

# The Firm of Girdlestone

BY  
A. CONAN DOYLE

## CHAPTER V.—(Continued.)

"Now supposing," continued the senior partner, with a smile on his thin lips, "that such a report got about. Suppose, too, that we were at this time, when the market was in a depressed condition, to invest several thousand pounds in them. If these rumors of an alleged discovery turned out to be entirely unfounded, of course the value of the stones which we held would go up once more, and we might very well sell out for double or treble the sum that we invested. Don't you see the sequence of events?"

"There seems to me to be rather too much of the suppose in it," remarked Ezra. "How do we know that such rumors will get about; and if they do, how do we know that they will prove to be unfounded?"

"How are we to know?" the merchant cried, wriggling his long lank body with amusement. "Why, my lad, if we spread the rumor ourselves we shall have pretty good reason to believe that they are unfounded. Eh, Ezra! Ha! ha! You see there are some brains in the old man yet."

Ezra looked at his father in considerable surprise and some admiration. "Why," he exclaimed, "it's dishonest. I'm not sure that it's not actionable."

"Dishonest! Poo!" The merchant snapped his fingers. "It's finesse, my boy, commercial finesse. Who's to trace it, I should like to know. I haven't worked out all the details—I want your co-operation over that—but here's a rough sketch of my plan. We send a man we can depend upon to some distant part of the world, Chimborazo, for example, or the Ural Mountains. It doesn't matter where, as long as it is out of the way. On arriving at this place our agent starts a report that he has discovered a diamond mine. We should even go the length, if he considers it necessary, of hiding a few rough stones in the earth, which he can dig up to give color to his story. Of course the local press would be full of this. He might present one of the diamonds to the editor of the nearest paper. In course of time a pretty colored description of the new diamond fields would find its way to London and thence to the Cape. I'll answer for it that the immediate effect is a great drop in the price of stones. We should have a second agent at the Cape diamond fields, and he would lay our money out by buying in all that he could while the panic lasted. Then, the original scare having proved to be all a mistake, the prices naturally go up once more, and we get a long figure for all that we hold. That's what I mean by 'making a corner in diamonds.' There is no room in it for any miscalculation."

"It sounds very nice," his son remarked, thoughtfully. "I'm not so sure about its working, though."

"It must work well. As far as human calculation can go there is no possibility of failure. Besides, my boy, never lose sight of the fact that we shall be speculating with other people's money. We ourselves have nothing to lose, absolutely nothing."

"I am not likely to lose sight of it," said Ezra angrily, his mind coming back to his grievance.

"I reckon that we can raise from forty to fifty thousand pounds without much difficulty. My name is, as you know, as good as that of any firm in the city. For nearly forty years it has been above stain or suspicion. If we carry on our plans at once, and lay this money out judiciously, all may come right."

"It's Hobson's choice," the young man remarked. "We must try some bold stroke of the sort. Have you chosen the right sort of men for agents? You should have men of some standing to set such reports going. They would have more weight then."

John Girdlestone shook his head dejectedly. "How am I to get a man of any standing to do such a piece of business?" he said.

"Nothing easier," answered Ezra with a cynical laugh. "I could pick out a score of impudent fellows from the clubs who would be only too glad to earn a hundred or two in any way you can mention. I shall go myself to the diamond fields. As to our other agent, I have the very man, Major Tobias Clutterbuck. He is a shrewd, clever fellow, and he's always hard up. His social rank would be a great help to our plan. I'll answer for his jumping at the idea."

"Sound him on the subject, then," said Ezra.

"I will."

"I am glad," said the old merchant, "that you and I have had this conversation, Ezra. The fact of my having speculated without your knowledge, and deceived you by a false ledger, has often weighed heavily upon my conscience, I assure you. It is a relief to me to have told you all."

"Drop the subject, then," Ezra said, curtly. "I must put up with it, for I have no redress. The thing is done and nothing can undo it, but I consider that you have willfully wasted the money."

"Believe me, I have tried to act for the

best. The good name of our firm is everything to me. I have spent my whole life in building it up, and if the day should come when it must go, I trust that I may have gone myself. There is nothing which I would not do to preserve it."

"I see they want our premiums," Ezra said, glancing at the open letter upon the table. "How is it that none of those ships go down? That would give us help."

"Hush! hush!" John Girdlestone cried, imploringly. "Speak in a whisper when you talk of such things."

"I can't understand you," said Ezra, petulantly. "You persistently over-insure your ships, year after year. Look at the Leopard; it is put at more than twice what she was worth as new. And the Black Eagle, I dare say, is about the same. Yet you never have an accident with them, while your two new uninsured clippers run each other down."

