

All Humors

Are impure matters which the skin, liver, kidneys and other organs cannot take care of without help.

Pimples, boils, eczema and other eruptions, loss of appetite, that tired feeling, bilious turns, fits of indigestion, dull headaches and many other troubles are due to them. They are removed by

Hood's Sarsaparilla

In usual liquid form or in chocolate tablets known as **Sarsatabs**. 100 doses \$1.

Next.

"Step up and take your medicine!"

"Twas Uncle Sam that spoke it. And now the tobacco trust will please Put that in its pipe and smoke it."

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Choice of Terms.

"Is Mr. Bilgins a good golf player?" "No," answered Miss Chayenne. "I happened to be sufficiently near to hear his language when he made a bad stroke. He may be an expert player, but he is not a good one."—Washington Star.

FITS St. Vitus' Dance and all Nervous Diseases permanently cured by Dr. Kline's Great Nerve Restorer. Send for FREE \$2 trial bottle and treatise. Dr. H. H. Kline, Ltd., 261 Arch St., Phila., Pa.

Its Outer Approach.

"The way to a man's heart is through his stomach."

"Yes, my dear, but his teeth have something to do with it. A girl friend of mine once lost a promising young man by giving him a cut of cherry pie of her own making. She had left the seeds in it."

Shake Into Your Shoes

Allen's Foot-Ease. A powder. It makes tight or new shoes feel easy. It is a certain cure for sweating, callouses and hot, tired, aching feet. Sold by all Druggists. Price 25c. Trial package mailed FREE. Address Allen S. Olmsted, Lektroy, New York.

Privileged.

Japan was asked if it considered the presence of American craft in the Pacific objectionable.

"Not altogether," it responded, pleasantly; "we accord you freedom to run all the boats necessary between San Francisco and Oakland."

With a grateful heart Uncle Sam realized that the threatened trouble was not to eventuate.—Philadelphia Ledger.

Habitual Constipation

May be permanently overcome by proper personal efforts with the assistance of the one truly beneficial laxative remedy, Syrup of Figs and Elixir of Senna, which enables one to form regular habits daily so that assistance to nature may be gradually dispensed with when no longer needed as the best of remedies, when required, are to assist nature and not to supplant the natural functions, which must depend ultimately upon proper nourishment, proper efforts, and right living generally. To get its beneficial effects, always buy the genuine

Syrup of Figs and Elixir of Senna manufactured by the **CALIFORNIA FIG SYRUP CO.** ONLY SOLD BY ALL LEADING DRUGGISTS one size only, regular price 50¢ per bottle.

COLLEGE BROADENS WORK.

Additional Agricultural Specialties Are Added at Corvallis.

Agriculture is being given more prominence this year at the Oregon Agricultural college. There has been a re-organization of the work and additional agricultural specialists have been added to the faculty. There will now be four men instead of two devoting their time exclusively to livestock, dairying, field crops and poultry. It is hoped to add still further to the agricultural staff at the college so that the Oregon institution may fully meet the demands of the farmers of the state for competent direction along agricultural lines.

Dr. James Withycombe, in addition to his duties as director of the experiment station, will have charge of the animal husbandry work of the college and station. Professor F. L. Kent, heretofore assistant agriculturist, has been made professor of dairying and will give his full time to that subject.

Professor H. L. Scudder, of the Agricultural college of Kansas, has been selected to fill the new chair of agronomy, and his work will be along the line of field crops and farm machinery. Professor Scudder is a graduate of the Illinois college of agriculture, and after leaving college spent some time in the employ of the United States department of agriculture, his work taking him into nearly every agricultural region of the West. In California he made an extensive study of irrigation and soil cultivation. Professor Scudder will be of great assistance to the farmers of the state as well as to the students in the class room.

For the new department of poultry husbandry James Dryden was selected. The poultry industry is a great wealth producer in this state, and the college proposes to aid in its development by the dissemination of information on better methods and in the investigation of problems connected with poultry keeping. Professor Dryden comes from the Utah Agricultural college where his experimental work was so successful as to bring the Utah station international recognition for its poultry work. He spent some time at the Montana station in establishing a poultry department, and from there went to New York state to start a poultry farm for the Cyphers Incubator company, returned to the Utah station last year upon being offered superior inducements. He believes there is room for great development of poultry husbandry in Oregon.

