

100 Doses For One Dollar

Economy in medicine must be measured by two things—cost and effect. It cannot be measured by either alone. It is greatest in that medicine that does the most for the money—that radically and permanently cures at the least expense. That medicine is

Hood's Sarsaparilla

It purifies and enriches the blood, cures pimples, eczema and all eruptions, tired, languid feelings, loss of appetite and general debility.

"I have taken Hood's Sarsaparilla and found it reliable and giving perfect satisfaction. It takes away that tired feeling, gives energy and puts the blood in good condition." Miss EFFIE COLONNA, 335 19th Street, N. W., Washington, D. C.

Hood's Sarsaparilla promises to cure and keeps the promise.

Serious, indeed.

"Miss Summerall must be quite seriously ill. She hasn't any appetite at all."

"Oh, a girl isn't always ill when she has no appetite!"

"But she has no appetite even for ice cream and candy."—Philadelphia Press.

CATARH CAN NOT BE CURED

With local applications, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Catarrh Cure is not a quick medicine. It was prescribed by one of the best physicians in this country for years, and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing catarrh. Send for testimonials, free.

F. J. CHENEY & CO., Props., Toledo, O. Sold by druggists, price 75c. Hall's Family Pills are the best.

The Only Restful Place.

"She was all worn out and in need of rest, I understand."

"Quite right."

"But she was only two weeks at that summer resort before she came home again."

"Yes."

"Why was that?"

"Well, after two weeks of that life she had to come home to rest."—Chicago Post.

FITS Permanently cured. No more nervousness after first day's use of Dr. Kline's Great Nerve Restorer. Send for Free 24 trial bottle and treatise. Dr. R. H. Kline, Ltd., 537 Arch St., Philadelphia, Pa.

The Difference.

"What is the difference between a woman's whisk club and a man's poker club?"

"Why, in one you get home to dinner and in the other to breakfast."—Detroit Free Press.

Christians, send for the Christian Educator and God's Defender. Yearly \$1; six months 50c; sample copy 10c. W. H. Kerr, Great Bend, Kan., Editor.

Hopeless Case.

"If you weren't so lazy you wouldn't be so pessimistic."

"Oh, nonsense!"

"Why don't you make hay while the sun shines, and—"

"Huh, if I tried to do that it'd just be my luck to get sunstruck."—Philadelphia Ledger.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething season.

If He Takes It.

There is some hope for a man as long as he knows how to take a hint.

FARMS AND FARMERS

A Handy Hog Scaffold.

In my visits to many farm houses in this country I noted many home-made scaffolds on which to hang hogs after they are killed and scalded, but the one shown in accompanying figure and which I use myself, I consider as handy and practical as any. It can be moved anywhere, even in the smoke-house, and if made out of good seasoned timber and painted, it will last a lifetime. It will hold five hogs weighing 300 pounds each.

One can buy five large hooks, or have a blacksmith make them, at a very small cost; these are to hook over the beam, A, on which to hang the hogs. The top piece, B, is a chestnut scantling, 2x4 in. and 6 ft. 10 in. long; this piece has two mortises, 3 inches from center, as shown in cut. The two upright pieces, C, are hardwood scantlings, 2x4 in. and 5 ft. 8 in. long. These have a mortise at the top 2 inches wide and 4 inches deep; also a mortise at bottom 1 inch deep and 4 inches long. These pieces also have a mortise 1 1/2 x 1 1/2 in., 2 ft. 5 in. from center to the upper end, for the tenon of brace, D, to go into. These pieces also have a mortise 2 feet from lower end for brace, E, to set in. The sill, C, are 2x4 in. and 2 ft. 4 in. long. They have a mortise in center 4 inches wide and 1 inch deep; also a mortise 9 inches from center, for brace, E, to set into. D is a brace 1 1/2 x 2 1/2 in., and

8 ft. 4 in. long, including tenon, which is 1 1/2 x 1 1/2 in. square and 4 inches long. E is a brace 2x3 in. and 1 ft. 11 in. long.