"Well, what more can I do?" replied the merchant. "They are thoroughly rotten. I have done nothing for them for years. Sooner or later they must go. I cannot do any more."

"I'd make 'em go down quick enough," muttered Ezra with an oath. "Why don't you make old Miggs bore a hole in them, or put a light to a barrel of paraffin? The thing's done every day. What's the use of being milk-and-water about it?"

"No, no, Ezra!" cried his father. "Not that, not that. It's one thing letting matters take their course, and it is another thing giving positive orders to scuttle a ship. Besides, it would put us in Miggs' power. It would be too dangerous."

"Please yourself," said Ezra with a sneer. "You've got us into the mess and you must take us out again. If the worst comes to the worst I'll tell you what I'll do. I'll marry Kate Harston, wash my hands of the firm, leave you to settle matters with the creditors, and retire with the forty thousand pounds," with which threat the junior partner took up his hat and swaggered out of the office.

After his departure John Girdlestone spent an hour in anxious thought, arranging the details of the scheme which he had just submitted to his son. As he sat his eye chanced to fall upon the two letters lying on his desk, and it struck him that they had better be attended to. It did not suit his plans to fall back upon his credit just yet. It has been already shown that he was a man of ready resource. He rang the bell and summoned his senior clerk.

"Good morning, John," he said affably.

"Good morning, Mr. Girdlestone, good morning, sir," said wizened little John Gilray, rubbing his thin yellow hands together, as a sign of his gratification.

"I hear, John, that you have come into a legacy lately," Mr. Girdlestone said.

"Yes, sir. Fifteen hundred pounds, sir."

"What have you done with the money, John?"

"Banked it, sir, in the United Metropolitan."

"In the United Metropolitan, John? Let me see. Their present rate of interest is four and a half?"

"Four, sir," said John.

"Four! Dear me, John, that is poor interest, very poor indeed. It is most fortunate that I made these inquiries. I was on the point of drawing fourteen hundred pounds from one of my correspondents as a temporary convenience. For this I should pay him five per cent. I have no objection, John, as you are an old servant of the firm, to giving you the preference in this matter. I cannot take more than fourteen hundred—but I shall be happy to accommodate you up to that sum at the rate named."

John Gilray was overwhelmed by this thoughtful and considerate act. "It is really too generous and kind, sir," he said. "I don't know how to thank you."

"Don't mention it, John," the senior partner said grandly. "The firm is always glad to advance the interests of its employees in any reasonable manner. Have you your check book with you? Fill it up for fourteen hundred. No more, John. I cannot oblige you by taking any more."

John Girdlestone's private residence in Eccleston square was a large and substantial house in a district which the wave of fashion had passed over in its westward course. The building was stately and hard, and massive in its external appearance, but the interior was luxury itself, for the old merchant had a due appreciation of the good things of this world. Indeed there was an oriental and almost barbarous splendor about the great rooms, where the richest furniture was interspersed with skins from the Gaboon, hand-worked ivory from Old Calabar, and the thousand other strange valuables which were presented by his agents to the African trader.

After the death of his friend, Girdlestone had been as good as his word. He had taken Kate Harston away from the desolate house at Fulham and brought her to live with him. From the garrets of that palatial edifice to the cellars she was at liberty to roam where she would, and do what she chose. No cares or responsibilities were imposed upon her. The domestic affairs were superintended by a stern housekeeper, who arranged every detail of housekeeping. The young girl had apparently only to exist and to be happy.

John Girdlestone had been by no means overjoyed upon the return of the Dimsdales from Edinburgh to learn that his ward had been thrown into the company of her young cousin. He received her coldly, and forbade her to visit Phillimore Gardens for some time to come. He even took the precaution of telling of a confidential footman to walk behind her on all occasions, and to act either as an escort or as a sentry.

It chanced, however, that one day, a few weeks after her return, Kate found an opportunity of recovering her freedom. The footman had been dispatched upon some other duty. So she bethought herself that a book was to be bought, and

some lace to be matched, and several other important feminine duties to be fulfilled. It happened, however, that as she walked sedately down Warwick street her eyes fell upon a very tall and square-shouldered young man, who was lounging in her direction, tapping his stick listlessly against the railings, as if the habit of idle men. At this Kate forgot incontinently all about the book and the lace, while the tall youth ceased to tap the railings, and came striding towards her with long springy footsteps and a smiling face.

"Why, Cousin Tom, who would have thought of meeting you here?" she exclaimed, when the first greetings had been exchanged. "It is a most surprising thing." It is possible that the incident would not have struck her as so very astonishing after all, had she known that Tom had spent six hours a day for the last fortnight in blockading the entrances to Eccleston square.