THE STATE FAIR.

Exhibits, While Creditable, Did Not Do State Justice.

The Oregon State fair was a creditable showing of the products of the state. The county exhibits, though not as numerous as they should have been, showed a great profusion of products of the highest excellence. The people of the state don't half appreciate the state and its marvelous resources. It is doubtful if any other county in any other state of the Union could show such a great variety of products of such high quality as any one of the county exhibits at the Salem fair.

The Agricultural college exhibit was an educator. The exhibit from the Eastern Oregon experiment station was most striking showing of the agricultural resources of that section. The livestock exhibit on the whole was worthy of the state. The draft and coach horses made a splendid showing. A good showing was made by dairy cattle, but hardly enough of dairy products. Of beef animals the exhibit was not as large as it should be, but some fine animals were shown. The swine exhibit was most creditable. The sheep exhibit was good, but many of the sheep were not in show condition. The poultry building was well patronized and the exhibit was fairly good. The almost entire absence of farm machinery was noticeable. A strong exhibit of farm machinery should be a feature of every good fair.

Willamette Valley's Reputation.

The Willamette valley has a reputation all over our country as one of the most productive regions in the world. That reputation seems to have been based on past achievements rather than on its present day farming. This is not true of all sections of the valley, but as a whole the valley is not producing one-half of what it might easily produce by the same expenditure of labor.

With a soil of great native fertility and with a climate suited to the highest production, it would look as though there were no excuse for a crop of wheat yielding less than thirty bushels an acre, and the writer has seen a yield of less than fifteen bushels.

The trouble is that the Willamette valley has been farmed for fifty years with little or no effort made to give back to the soil the fertility that years of successive cropping has taken away.

Had more clover and alfalfa been grown, the Willamette valley might still be the wonder and admiration of the world. While a crop of wheat or other grains leaves the soil poorer, a crop of clover or alfalfa actually leaves it richer. This lesson does not seem to have been well learned in the "Famous Willamette Valley."

PALMY SHEEP DAYS ARE OVER.

Great Flocks Near Ellensburg a Thing of the Past.

Sheep raising in the Yakima section is undergoing important changes, due to conditions which have arisen in the last 10 years. While it still continues an important industry in Kittitas county and other parts of the Yakima valley, it is not carried on so extensively as a few years ago, and the number of sheep growers is materially decreasing. The ranges are being gradually diminished by the reclamation service and by the forest reserve policy of the government, which is eliminating much of the range from public use. J. C. Lloyd, an extensive sheep grower of this county, estimates that not more than 25,000 lambs will be shipped to Eastern markets this year from the country between Ellensburg and Pasco, whereas five years ago over 200,000 head were shipped yearly. This is partly due, however, he says, to the fact that more lambs are now shipped to the coast than a few years ago, although the total shipments there this year, he thinks, will not exceed 50,000. "The range is being so diminished," said Mr. Lloyd, "that none but those who own their land can afford to raise sheep in any quantities. Much of the former range is being converted into good farming land through irrigation, and the forest reserve policy of the government is shutting the sheep raiser out of a large part of the range. I should say that the elimination of this land by the government has cut down the number of sheep on that land by as much as 25 per cent."

"The sheep in this section are being raised as much for mutton now as for wool, and there is a greater demand for good mutton than there used to be. The price, too, has advanced, which makes it a profitable business to pursue."

Oregon Irrigation Congress.

The first irrigation congress of Oregon was held at Grants Pass on September 10 and 11. At the close of the session a permanent organization was effected, with Dr. Withycombe, of the Oregon Agricultural college, as president; Mr. C. W. Mallett, of Vale, Oregon, as vice president, and Mr. O. S. Blanchard, of Grants Pass, as secretary. It is proposed to hold annual meetings to discuss irrigation and forestry problems. A committee was appointed to confer with the committee of the Forestry association with a view to merging the two organizations. It was felt that irrigation and forestry had interests in common. Much good should come from this organization.

Western Apples Best.

