

Studebaker

"Such shipments mean Studebaker has the confidence of the farmer"

Every year over one hundred thousand horse-driven vehicles are sold by Studebaker. Over a million Studebaker vehicles are always in use. Stop and think what that means.

This enormous output means that Farmers—the men who know—depend upon Studebaker wagons to do their work.

And a Studebaker wagon never fails. It is always ready to do a big day's work—and to keep on doing it. There are thousands of Studebaker wagons that have been in service from 20 to 40 years.

A Studebaker wagon is a real business asset. Wheels, body, frame, axles and running gear have been tested and retested by experts. You can buy cheaper wagons but they're not Studebakers, nor will they last like Studebaker wagons.

Whether in city, town or country, for business or pleasure, there is a Studebaker vehicle to meet your requirements. Farm wagons, trucks, contractors' wagons, buggies, surreys, runabouts, pony carriages, business and delivery wagons—each the best of its kind. Studebaker harness also, of every description.

Stayton Electric Light Co.

Stayton, Oregon, April 13, 1913.

To Our Patrons:

Our practice of extending credit to our customers has been very unsatisfactory, and we will discontinue the practice hereafter. You must appreciate the fact that our income is made up of a large number of small sums, very small sums usually, which entails extra labor and expense when we credit them out and especially when we add interest on overdue accounts.

The universal practice among Electric Light, Gas, Water and Telephone Companies is to ask payment of bills within thirty days which is just and reasonable.

Beginning April 30th we will not extend credit longer than 30 days. Thus April bills become due on the last day of April and if the bill is not paid within 30 days thereafter, viz: by May 30th current will be cut off from the premises. Kindly remember we expect customers to come to our office to settle bills and we will endeavor to treat you fair.

Respectfully,
STAYTON ELECTRIC LIGHT COMPANY
