lar hunts are held weekly, yet the long eared pests are plentiful.

Before the next crop season it is hoped that most localities will be rid of them to such an extent that the farmers and homesteaders will be able to raise their crops and harvest them before compelled to fence their entire places with rabbit wire fence.

Of course the most damage is done in the newer sections where the land is still covered with sage brush. On the Plains there is very little damage done to crops, and in other sections the rabbits will gradually disappear as the land is cleared up and placed under cultivation.

This is the first whole carload to be shipped from Powell Butte by one party, but there are several more to follow.

Frank Bailey, his sister, Mrs. Cox and her two boys, and Miss Eva Hannah visited several days with Geo. Hobbs last week. Mr. Bailey and George are old time friends and it has been quite a treat for both of them, as it has been 15 years since they had seen each other. Bailey has been at the Ochoco mines since last April and made quite a cleanup there. He and Hobbs are now working on a prospect on the Desert which is promising very good. Mr. Bailey plans to live in Redmond this winter.