The official report of the department of Agriculture on the condition of the apple crop on September 1 fully confirms earlier estimates of a poor apple crop throughout the United States. The average condition is reported as 34.7 per cent. Few if any of the states have an average crop. The Pacific states show up best—California 75 per cent, Oregon 70 per cent, Washington 88 per cent. The Middle states are the poorest, the lowest of all being Kansas, which is 2 per cent, and Missouri, which is 9 per cent. The report is a good advertisement for Oregon and Washington. It will serve to direct further attention to this territory as a favorable apple country.

The contract has been let for the construction of a college barn at the Oregon Agricultural college. This will be one of the most complete barns at any of the colleges, and will help the livestock and dairy work greatly.

Farmers might help solve the freight car shortage by keeping more poultry, feeding the grain to the chickens and send the eggs to market by express or team.

Devotion.

"Dear," said the wife, "I really don't believe you would marry again if you were to lose me."

"Oh, I'm devoted enough," replied the husband, "but there are others." "I wasn't thinking of that," she replied sweetly, "but that I don't know another woman who would have you."—Philadelphia Ledger.

Real Philosophy.

"A real philosopher," said Uncle Eben, "kin allus find sumpin' to be glad about. I used to know a man dat found a heap o' satisfaction in his wooden leg, 'cause it lef' him dat much less room fo' de rheumatism."—Washington Star.

Goes Without Saying.

Conan Doyle had just notified Sherlock Holmes of his approaching marriage. "Of course," he said, "I need not tell you that I have selected you as my best man. The position naturally belongs to you."

"Quite so," assented Sherlock Holmes, absent munchedly shooting a charge of dose into his left arm.

Not Encouraging.

"I have made up my mind," said Mr. Timmid, "that I shall speak to your father soon."

"Yes," replied the dear girl, "father said he thought you would and he also said if you truly loved me you'd take out an accident-insurance policy in my favor."—Philadelphia Press.

OLD SORES FED AND KEPT OPEN BY IMPURITIES IN THE BLOOD

Whenever a sore refuses to heal it is because the blood is not pure and healthy, as it should be, but is infected with poisonous germs or some old blood taint which has corrupted and polluted the circulation. Those most usually afflicted with old sores are persons who have reached or passed middle life. The vitality of the blood and strength of the system have naturally begun to decline, and the poisonous germs which have accumulated because of a sluggish and inactive condition of the system, or some hereditary taint which has hitherto been held in check, now force an outlet on the face, arms, legs or other part of the body. The place grows red and angry, festers and eats into the surrounding tissue until it becomes a chronic and stubborn ulcer, fed and kept open by the impurities with which the blood is saturated. Nothing is more trying and disagreeable than a stubborn, non-healing sore. The very fact that it resists ordinary remedies and treatments is good reason for suspicion; the same germ-producing cancerous ulcers is back of every old sore, and especially is this true if the trouble is an inherited one. Washes, salves, nor indeed anything else, applied directly to the sore, can do any permanent good; neither will removing the sore with caustic plasters or the surgeon's knife make a lasting cure. If every particle of the diseased flesh were taken away another sore would come, because the trouble is in the blood, and the **BLOOD CANNOT BE CUT AWAY**. The cure must come by a thorough clearing of the blood. In S. S. S. will be found a remedy for sores and ulcers of every kind. It is an unequalled blood purifier—one that goes directly into the circulation and promptly cleanses it of all poisons and taints. It gets down to the very bottom of the trouble and forces out every trace of impurity and makes a complete and lasting cure. S. S. S. changes the quality of the blood so that instead of feeding the diseased parts with impurities, it nourishes the irritated, inflamed flesh with healthy blood.

I was afflicted with a sore on my face of four years' standing. It was a small pimple at first but it gradually grew larger and worse in every way until I became alarmed about it and consulted several physicians. They all treated me but the sore continued to grow worse. I saw S. S. S. advertised and commenced its use and after taking it a while I was completely cured. My blood is now pure and healthy from the effect of S. S. S., and there has not been any sign of the sore since S. S. S. cured it.

THOS. OWEN

West Union, Ohio.

S.S.S. PURELY VEGETABLE

Then the sore begins to heal, new flesh is formed, all pain and inflammation leaves, the place scabs over, and when S. S. S. has purified the blood the sore is permanently cured. S. S. S. is for sale at all first class drug stores. Write for our special book on sores and ulcers and any other medical advice you desire. We make no charge for the book or advice.