All that is required to put this scaffold together are two 3/4-in. bolts, 5 inches long, to bolt the beam, A, to the upright pieces, B, and sixteen 6-penny nails and two bolts 3 inches long to hold B to C at bottom. I have found it very handy on a bad day, for one can set it in some building to hang the hogs on; it is also handy to hang sheep on to butcher.—Charles E. Cummins, in Ohio Farmer.

Live Stock at St. Louis Fair.

Live stock exhibitors in each breed class at the World's Fair will receive a senior champion prize and a junior champion prize for males and females, and a reserve champion award will follow in four classes. Competition for the senior championships will be limited to mature animals, and young males and females only will compete for the junior champion prizes. Prospective exhibitors express themselves as highly pleased with the plan of Chief Coburn of providing for a more equitable method of awarding championship prizes and thus increasing the number of honors.

Start in a Small Way.

Most of the failures in trying to operate poultry farms have been brought about by trying to keep too many fowls at first. Begin on a small scale and work up to your limit. You may be surprised to find how few you can keep at a profit, and you may find that you were born to be a poultry man. Trying it is the only way to get at the truth.

Wintering Cabbage for Family Use.

Cabbages that winter best are those just fully formed and not overripe. For family use bury an empty barrel in a well drained spot and fill it with good heads. Place a lot of dry leaves on top and cover the barrel so that it will shed rain or pile some cabbages in a corner on the barn floor and cover them with enough straw to prevent solid freezing.—Exchange.

Salt and Charcoal.

Salt and charcoal should be kept in reach of hogs at all times, says Tennessee Farmer. They will help themselves when their systems require it. A little turpentine in the slops occasionally is valuable as a preventive of disease.

Apple Scab Fungus.

A cold, damp season seems to be favorable to the development of apple scab fungus. The scab is one of the diseases that are most effectually and profitably treated by spraying with bordeaux mixture.

Movable Poultry Fences.

When for any reason one does not care to go to the expense of permanent fences around the poultry yard, movable fences like that shown in the cut may be used to advantage. They cost but little, and if well made will last for several seasons. The sections, as shown, may be of any dimensions desired, although if about four feet high and six feet long they can be better handled than when larger. The frame may be of any light weight material, and should be made so that it will be as stiff as possible. It might be a good

MOVABLE POULTRY FENCE.

idea, and especially if the sections were of greater dimensions than those given, to run a brace from corner to corner diagonally to give additional stiffness. The corners should be well fastened and the frame is then covered with wire netting. Three planks are fastened to the bottom of the frame at intervals, as shown, and braced with a strip from the frame to the planks. These planks will hold the section upright and prevent it from sinking into the mud. Several sections can be quickly made after the same pattern and hooked together at the corners the desired length. These movable fences would be especially valuable in the spring, where numbers of chicks were to be raised and it was desired to keep them in inclosures. If used to surround chicks, a wire of a finer mesh would need to be used.—Indianapolis News.

The Oleomargarine Law.

Some time ago it was shown that one weakness of the present oleomargarine law, the use of some ingredient which made it possible to avoid the law against the use of coloring matter, was working hardships on butter makers, but reports generally indicate that the law was a wise one, and prove beyond all question that consumers do want oleomargarine. It was held by the opponents of the Grout bill that the public demand was so great that to place any restrictions on the methods of marketing oleo would be to drive out of the market a meritorious article. Those who upheld the bill claimed that if oleo had any merit of its own it should be sold on that merit, and not disguised as butter. The law as enforced has shown that by far the greater number of those who used oleo did so because they assumed it was butter, the color helping to carry out the deception. Oleo may be nutritious and have great merit, but it is evident that few people desire it or will buy it when they have full knowledge that it is not from the product of the cow. The Grout bill has benefited farmer and consumer alike, and any attempt which is likely to be made this coming session of Congress to modify its provisions should be fought hard by farmers and dairymen. If butter must be sold on its merits, why not oleo, also?—St. Paul Dispatch.

Hogs on Pasture.