"Most remarkable!" said the young hypocrite. "You see I haven't anything to do yet, so I walk about London a good deal. It was a lucky chance that sent me in this direction."

"And how is the doctor?" Kate asked eagerly. "And Mrs. Dimsdale, how is she? You must give my love to them both."

"How is it that you have never been to see us?" Tom asked reproachfully.

"Mr. Girdlestone thinks that I have been too idle lately, and that I should stay at home. I am afraid it will be some little time before I can steal away to Kensington."

Tom consigned her guardian under his breath to a region warmer even than the scene of that gentleman's commercial speculations. "Which way are you going?" he asked.

"I was going to Victoria street to change my book, and then to Ford street."

"What a strange thing!" the young man exclaimed, "was going in that direction too." It seemed the more strange as he was walking in the opposite direction when she met him. Neither seemed inclined to make any comment upon the fact.

As they walked on, threading their way among the vehicles, Tom took his companion's hand in his, and they exchanged one firm grip, which each felt to be of the nature of a pledge. How sunny and bright the dull brick-lined streets seemed to those two young people that afternoon. They were both looking into a future which seemed to be one long vista of happiness. So light-hearted were these two lovers that it was not until they found themselves in Warwick street once more that they came down from the clouds, and realized that there were some commonplace details which must be dealt with in one way or another.

"Of course, I may tell my own people, dearest, about our engagement?" Tom said.

"I wonder what your mother will say?" answered Kate laughing merrily. "She will be awfully astonished."

"How about Girdlestone?" asked Tom. The thought of the guardian had never occurred to either of them before. They stared at each other and Kate's face assumed such an expression of dismay that her companion burst out laughing.

"Don't be frightened, darling," he said. "If you like I'll go in and beard the lion in his den. There is no time like the present."

"No, no, dear Tom," she cried eagerly. "You must not do that." It was impossible for her to tell him how especially Girdlestone had cautioned her against him, but she felt that it would never do to allow the two to meet. "We must conceal our engagement from Mr. Girdlestone."

"Conceal our engagement!"

"Yes, Tom. He has warned me so often against anything of the sort, that really I don't know what he would do if he knew about it. He would certainly make it very uncomfortable for me to live with him. Remember I am nearly twenty now, so in a little more than a year I shall be entirely free. That is not very long."

"I don't know about that," Tom said, doubtfully. "However, if you will be more comfortable, of course, that settles the question. It seems rather hard, though, that we should have to conceal it, simply in order to pacify this old bear."

"It's only for a time, Tom; and you may tell them at home by all means. Now, good-by, dear, they will see you from the windows if you come nearer."

"Good-by, my darling." They shook hands and parted, he hurrying away with the glad tidings to Phillimore Gardens, she tripping back to her captivity with the lightest heart that she had felt for a weary time. Passers-by glanced back at the bright little face under the bright little bonnet, and Ezra Girdlestone looking down at her from the drawing room window, bethought him that if the diamond speculation should fail it would be no hardship to turn to his father's ward.

(To be continued.)

### Charge It in the Bill.

"Doctor," said a shrewd-looking man, "how many feet of gas does it take to kill a man?"

"That's a queer question," replied the doctor. "Why do you wish to know?"

"One of the guests in my hotel used enough of it to kill himself, and I want to send in a proper bill to his executors."—London Tit-Bits.

### Hindoo Women Smuggled In.

One hundred Hindoo laborers in the frontier towns of British Columbia have been discovered to be women dressed in men's clothing. They are expert woodcutters and the timekeepers say that the women are more painstaking and industrious than their husbands.

### Celery Salad.

Cut crisp celery into small pieces, add to it a little grated onion and two hard-boiled eggs chopped fine; beat well and stir in one-half cup of cream, a teaspoonful of salt, three teaspoonfuls of sugar, half a teaspoonful of mustard made smooth in a little water. Melt half a cup of butter in one cup of vinegar, add the other ingredients, and stir over the fire in a double boiler until it becomes creamy. Whip the whites of the eggs and pour gradually into the dressing, and when ready to serve pour over the celery, which has been kept crisp and cold. This dressing is also very good for cabbage or plain lettuce.

### Bread.

Chop a tablespoonful of shortening into a quart of flour, wet with a quart of warm water, add a tablespoonful of sugar and a half yeast cake, dissolved in a gill of lukewarm water. Beat steadily for ten minutes, then cover and set aside in a warm room over night. In the morning work in two quarts of salted flour and knead for fifteen minutes. Return the dough to the mixing bowl and set to rise until twice its original size. Put the dough on a floured board and knead again for ten minutes, form into loaves, kneading each of these, and set to rise in pans until light, then bake.

