

ROYAL Baking Powder

ABSOLUTELY PURE

Healthful cream of tartar, derived solely from grapes, refined to absolute purity, is the active principle of every pound of Royal Baking Powder.

Hence it is that Royal Baking Powder renders the food remarkable both for its fine flavor and healthfulness.

No alum, no phosphate—which are the principal elements of the so-called cheap baking powders—and which are derived from bones, rock and sulphuric acid.

What King Peter Must Stand.

Among the divine rights of the king of Serbia is not immunity from press criticism, and the newspapers of that country are somewhat emphatic in their language. One of them says:

"Abominable polypus! Our unfortunate land is at last in the grasp of your sanguinary claws, but we will shake it free!"

"Murder and govern, monster! You went to Switzerland to study and returned a criminal. This is the morality you have brought us from Geneva."

"Reptile! Seest thou not the looks of hate that follow thee in the streets? Fearest thou not the hand fated one day to wring thy cursed neck?"

"Otdajbina" says: "The article in which we said, 'Flushed with blood, you appeared in our midst reeking with alcohol,' has been pronounced wrongfully suppressed by the court, as it contains no malignment of King Peter. Our mild and just exposition of facts as they are shall therefore continue."

Sunday Funerals.

Cardinal Gibbons has signed a petition prepared by the Baltimore Hack Drivers' association against the holding of Sunday funerals and has promised to give his aid also in preventing weddings on Sunday at which carriages are used. The hack drivers have also enlisted the aid of many clergymen of various denominations as well as of all undertakers. The petition reads that only in case of necessity, like death from contagious disease, shall bodies be buried on Sunday.

Making New Rubber Plants.

From a rubber plant which is growing in a living room, the best way to get plants is by scoring the bark of the limb where you want the roots to grow and covering the injury with sphagnum moss, which must always be kept damp. Roots will soon permeate the moss, when the limb should be cut off and potted.—Garden Magazine.
