PRINGLE FALLS IS TO BE FULLY DEVELOPED

PROJECT TO BE COMPLETED WITHIN 18 MONTHS—WORK TO STARTS AT ONCE

From the head offices of the Pringle Falls Electric Power & Water Co. in Portland, owners of the great power site six miles northwest of La Pine, comes the cheering news that within the next 30 days a force of men will begin development there in earnest, says the La Pine Inter-Mountain of last week. This authentic information is contained in a letter from Secretary W. H. H. Dufur to the Inter-Mountain editor. "It is now calculated by the company that they will begin work upon their dam with a force of men within the next 30 days," says Mr. Dufur. "While they will not in all probability be able to

finish the completion of the dam this present season, within the next 18 months or less you will see the falls fully developed." Mr. Dufur expresses great pleasure over the prospects of a creamery being established at La Pine shortly. "Your country there is naturally adapted to an industry of that kind,"

he says. He also states that he has "full confidence in the future of La Pine as the coming city of Central Oregon."

The Pringle Falls power site, fully developed, it is estimated, will provide 12,000 electric horsepower. Its development is of vital importance to the future of La Pine.
