

Your Attention Is Called to the Standard Types of Efficient Silos

Plans for which have just been perfected by our Engineering Department, and, together with specifications, are given FREE with the bill of material.

While the handling, storage and keeping characteristics of these SILOS are about on a par, yet individual preferences as to construction requires a choice, which is offered in the following list:

- TUM-A-LUM A Silo—Plaster inside.
- TUM-A-LUM B Silo—"Wisconsin" type wooden lining inside.
- TUM-A-LUM C Silo—Ceiled vertically inside.
- TUM-A-LUM D Silo—2x4 Staves.
- TUM-A-LUM E Silo—Flooring and Batten Hoops.

These are all designed for regular stock lumber and can therefore be purchased at much less cost than the patent Silos of equal capacity.

TUM-A-LUM M Silo—Concrete.

FAREWELL MEETING OF MINISTERIAL ASSOCIATION

(Continued.)

On Monday afternoon the bi-weekly meeting of the Redmond District Ministerial Association was held at the M. E. church. Rev. F. Harvey presiding. The clerk, Rev. George Harrison, read a request from the Anti-Saloon League requesting a list of signatures from the churches in support of an amendment to the constitution of Oregon. The request was accepted and recommended to the managers of each church. The remaining part of the session was spent in kind solicitude for the departing ministers. Rev. George Harrison of the Baptist church, and Rev. F. Harvey of the Presbyterian church. Rev. W. E. Ragan keenly feels the condition of being left alone after such cordial friendship and co-operation between them. Many of the Redmond townspeople have observed and remarked that there has been a remarkable friendship and co-operation between these three ministers.
