

REPORTS FAVORABLE

Board of Trade Committee Find Mines
Very Promising.

All Conditions Better Than Expected.

THE GOLD CREEK MINING & MILLING CO. and Santiam District completely examined by the sub-committee of Salem Board of Trade Prove Beyond All Doubt the
GREAT MINERAL WEALTH OF MARION COUNTY

in the Santiam Mining District.

The gang matter, as well as ledges, has been found "in place" and all conditions favor the rapid advancement of the district as soon as the necessary capital has been subscribed for in

STOCK AT 10-CENTS

a share until the present allotment has been taken up. THERE IS NO REASON WHY THE SANTIAM DISTRICT will not be the greatest copper producing camp in the United States, when put in proper condition.

READ THE COMMITTEE REPORT

You know the Gentlemen, most of you, and can you for a moment doubt their sincerity when they are setting about it to

Raise \$10,000 at Once

and to do so they are taking hold of the matter personally, financially and bodily. We do not ask you to do as many companies ask, but rather we urge upon you if interested to set a date to go with our representative or go by yourself,

See What Has Been Accomplished

then make your choice, we will abide by it.

The opening of the Santiam District means much for Stayton in several ways, each citizen is directly affected. If you work for wages, hire help or supply the laborer with goods; consider this matter well, then call upon our agent, J. T. Kearns, of Stayton, or if he cannot supply you with all necessary information, address

GOLD CREEK M. & M. CO.