On most farms there is a wornout pasture or a newly-cleared piece of ground thick in underbrush or sprouts which would make ideal runs for swine. A good plan is to fence off a portion of such places so that the animals will not run off the flesh as fast as it is put on, build some sort of a rough house so they will be protected from storms and turn them loose to root and grub. Many a pasture that was supposed to be worthless has been rendered fit for reseeded after a drove of hogs had occupied it one summer. Much of the living can be picked up on the range in the manner suggested and the swine will be in fine shape to take on fat when the proper time comes to confine them more closely.

The Pestilent Sparrow.

Even in youth not much more than half the food of the sparrow consists of insects, and this brief period passed, its diet afterwards consists of three-fourths grain and useful seeds. Systematic thinning on a scale so drastic as to amount as nearly as possible to extermination is advised.

Picking Fowls for Market.

Poultry shipped for market alive lose considerable of their weight in transit, and while there is a demand for poultry in this condition that must be met, by far the greater demand is for dry-picked carcasses. It is not a pleasant task to prepare poultry for market particularly when the entrails must be removed, but as stated in this department several weeks since, the additional price pays well for the labor. A dry-picked fowl has a perfection of skin which is attractive and for which the best customers are quite willing to pay.

Fainted On Broadway

Woman in an Unconscious Condition Found on Sidewalk.

Upon Examination at the Hospital, Her Body was Discovered to be Covered with Scars, Caused by the Hypodermic Injection of Morphine—Facts Published as Warning to Other Women.

The above headlines recite the actual experience of a poor wreck of a woman who had once held an honorable and lucrative position in a large mercantile house in New York. Her health began to fail, and instead of taking rest and proper medical treatment she resorted to stimulants and morphine.

The hospital physician discovered that her primary trouble was an affection of the womb, which could readily have been cured in the first stages. If when she had first felt those severe pains in the back, the terrible headaches, the constant sense of fullness, soreness and pain in the pelvic region, she had heeded the warning that serious trouble was in store, and commenced a regular treatment with the Pinkham Remedies, as did Mrs. Rober of Chicago, whose letter follows, the polypos in the womb would have been dissolved and passed away, and to-day she would have been a well woman. Why will women let themselves drift along into terrible suffering and sickness in this way, when there is monumental proof that Lydia E. Pinkham's Vegetable Compound is daily relieving thousands of women from this very trouble? There is no excuse for any woman who suffers to go without help. Mrs. Pinkham is very glad indeed to give her personal advice to any one who will write for it, and the following letter simply goes to prove that the Vegetable Compound will positively cure female ills:

"Since the birth of my baby I suffered from womb trouble, backache,

irregular menstruation, also intense nervousness.

"After trying different remedies with no relief I was induced to try Lydia E. Pinkham's Vegetable Compound. To my surprise and delight I found after taking my first bottle very great improvement. I continued its use and it has made me a well woman.

"I am so grateful to you for my recovery that I wish to thank you, and if this testimonial will be of any use to other suffering women, you have my full permission to publish it."—Mrs. MARY ROBER, 5492 Ellis Ave., Chicago, Ill.—\$5000 forfeit if original of above letter proving genuineness cannot be produced.

Free Medical Advice to Women.

Women suffering from any form of female weakness are invited to promptly communicate with Mrs. Pinkham, at Lynn, Mass. All letters are received, opened, read and answered by women only. A woman can freely talk of her private illness to a woman; thus has been established the eternal confidence between Mrs. Pinkham and the women of America which has never been broken. Out of the vast volume of experience which she has to draw from it is more than possible that she has gained the very knowledge that will help your case. She asks nothing in return except your goodwill, and her advice has relieved thousands. Surely any woman, rich or poor, is very foolish if she does not take advantage of this generous offer of assistance.

The Real Question.
She—Now the question is, where shall we elope to?
He—Oh, no! The question is, where shall we come back to?—Puck.

The Modern Cruiser.
"What's the use of cruisers, papa?"
"The principal use of cruisers, my son, is drinking healths and firing salutes."—Cleveland Plain Dealer.

A Bad Fix