### Pineapple Shortcake.

For the cake make rich but soft paste; divide into equal parts; press one-half into a buttered pie plate; spread liberally with butter, and place the other half of the paste on top. Bake in a quick oven. Several hours before serving take a ripe, finely flavored pineapple, peel and shave it in thin slices. Sprinkle with sugar and the juice of one or two lemons, then cover it closely. When it is time to serve the shortcake, split the cake in half; spread the prepared pineapple between the layers and on top of the cake, and serve with sweetened whipped cream.

### Vanilla Blanc Manger.

Boil a pint of milk with a heaping tablespoonful of sugar. When boiling thicken with two even tablespoonfuls of corn starch dissolved in cold water. Stir continuously. When thick remove from stove and beat in ten drops of vanilla. Have ready six after-dinner coffee cups, rinsed out with cool water. In the bottom of each put three preserved strawberries dried of their juice. To the blanc manger add six crumbled macaroons and pour into the cups to form. When cold turn out and serve.

### Keeping Broilers Clean.

Almost every one who broils steak in a gas oven has experienced no small amount of trouble in keeping the broiler spotless and shiny. An easy way out of this is to place the steak on the broiler, and instead of leaving the pan underneath dry, place cold water in it to the depth of two inches. The fat drops into the water and is purified, and may then be skimmed off and used. By this method the pan is never allowed to dry and burn, and the oven is kept free from grease.

### Watered Milk.

A simple and effective test to determine whether water is present in milk may be made with an ordinary knitting needle if the needle is bright and well polished.

Dip the needle into the milk and quickly withdraw it in an upright position. According to Suburban Life, if the milk contains only a small quantity of water this will prevent even a drop of milk adhering to the needle.

### Beef Loaf.

Take two pounds of round steak and half a pound of suet, both chopped fine. Add two eggs, one cup of bread crumbs that have been softened in cold water, one small onion chopped fine, one-half cup of sweet milk, three teaspoonfuls of salt and one-fourth teaspoonful of pepper. Mix all together and shape into a loaf. Bake in a moderate oven an hour or more, basting frequently.

### Baked Beans.

One quart of beans washed over night, one pound of pork, three spoonfuls of molasses. Cut the pork in little pieces, put in deep pot or pan, roast brown like pot roast, then put in the beans, the molasses, pepper and salt and enough water to cover the beans well. Let it cook for four hours, adding water at intervals.

### Cleaning Beanpots.

If a bean pot is hard to clean, put a little ashes in the bottom, fill with water, set in the oven and in a few hours the pot will wash easily.

### Covers Frying Eggs.

If a cover is placed over eggs when frying they will not stick or need any turning.

## Habitual Constipation

May be permanently overcome by proper personal efforts with the assistance of the one truly beneficial laxative remedy, Syrup of Figs and Elixir of Senna, which enables one to form regular habits daily so that assistance to nature may be gradually dispensed with when no longer needed as the best of remedies, when required, are to assist nature and not to supplant the natural functions, which must depend ultimately upon proper nourishment, proper efforts, and right living generally. To get its beneficial effects, always buy the genuine

There is every possibility that the war in the Paris cafes will shortly go on strike again in support of their cherished right to wear mustaches.

No hero will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

The mineral water produce of the United States during 1906 was 48,518, 305 gallons, valued at \$1,574,500—a very considerable increase over the previous year. These figures contemplate only the natural mineral waters taken from springs having some medicinal qualities.

ETS St. Vitus' Dance and all Nervous Diseases permanently cured by Dr. Kline's Great Nerve Restorer. Send for FREE 24 trial bottle and treatise. Dr. R. H. Kline, Ltd., 311 Arch St., Phila., Pa.

### As to Yipsley.

Mrs. Chugwater—Josiah, this paper says a man named Birkman has sued the city as Jared Yipsley's next friend. What does that mean?

Mr. Chugwater—Huh! It doesn't mean anything in this case. No man alive ever really got next to old Yipsley.

### Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed, you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

F. J. CHENEY & CO., Toledo, O.

Sold by Druggists. Take Hall's Family Pills for constipation.

Rome, under Augustus, had a fire brigade and force of night police, numbering in all 7,000 men.

## Does Your Heart Beat

Yes. 100,000 times each day. Does it send out good blood or bad blood? You know, for good blood is good health; bad blood, bad health. And you know precisely what to take for bad blood—Ayer's Sarsaparilla. Doctors have endorsed it for 60 years.

One frequent cause of bad blood is a sluggish liver. This produces constipation. Poisonous substances are then absorbed into the blood, instead of being removed from the body daily as nature intended. Keep the bowels open with Ayer's Pills, liver pills. All vegetable.
