the fresh air possible. He recog-

Did You Ever Pay a Bill Twice?

The one who has not had to pay more than one bill the second time is the exception and not the rule. Few people when paying a bill ask for a receipt, and if they do they fail to keep the receipt. Did you ever have a dispute over a payment? Unpleasant, is it not? Do you wish the circumstance to occur again? There is one sure way to escape it. Pay your bills with checks. If you received no interest on your idle money it would only show good sense and good wisdom to have it in a bank. Transact your business in a business way and pay your bills by checks. Your check when returned to you makes an undisputable receipt. A bank account makes you systematic and encourages you to save part of your income. Many a man has become rich because he became interested in watching his bank balance and was thus led to find ways to increase it. Start a bank account with us and we will help you make it larger. Why not begin today?

Redmond Bank of Commerce

REDMOND, OREGON

COLLECTING TAXES UNDER OLD SYSTEM

Sheriff Elkins has written the Bank of Commerce of this city, as follows:

Prineville, Or., July, 1913. Bank of Commerce, Redmond, Oregon, J. W. Brewer, Cashier.

Dear Sir: We wish to inform you that we have just received an opinion from the Attorney General in regard to the collection of 1912 taxes, and he informs us that the old law holds as to the 1912 tax, so we will receive last half payments, without the interest, and up to October 1st. But where there is no payment made the 10 per cent penalty and 1 per cent a month is charged from April 1st. In other words the new law is not effective until Jan. 1, 1914.

FRANK ELKINS, Sheriff.

ED ERICKSON IS PLAYING A GREAT BALL GAME

The Salt Lake Tribune of the 20th has the following to say of Ed Erickson of this city: "The coming back of Ed Erickson seems to be complete and permanent. Everything in Erickson's base ball life this summer dates from the 4th of July, which marked the epoch. On that day he pitched 22 innings. Yesterday he pitched only nine, but the nine were innings to be proud of. The Butte hitters connected for only six safeties, all of which were singles. Also they were scattered, the largest number of the six being two in the fourth inning. Erickson was the recipient of much honorable and invaluable assistance from his team mates."

ELECTRIC LIGHT FOR THE LAIDLAW DISTRICT

BEND COMPANY MAY INSTALL LIGHT AND POWER IN THAT SECTION

(From the Tumalo Times) Manager Foley of the Bend Water, Light & Power Co., stated in an interview last Friday that the company was considering building a light and power line to Laidlaw. Mr. Miller, one of the eastern capitalists interested in the company, is expected to be in Bend in a short time, when the matter will be taken up with him.

In building a line the company would eventually expect to extend through to Sisters, and furnish light and power for all the farmers on the Tumalo Project and adjacent territory.

There is nothing that would help Laidlaw along so much just at present, as electric light and power. The town is entering on a period of honest growth, unassisted by any real estate boom, and all the money being invested here is for the upbuilding of the country. As soon as the Tumalo Project is completed hundreds of families will move onto the land and, as dairying is the most profitable branch of farming for this section, it will be followed extensively. Dairying calls for the use of power, and power can be used with greater profit in dairying than in any other farm enterprise.

There is, therefore, a wide field for electrical development in this

BENHAM FALLS DAM OPERATIONS CONTINUE

Work will be continued by the United States reclamation service this summer at Benham Falls, 12 miles south of Bend on the Deschutes river, for the purpose of determining the practicability of constructing a big dam there for irrigation purposes.

Diamond drill operations have reached a depth of 80 feet. While bed rock has not yet been touched those in charge of the work are hopeful of striking it soon.

The work is being carried on under state and federal appropriations of \$100,000 under the supervision of the federal reclamation service. Below Bend two crews of men are now camped near Redmond and Opal City. They are surveying the river under the direction of Engineer J. T. Whistler of Portland.

SAND IN WATER CAUSES DEATH TO DAIRY COWS

A Powell Butte farmer recently lost a valuable dairy cow and he determined to make an examination of the cause of death. Nearly a quart of fine sand was found between the second and third stomachs. The cow had been drinking from shallow irrigation ditches and it is thought the light sand was so abundant in the water as to accumulate and cause death. This theory seems to solve the mystery of the death of several cows that have died from no apparent reason.

"Will you marry me?"

"No, a thousand times no."

"Well will you if I ask you a thousand and one times?"

Advertising and News

News is any "recent or fresh intelligence or information concerning any matter or event," and advertising is giving news relating to a business. The ordinary doings and happenings are not news. For instance, to say that Jones, the dry goods merchant, sells calico, is not news. But to say that Jones sells calico 25 per cent below regular price is news, business news, and advertising.

That advertising may be effective, productive and stimulating to business it must be done in the way of conveying information. To say that Smith is still making good goods honestly, and that the people ought to eat his product, conveys neither specific nor interesting information. But to show why Smith's goods are good, how the goods are made and why they are made that way, why they are palatable, why digestible, and why healthful, are all points of interest conveying intelligence. Of course the news must be told by the advertiser in a way that is convincing. Everyone is open to conviction. It is up to the advertiser to demonstrate the real value in any product for sale. Every good product will profit by this test, for the people are quick to take up with anything they know is good, and skeptical about a product of which they know nothing. If a product cannot stand the test of publicity it will go off the market, as it should. And a merchant whose business cannot stand the test of publicity will not make a success of his business.

When the merchant puts the same arguments and intelligence into his ads that a good salesman puts into his talks to sell a commodity, then will newspaper advertising become immensely profitable.

THE SPOKESMAN CAN HELP YOU WITH YOUR ADVERTISING TO GET RESULTS. LET US DEMONSTRATE.
