5 Per Cent Fail in Business. Of the hundreds of thousands of merchants engaged in business 95 per cent of them fail. Why should they fail? Suppose per cent of the people died of diphtheria, what would we do? There is no more reason why 95 per cent of merchants fail in business than there would be if 95 per cent of the people died of diphtheria. It is pure waste. Statistics prove that 85 per cent of the merchants who fail in business are non-advertising merchants. Advertising is the only anti-toxin.

Results of good advertising are obtainable. The inexperienced generally meets with disappointment in his advertising. Advertising is a special business just like medicine, law, dentistry, etc. A watchmaker takes \$5 worth of pig iron and converts it into air springs worth \$2,000,000. That is what efficiency does with pig iron. What would efficiency do with your business? That every merchant needs is the assistance of an advertising specialist, who has studied carefully the problem of advertising efficiency. My years of experience in the field of newspaper advertising is at your service at a small sum of one third of a cent an hour. I have the only reasonable plan for newspaper advertising on the market. Results guaranteed. Write me for my plan of assisting the local merchant with his newspaper advertising. Let me send you free 52 copyrighted articles on newspaper advertising. Write for them today.

Not how cheap, but how good—cheap printing. And at that it's cheap.

Great expectations will be realized if they are backed up by advertising.
