

The Modesty of Women

Naturally makes them shrink from the indecicate questions, the obnoxious examinations, and unpleasant local treatments, which some physicians consider essential in the treatment of diseases of women. Yet, if help can be had, it is better to submit to this ordeal than let the disease grow and spread. The trouble is that so often the woman undergoes all the annoyance and pain for nothing. Thousands of women who have been cured by Dr. Pierce's Favorite Prescription write in appreciation of the cure which dispensed with the examinations and local treatments. There is no other medicine so sure and safe for delicate women as "Favorite Prescription." It cures debilitating drains, irregularity and female weakness. It always helps. It almost always cures. It is strictly non-alcoholic, non-secret, all its ingredients being printed on its bottle-wrapper; contains no deleterious or habit-forming drugs, and every native medicinal root entering into its composition has the full endorsement of those most eminent in the several schools of medical practice. Some of these numerous and strongest of professional endorsements of its ingredients, will be found in a pamphlet wrapped around the bottle, also in a booklet mailed free on request, by Dr. R. V. Pierce, of Buffalo, N. Y. These professional endorsements should have far more weight than any amount of the ordinary lay, or non-professional testimonials.

The most intelligent women now-a-days insist on knowing what they take as medicine instead of opening their mouths like a lot of young birds and gulping down whatever is offered them. "Favorite Prescription" is of known composition. It makes weak women strong and sick women well.

Dr. Pierce's Medical Adviser is sent free on receipt of stamps to pay expense of mailing only. Send to Dr. R. V. Pierce, Buffalo, N. Y., 21 one-cent stamps for paper-covered, or 31 stamps for cloth-bound. If sick consult the Doctor, free of charge by letter. All such communications are held sacredly confidential.

Dr. Pierce's Pleasant Pellets invigorate and regulate stomach, liver and bowels.

FEEDING HOGS.

Clean Food of the Utmost Importance in Hot Weather.

Every farmer knows that clean food for hogs is of the utmost importance, especially in hot weather. Still a great many will often permit the swill barrel to become filthy. This is very dangerous to the health of the hogs during summer. Doubtless diseases often start among many hogs from this source, says a writer in American Agriculturist. There are many ills that affect hogs besides hog cholera, although some may think that hog cholera is the only thing to be guarded against. By the decay of vegetable and fleshy matter various poisons are elaborated, and we must guard against these as well as hog cholera. There is no doubt that animals as well as human beings are often killed by ptomaine poisoning.

Avoid Rotten Swill.

Rotten swill is unfit for hogs as certainly as other rotting food. Some feed their hogs whey brought from the cheese factory. Often, as factory men know, the whey tanks are very dirty, not having been cleaned perhaps for months. The farmers who use this whey should make such a vigorous protest against dirty tanks that the factory men will see that they are cleaned often.

Some of the factories do not even have tanks, but have a row of barrels near the factory buildings, into which the whey is run. These are allowed to become almost putrid in the hot sun of summer. They swarm with flies, which may have been visiting the carcasses of dead hogs in the pastures of adjoining farms. Sometimes these hogs have died of cholera and sometimes of other contagious diseases. It is not a difficult matter to clean barrels often, and this should be done. It is all the easier to do if the cheese factory has a steam pipe from which a hose can conduct the steam into the barrels.

Protection Against Disease.

If disease is to be kept off the farm, food of the hogs must be carefully watched, at least in summer. The matter is not so important in winter, as the flies are not carrying germs from one place to another, and contagious diseases will not spread with the same rapidity. Animals take in disease germs mostly through their respiratory organs or through the organs devoted to the elaboration of food. If the food is protected, much will be gained in the way of protection against disease.

He Sure Was a Man!

When William Allen rose up in the early seventies and surprised the country by being elected governor of Ohio on the Democratic ticket one of the obstacles he triumphed over was the charge of being an old man. He addressed a great meeting at Mozart hall in Cincinnati the night following the day in which this ill advised charge had been brought against him by a responsible Republican leader. Strong, vigorous and well preserved as he was and retaining unbroken that quality of voice which had designated him as "Foghorn Allen" when he was in the senate, he was still politician enough to use it for all it was worth to him. After stating the charge in all its helmsness he straightened himself to his full height of more than six feet and, beginning in a loud voice, asked, "Am I a man?" The next question was in a voice pitched a scale higher and asked, "Do I look like a man?" But the third, in which he put out all of his tremendous vocal power, thundered to shake the roof in roaring, "Do I talk like a man?" The audience was thrilled. Such high physical power in a man of that age appealed to it irresistibly.—St. Louis Globe-Democrat.

Wrecked by a Whale.

While cruising in the south seas the whaler Essex was furiously attacked by a cow sperm whale supposed to have been the mother of a calf which had just been harpooned. The whale had not been wounded herself, and her attack was very determined. At her first rush she passed under the Essex and carried away a great length of her false keel; then, coming to the surface a considerable distance away, she appeared to take bearings and deliberately charged the vessel again, ramming her with such violence that she stove in the bows, while the ship rolled so heavily that the captain thought she must be dismasted. The case is memorable because the crew had to abandon the vessel, and one boat was never heard of again.—Bally's Magazine.

If a cough once gets into your system it acts on every muscle and fibre of the body and makes you ache all over. It especially affects the intestines and makes you constipated, so in order to get rid of a cold thoroly and without delay you should not take anything that will tend to constipate. Kennedy's Laxative Cough Syrup acts upon the bowels and thereby drives the cold out of the system. It contains no opiates—it is pleasant to take and is highly recommended for children. It is very important and in fact it is absolutely necessary to health that we give relief to the stomach promptly at the first sign of trouble—whice are belching of gas, nausea, sour stomach, headache, irritability and nervousness. These are warnings that the stomach has been mistreated; it is doing too much work and it is demanding help from you. Take something once in a while, especially after meals; something like Kodol for Dyspepsia and Indigestion. It will enable your stomach to do its work properly. Sold by Brewer Drug Co.
