

Bad Symptoms.

The woman who has periodical headaches, backache, sees imaginary dark spots or specks floating or dancing before her eyes, has gnawing distress or heavy full feeling of stomach, faint spells, dragging-down feeling in lower abdominal or pelvic region, easily startled or excited, irregular or painful periods, with or without pelvic catarrh, is suffering from weakness and derangements that should have early attention. Not all of above symptoms are likely to be present in any case at one time.

Neglected or badly treated and such cases often run into maladies which demand the surgeon's knife if they do not respond to medicine.

No medicine extant has such a long and numerous record of cures in such cases as Dr. Pierce's Favorite Prescription. No medicine has such a strong professional endorsement of each of its several ingredients—worth more than any number of ordinary non-professional ingredients. The very best ingredients known to medical science for the cure of woman's peculiar ailments enter into its composition. No alcohol, harmful or habit-forming drug is to be found in the list of its ingredients printed on each bottle-wrapper and attested under oath.

In any condition of the female system, Dr. Pierce's Favorite Prescription can do only good—never harm. Its whole effect is to strengthen, invigorate and regulate the whole female system and especially the pelvic organs. When these are deranged in function or affected by disease, the stomach and other organs of digestion become sympathetically deranged, the nerves are weakened, and a long list of bad, unpleasant symptoms follow. Too much must not be expected of this "Favorite Prescription." It will not perform miracles; will not cure tumors—no medicine will. It will often prevent them, if taken in time, and thus the operating table and the surgeon's knife may be avoided.

Women suffering from diseases of long standing, are invited to consult Doctor Pierce by letter, free. All correspondence is held as strictly private and sacredly confidential. Address Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Pierce's Medical Adviser (1000 pages) is sent free on receipt of 21 one-cent stamps for paper-covered, or 31 stamps for cloth-bound copy. Address as above.

Kipling at Work.

"I have lounged in Rudyard Kipling's den at Brattleboro, Vt., before he deserted America for England and saw him at his work. He sat at his table in a revolving chair. I had a book in my hand and said nothing unless I was spoken to, for I was enjoying a great privilege that was granted to no one else but his wife. He would write for a moment, perhaps for ten or fifteen minutes at a time. If he was writing verses he would hum very softly to himself an air which probably kept the rhythm in his mind. When writing prose, he was silent, but often he would lay down his pen, whirl round in his chair and chat for awhile. It might be something relating to the subject he was treating or bear no relation to it. Suddenly he would wheel back again, and his pen would fairly fly over the paper. He can easily concentrate his thoughts and as easily descend from cloud land to the commonplace of the day, though in his mind and on his lips nothing is ever commonplace. Some of his poems he has written when speeding in a Pullman car at the rate of sixty miles an hour."—Pacific Monthly.

Birds Shot With Water.

Shooting a humming bird with the smallest bird shot made is out of the question, for the tiniest seeds of lead would destroy his coat. The only way in which the bird can be captured for commercial purposes is to shoot him with a drop of water from a blowgun or a fine jet from a small syringe. Skillfully directed, the water stuns him. He falls into a silken net and before he recovers consciousness is suspended over a cyanide jar. This must be done quickly, for if he comes to his senses before the cyanide whiff snuffs out his life he is sure to ruin his plumage in his struggles to escape. Humming birds vary in size from specimens perhaps half as large as a sparrow to those scarcely bigger than a bee. The quickest eye cannot follow them in full flight. It is only when, though still flying furiously, they are practically motionless over flowers that the best marksman can bring them to earth.—New York Press.

The Feeding of Dogs.

"No dog kept indoors and indeed very few outside should be fed on meat nor should he be fed from the table at mealtimes, as he will soon become a nuisance, especially when there are visitors. If he is always fed at the conclusion of a certain meal—dinner, for instance—he will wait patiently until the prescribed time. It is a good plan to feed after one's midday meal, giving plenty of green vegetables, bread and potatoes, with a very few scraps of finely cut meat, the whole well mixed and some gravy poured over it. If two meals are given, one should be at breakfast time and one in the evening. One should consist of only a little oatmeal and milk or a piece of dry dog biscuit.

"At no time should the dog have more than he will eat, and if he leaves anything on his plate except the pattern his allowance should be reduced or a meal omitted."—Suburban Life.

Good Trade.

"Oh, my business is good," said the trombone player. "In fact, I am always blowing about it."

"Well, I'm sooted with mine, too," said the chimney sweep.

"And mine is out of sight," said the liver.

Do one thing at a time and the big things first.—Lincoln.

The Secret of a Beautiful Face

lies in keeping the skin protected as well as cleansed. Just washing is not enough—that only leaves the delicate surface more exposed to the irritation of dust and germs; to merciless attacks of sun and weather. After washing, apply Robertine and experience its delightful refreshment. You will admire the lineless softness it imparts to face, neck and arms. It not only stimulates a radiant glow, but protects the skin from becoming coarse. Prevents burning, tan and freckles.
